Professional Summary

Versatile Java Developer with over 10 years of experience in full-stack development, cloud-native architecture, and building scalable enterprise applications. Skilled in Spring Boot, REST APIs, Kafka streaming, Azure, CI/CD, and agile teams. Strong problem-solver with a proven ability to mentor teams and drive solutions in diverse domains including e-commerce, retail, and finance.

Technical Skills

Languages:	Java (8, 11, 17)
Frameworks:	Spring Core, Spring MVC, Spring Boot, Hibernate
Web Services:	RESTful APIs
Cloud:	AWS (EC2, Lambda, EKS, S3, RDS, SNS, SQS, CloudWatch), Azure (AKS, Functions, Azure SQL)
CI/CD & Build:	Jenkins, Docker, Kubernetes, Maven
Databases:	Oracle, PostgreSQL, MongoDB
Messaging:	RabbitMQ, Kafka
Caching:	Hazelcast
Monitoring:	Grafana, Pendo.ai
Version Control:	GitHub, Bitbucket, SVN
Testing:	JUnit, Mockito, Cucumber
Tools:	IntelliJ, Eclipse, Postman, Sublime Text
OS:	Windows, Linux

Professional Experience

Java Full Stack Developer | Golden Future Inc

Mar 2025 – Present | Project: SR Ventures and Investments

- Built scalable REST APIs in Java 17 and Spring Boot.
- Integrated Grafana dashboards for production metrics and monitoring.
- Asynchronous communications with third party applications using Kafka streaming.
- Led backend system design and deployment in AWS environment.
- Owned CI/CD pipelines using Jenkins and Docker.

Senior Consultant | Nagarro Software

Dec 2023 – Nov 2024 | Project: UKG - Authentication

- Designed onboarding modules improving customer experience across UKG Pro.
- Expanded microservices to onboard new client integrations using AWS EKS.
- Designed inter microservice communication using Confluent Kafka.
- Implemented alerting and observability using PagerDuty and Grafana.
- Contributed to architectural planning and cross-functional code reviews.

Module Lead | LTIMindtree

Apr 2021 – Nov 2023 | Project: DHL Express

- Migrated legacy systems (XIB, ASU, UIM) to Spring Boot microservices.
- Developed DAO modules for global DHL stakeholder accounts.
- Established Jenkins automation pipelines for multiple environments.
- Integrated end-to-end messaging across the application using RabbitMQ, Kafka.
- Guided team adherence to OWASP security standards.

Developer | NCR Corporation

Jun 2020 – Apr 2021 | Project: Next Gen Loyalty

- Built e-commerce loyalty adapters for promotions and rewards.
- Dockerized applications and deployed on Azure Kubernetes (AKS).
- Optimized microservice performance with gRPC.
- Created BDD test suites using Cucumber and Spring Boot.

Developer | HCL Technologies

Feb 2019 – Jun 2020 | Project: Advanced Marketing Solution

- Enabled Verifone fuel transaction support in AMS application.
- Orchestrated Docker/Kubernetes deployments on Azure.
- Resolved vulnerabilities via WhiteSource and Coverity scans.

Consultant | Deloitte USI

Aug 2018 – Feb 2019 | Project: RI Bridges - IES

- Maintained critical healthcare modules (MAGI, CHIP, SNAP).
- Documented root cause analyses and resolution workflows.

Developer | Tata Consultancy Services

Mar 2015 – Aug 2018 | Project: HDFC Life Transformation

- Built Document Management and Policy Service systems in Java/Spring.
- Engineered batch processing for customer service requests.
- Integrated SOA architecture across enterprise platforms.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering — 2010 – 2014

Relevant Coursework: Data Structures, OS Architecture, System Design, DBMS
