SUMMARY

- 8+ years of experience in front-end development including web development using modern technologies such as React | TypeScript | JavaScript | Vue.js | NextJs | React Query | Stencil | Svelte | Redux | React Router | HTML/HTML5 | CSS/CSS3 | Tailwind CSS | Node.js, PostgreSQL, SQL, Micro Frontend, Bootstrap, jQuery, ES6, JSON, Webpack, Ajax, Babel, Jenkins, Nexus, Harnees, Dockers, CI/CD Pipeline, Azure, AWS, Contentfull, Jest, Cypress, and React Testing Library and so forth.
- Developed reusable components using Stencil and used GitHub Actions, Nexus, CI/CD pipeline, and Jenkins to deploy tarball in React and Designed and developed a high-performance Single Page Application (SPA) using React.js
- Proven success in developing highly modular component systems, managing client-side authentication flows, and migrating legacy applications without disrupting the user experience.
- Expertise in creating interactive charts libraries such as Highcharts, delivering dynamic and data-driven visualizations.
- In-depth knowledge of large-scale cross-browser MERN stack web applications using MongoDB, ExpressJS, ReactJS, NodeJS, jQuery, and AJAX.
- Experience in implementing component life cycle architecture and store icons in React-Redux app to handle back-end data; Use React Router and Redux Thunk for API calls in ReactJS.
- Experience handling SQL injection, cross-site scripting, and other common web security issues.
- Established professionalism by engaging Express, Passport, and Event Dispatcher in Node.js, in developing server-side applications following standards and requirements.
- Abundant experience in designing and developing RESTful and SOAP web applications in NodeJS.
- Ability to manage different phases of the life cycle in software development using Agile/Scrum/Rally approaches.
- Proficiency in using testing tools like Jest, Enzyme, and React Testing Library to write unit and integration tests.
- Familiarity with using version control tools such as SVN and GIT in developing environments.
- Dedicated team player with great passion, a positive attitude, and a willingness to share knowledge.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, PostgreSQL, XML

Client-Side Development: React.js, Next.js, Vue.js, Stencil, Svelte, jQuery, JSON, Redux, React Query, GraphQL

Styling: Tailwind CSS, SCSS, HTML5, CSS3, Bootstrap

Server-Side Development: MongoDB, Express.js, Node.js, REST APIs

Testing Runners: Jest, Enzyme, Mocha, Postman Version Control and Project Management: Git, Jira Development

Methodologies: Agile/Scrum, Waterfall

Front-End Design Tools: Figma, Tailwind CSS

EXPERIENCE

Client: CVS Pharmacy, Inc, Los Angeles, CA (Remote)

September 2021

Position: Senior Front-end Developer with React

Project: Search Optimization

Description: The Search Optimization Team brings new tech modernization and advanced technologies into various aspects of CVS codebase. This includes upgrading and improving systems, processes, and infrastructure to increase the efficiency of websites.

My primary focus was on building CVS' search page within a single-page application using React.js | TypeScript that dynamically updates the current view rather than loading entire new pages to deliver a seamless and responsive user experience as well as building new components with Stencil for an enhanced user experience.

Responsibilities:

- Developed & maintained web applications using React | TypeScript | Stencil | SASS, other front-end technologies.
- Integrated Contentful CMS into web application to manage dynamic content into React.js. improving page flexibility.
- Collaborated with cross-functional teams, including designers, developers, and stakeholders, to implement new features and improvements.
- Worked across multiple repositories and micro frontends, coordinating efforts to migrate legacy applications while preserving user experience.
- Built reusable components with React.js | TypeScript | Next.js | StencilJs and streamlined CI/CD pipelines using Jenkins, Jfrog, Harness, and GitHub Actions to automate deployments and monitor application performance.
- Used Node.js and javascript to build microservices to support networking and I/O operations.
- Optimized web applications for maximum speed and scalability; debugged and resolved technical issues promptly.
- Conducted code reviews and provided constructive feedback to developers.
- Created RESTful API endpoints for the front end to communicate with the back end, building scalable, high-performance applications.
- Achieved 100% unit test coverage using Jest, End-to-end (E2E), and React.js-Testing-Library.
- Analyzed test results(QA), identified issues, and reported defects to the development team.
- Worked closely with the analytics team to ensure our app captured all necessary data points for user interactions.
- collaborated closely with the design team to ensure the implementation of a user-friendly interface that aligned with our project goals. We used Figma as our primary tool to communicate design specifications, provide feedback, and clarify any uncