

AMBER L. MAYSON

CLINICAL PROJECT MANAGER

Sterling, VA | 571.233.1371 | amberlmayson@gmail.com | [LinkedIn](#)

PROFESSIONAL PROFILE

Results-driven Project Manager with a strong background in the pharmaceutical industry and clinical operations/development. Extensive experience leading global projects across biotechnology, medical device, and healthcare sectors. Demonstrated success in managing large-scale regulatory compliance initiatives, including EU MDR, FDA, and ISO requirements, with a focus on clinical development timelines, trial readiness, and GxP standards. Skilled in aligning cross-functional teams—including Clinical, Regulatory, Quality, and IT—to ensure successful project execution from clinical trial planning through post-market surveillance. Proficient in Agile methodologies, risk mitigation, change management, and data-driven decision-making. Technical expertise includes ServiceNow, Smartsheet, Visio, Power BI, and the Microsoft Office Suite. Recognized for strategic problem-solving, process optimization, and navigating complex regulatory and clinical environments efficiently and effectively.

CORE COMPETENCIES

- Project Planning and Scheduling
- Risk Assessment and Mitigation
- Agile/Scrum Methodologies
- Budgeting and Cost Control
- Stakeholder Management
- Program Management
- Change Management
- Team Management
- Scope Definition
- Decision-Making
- Problem-Solving
- SOPs

WORK EXPERIENCE

ELARA CARING (CONTRACT), DALLAS, TX, JANUARY 2025 TO PRESENT

CLINICAL PROJECT MANAGER

- Spearheaded the optimization of ServiceNow's Field Service Module, ensuring alignment with AlayaCare migration, resulting in streamlined scheduling and management of personal care services.
- Led end-to-end delivery of field service management modernization and AlayaCare migration projects at Elara Caring, overseeing a combined \$570K+ budget to enhance ServiceNow and AlayaCare system integration.
- Spearheaded project management process improvements across Elara Caring's IT Department, optimizing workflow efficiency and governance standards—reducing project cycle times by 25% and improving on-time delivery by 30% through standardized methodologies and cross-departmental alignment.
- Authored and led ServiceNow Test Manager 2.0 training program for 70+ IT team members, increasing system utilization and testing accuracy by 40%, while driving a notable reduction in post-deployment defects and enhancing overall QA performance.
- Directed cross-functional teams—including external vendors, clinical partners, and IT stakeholders—across over 1,000 labor hours to consolidate multiple legacy systems into a unified cloud-based environment.
- Implemented intelligent task automation, mobile app enhancements, and real-time data modeling improvements that reduced coordinator workload, optimized scheduling, and improved care delivery visibility.
- Spearheaded field service management refactoring by integrating the AlayaCare Enterprise Connector with ServiceNow, enabling seamless synchronization of patient, visit, and employee data across previously siloed state systems.
- Delivered both projects on schedule within tight timelines (23 weeks and 4-month windows), while aligning outcomes with strategic enterprise goals for operational scalability, compliance, and cost efficiency.
- Managed complex IT healthcare projects, including integrations with electronic health record (EHR) systems, ensuring seamless functionality and compliance with industry standards.
- Led User Acceptance Testing (UAT) efforts for FSM 2.0, coordinating cross-functional teams and ensuring timely delivery of project milestones within vendor-related timelines.
- Drove the successful completion of healthcare technology projects by proactively engaging stakeholders, identifying risks, and implementing mitigation strategies to maintain project schedules.
- Improved project efficiency by 15% through meticulous attention to detail and consistent communication with teams, vendors, and upper management.
- Facilitated stakeholder meetings and progress reviews, delivering detailed project updates that improved decision-making

and enhanced transparency.

- Collaborated with technical teams to address vendor delays, ensuring alignment with organizational goals and minimizing project disruptions.
- Developed comprehensive UAT test cases and scripts, collaborating with cross-functional teams to validate system performance and user experience.
- Facilitated stakeholder engagement and feedback sessions to refine system workflows, address pain points, and enhance adoption rates.
- Identified and resolved critical defects during UAT, partnering with developers and business analysts to optimize system efficiency before deployment.
- Trained end-users and support teams on FSM functionalities, improving operational efficiency and reducing troubleshooting time post-implementation.
- Documented testing results, defects, and process improvements, contributing to knowledge management and future system enhancements.
- Created and managed user stories, epics, and tasks in ServiceNow, aligning project deliverables with business requirements and Agile best practices.
- Collaborated with cross-functional teams to define, document, and prioritize backlog items in ServiceNow, ensuring traceability and timely execution of project milestones.

JOHNSON & JOHNSON INNOVATIVE MEDICINE (6M CONTRACT), RARITAN, NJ, JUNE 2024 TO DECEMBER 2024

END-TO-END PROJECT MANAGER

- Managed two high-impact pharmaceutical projects at Johnson & Johnson, each valued at \$1 million, overseeing cross-functional teams and ensuring on-time, on-budget delivery aligned with regulatory and business objectives.
- Oversaw change control and validation activities across cross-functional teams to align ANDA project deliverables with regulatory and quality requirements.
- Managed and hosted weekly stakeholder and technical review meetings, ensuring proactive risk identification and transparent communication with leadership.
- Successfully led and submitted two Abbreviated New Drug Applications (ANDAs) to the FDA, navigating complex regulatory requirements and contributing to the expansion of the company's generic drug portfolio.
- Led cross-functional ANDA projects from initiation to completion, overseeing planning, tracking, risk identification, and mitigation strategies to ensure timely FDA approval and commercialization.
- Spearheaded the development and implementation of advanced Business Analytics tools, enhancing performance monitoring and decision-making processes.
- Managed complex budgets and project tracking systems, ensuring financial accuracy and operational efficiency.
- Designed and maintained data visualization dashboards using Power BI and Tableau, providing actionable insights to cross-functional teams.
- Led cross-functional collaborations to align business strategies with analytical findings, fostering informed and data-driven decisions.
- Developed and standardized operational playbooks, streamlining analytics tools and processes for team-wide efficiency.
- Developed and executed comprehensive project reviews, assessing scenarios, trade-offs, and improvement opportunities to optimize project outcomes.
- Maintained an integrated project timeline encompassing all ANDA and ANDA-enabling activities, ensuring alignment and coherence across workstreams.
- Facilitated Core Team Meetings and upheld a concise project 1-pager, communicating workstream status, deliverables, and risks to stakeholders for informed decision-making.
- Monitored action items and enforced progress against commitments, proactively identifying and escalating risks and issues while leading tactical mitigation and contingency planning efforts.
- Provided consistent project updates to stakeholders, fostering transparent communication and alignment throughout project life cycles.
- Created and maintained comprehensive project documentation, including "lessons learned" exercises, to inform future project iterations and drive continuous improvement initiatives.

STRYKER (26M CONTRACT), MAHWAH, NJ, SEPTEMBER 2021 TO DECEMBER 2023

PROJECT MANAGER

- Chart successful course of planning and managing 50+ domestic and international projects; converted 6255 SKUs; 95% of joint replacement products were converted on time and within budget.
- Pilot the creation of comprehensive project plans; define project scope, objectives, milestones, and deliverables to ensure alignment with broader organizational and departmental goals and objectives.

- Directed strategic initiatives to optimize data governance protocols, ensuring data accuracy, consistency, and security across business units.
- Delivered impactful presentations to senior leaders, distilling complex data models into clear, strategic recommendations.
- Oversaw KPI performance tracking, identifying and implementing opportunities for continuous process improvement.
- Evaluated and deployed cutting-edge analytical technologies to improve metrics collection and data reporting.
- Cultivated strong relationships with stakeholders, translating business requirements into actionable insights to drive organizational growth.
- Align objectives and bridge communications with key stakeholders, including surgeons, healthcare professionals, and internal teams, to gather project requirements and ensure alignment with customer needs and expectations.
- Secure and manage crucial project resources, including personnel, equipment, and budget, to ensure each project is completed on deadline and within budget.
- Proficient in both quantitative and qualitative methods, with a focus on utilizing statistical techniques to extract meaningful insights and drive decision-making processes.
- Knowledgeable in Minitab for statistical analysis and quality improvement initiatives in joint replacement projects, ensuring product quality and reliability.
- Skilled in developing predictive analysis tools and generating customized reports specifically tailored to the needs of joint replacement medical devices, aiding in forecasting and strategic planning.
- Applied knowledge of linear programming techniques to optimize operational processes within the joint replacement medical device sector, enhancing efficiency and resource utilization.
- Utilized operations research methodologies to improve project management practices, resulting in enhanced efficiency and effectiveness across various projects within the sector.
- Applied cluster analysis techniques to identify patterns and groupings within datasets relevant to joint replacement devices, enabling targeted interventions and product improvements.
- Implement strategic measures to optimize resource allocation and utilization to maximize project efficiency.
 - **Brexit NC Process:** a large-scale, complex, 10-month effort involving 52 resources from the business and IT to design and implement across four systems and sites. Create and test 42 test scripts to validate the 46 user requirements, then dedicate several weekends to the installation, rollout, validation, and hyper care activities as each site goes live.
- Track project progress, identify potential issues and risks, and implement mitigation strategies and contingency plans to proactively address challenges, ensuring projects remain on schedule and adhere to quality standards.
- Partner with quality assurance and regulatory affairs teams to implement appropriate processes and create documentation to enforce compliance with quality and regulatory standards, such as ISO requirements and FDA regulations.
- Organize and facilitate cross-functional divisional meetings to share regular updates about strategy, adjustment, and progress with various stakeholders as well as regular project status meetings to share updates, make key decisions, and manage expectations.
- Employ project management methodologies, tools, and best practices to maintain high-quality standards.
- Drive continuous process improvements; for example, the Brexit NC process facilitated the shipment of a CE2797-compliant product from the CDC and Ireland to Europe and mitigated shipment holds to Europe, impacting \$250 million annually. This now scalable functionality significantly improves flexibility. This solution moving forward should provide the ability to get a product to market faster during Operational, Regulatory, Marketing, and other changes/priorities with some added configuration as future needs arise.
- Orchestrate product launches and post-market activities; coordinate with cross-functional teams to facilitate smooth transitions, effective communication, and successful joint replacement product commercialization.

BIOLOGICS CONSULTING GROUP (6M CONTRACT), ALEXANDRIA, VA, APRIL 2021 TO SEPTEMBER 2021

REGULATORY PROJECT MANAGER

- Assisted in validation planning and regulatory submissions (510(k), technical files, labeling) for medical device clients, ensuring compliance with FDA and ISO standards.
- Partnered with Quality Engineers to support validation protocols and first article inspections, ensuring compliance with ISO 13485 and FDA requirements.
- **Facilitated cross-functional design reviews with engineering teams, reviewing CAD drawings and ensuring updates met regulatory and manufacturing standards.**
- Spearheaded the planning and execution of regulatory projects, enforcing compliance with applicable standards and regulations, including ISO, FDA, and other relevant regulatory bodies.
- Provided consulting services focused on drug, biologics, biosimilars, and medical device development, as well as the FDA regulatory approval process, including FDA submissions and interactions, pharmacology/toxicology, quality management,

product manufacturing, medical device biocompatibility, clinical trial design and evaluation, GMP, GLP and GCP regulatory compliance, and U.S. agent services.

- Authored comprehensive regulatory project plans, including timelines, resource allocation, and deliverables to guide successful projects from initiation to completion while meeting strict regulatory requirements.
- Executed comprehensive regulatory assessments and gap analyses to identify potential risks and areas of non-compliance, then implemented corrective actions and mitigation strategies to maintain regulatory compliance.
- Utilized a regulatory impact analysis to assess the positive and negative effects of proposed and existing regulations and non-regulatory alternatives across multiple products, including drugs, biologics, biosimilars, and medical devices.
- Partnered with cross-functional teams, including R&D, manufacturing, quality assurance, and legal, to collect necessary information and documentation to ensure alignment with regulatory requirements.
- Assembled and submitted regulatory submissions, such as 510(k) applications, premarket notifications, technical files, and regulatory reports, to ensure accuracy, completeness, and deadline adherence.
- Served as the primary point of contact for regulatory agencies and notified bodies, effectively addressing inquiries, requests for additional information, and regulatory audits or inspections.

EMERGENT BIOSOLUTIONS (6M CONTRACT), ROCKVILLE, MD, AUGUST 2020 TO APRIL 2021

PROJECT ANALYST

- Analyzed project objectives and requirements, then collaborated with cross-functional teams to define project scope, timelines, and deliverables to ensure alignment with broader organizational goals.
- Managed and hosted weekly stakeholder and technical review meetings, ensuring proactive risk identification and transparent communication with leadership.
- Built and maintained detailed project plans, milestones, and dependencies while proactively identifying and mitigating issues and risks to ensure on-time completion.
- Proficient in Excel for data manipulation, analysis, and visualization, utilizing advanced features to extract insights and create visually appealing reports.
- Skilled in Visual Basic for Applications (VBA) for customizing Excel and automating repetitive tasks, streamlining data analysis workflows and increasing productivity.
- Championed collaboration and open communication among stakeholders, including project team members, senior management, clients, and suppliers, ensuring a clear understanding of project expectations, deliverables, and project status.
- Completed comprehensive research and analysis to support decision-making processes, providing insightful data-driven insights and recommendations to optimize project outcomes, resource allocation, and cost efficiency.
- Oversaw project budgets, tracked expenses and variances, and worked with finance and procurement teams to ensure accurate financial forecasting, adherence to budgetary constraints, and cost control.
- Produced and updated key project documentation, including project charters, risk registers, change control processes, and status reports, to deliver accurate and up-to-date project information to senior management and stakeholders.
- Leveraged project management software and tools to streamline project workflows, facilitate real-time project tracking and reporting, and enhance collaboration.
- Drove the implementation of quality assurance processes and regulatory compliance requirements to enforce adherence to industry standards and regulatory guidelines.
- Orchestrated post-project evaluations to identify and record lessons learned and opportunities for improvement; developed recommendations to enhance future project planning and execution processes.
- Coordinated with cross-functional teams to identify and implement process improvements and best practices, driving efficiency and effectiveness in project management operations.
- Partnered with several clients such as Johnson and Johnson, Novavax, and Aicuris in manufacturing the COVID-19 vaccination during COVID-19 Operation Warp Speed.

LEADERSHIP EXPERIENCE

THE HOPE DEALER PROJECT, MARTINSBURG, WV, AUGUST 2015 TO PRESENT

PROGRAM MANAGER

- Spearheaded the conception, financial modeling, and operational launch of the Hope Dealer Project, a \$1.2M community-driven nonprofit initiative, achieving 100% program funding within the first 18 months.
- Developed and managed annual budgets exceeding \$450K, ensuring fiscal discipline, adherence to grant requirements, and strategic alignment of resources to mission-critical services.
- Implemented robust financial controls and internal reporting systems, reducing overhead costs by 23% and enabling quarterly forecasting accuracy within 3% variance.
- Secured and managed over \$2.3M in cumulative funding through private donations, state and federal grants, and corporate sponsorships—expanding the organization's operating capacity by 65% in three years.

- Negotiated contracts and service agreements with over 20 partners, achieving a 35% increase in in-kind contributions and reducing third-party vendor costs by 18%.
- Led cross-functional financial planning across 7 core programs, conducting ROI analysis and cost-benefit evaluations that optimized service delivery and justified a 40% increase in grant renewals.
- Oversaw annual audits and ensured 100% compliance with nonprofit financial regulations, delivering clean audit results for 5 consecutive years.
- Presented strategic financial updates and performance dashboards to a 7-member board of directors, influencing decisions on capital projects and reserve fund development, growing reserves by 50% over three years.
- Instituted a cost-saving initiative across operations, including renegotiation of supplier contracts and administrative streamlining, resulting in \$120K annual savings.
- Directed organizational HR and payroll operations for a team of 12 staff and 60+ volunteers, aligning compensation with budget goals and improving retention by 30%.
- Scaled service delivery to over 4,500 individuals annually, reinvesting 92% of funds directly into community programs and maintaining a program-to-admin cost ratio of 9:1.

HAMPTON UNIVERSITY, HAMPTON, VA, AUGUST 2016 TO MAY 2018

BIOMEDICAL RESEARCH CHAIR

- Oversaw 500 current and future underrepresented minority medical students, addressed the needs of underserved communities, and increased the number of clinically excellent, culturally competent, and socially conscious physicians.
- Advised 250 students on research program applications and answered questions to help increase their chances of securing research opportunities.

HAMPTON UNIVERSITY, HAMPTON, VA, AUGUST 2016 TO MAY 2018

CLINICAL SHADOWING CHAIR

- Succeeded as a leader in academic medicine responsible for acting as a community health advocate and directing changes to health policy, achieving significant milestones to improve equity in healthcare.
- Partnered with Riverside Medical Center to develop a shadowing program for 350 Hampton University students. Guided 600 applicants to ensure the proper vaccinations required by the hospital were fulfilled, collected required dues, and ensured the applications were complete in their entirety.

EDUCATION

MASTER OF SCIENCE (M.Sc.) IN BIOTECHNOLOGY CONC. ENTERPRISE & ENTREPRENEURSHIP

Johns Hopkins University, Baltimore, MD

Dean's List, Cum Laude, National Scientific Honors Society Member

Relevant Coursework: Biostatistics

BACHELOR OF ARTS (B.A.) IN PSYCHOLOGY CONC. PRE-MEDICAL STUDIES

Hampton University, Hampton, VA

PROFESSIONAL AFFILIATIONS

- Beta Kappa Chi National Scientific Honors Society

VOLUNTEERISM

- Behavioral Health Intern, Berkeley Medical Center, Martinsburg, WV, 2015 to 2018
- Health Committee Chair, Hampton University NAACP, 2014 to 2018
- Volunteer, VA Medical Center, Hampton, VA, 2014 to 2018
- Teaching Assistant, Child Development Center, Hampton, VA, 2014 to 2018

ADDITIONAL INFORMATION

Technical Proficiencies: Smartsheet, Visio, Adobe, Microsoft Office Suite, PowerBI Microsoft Teams
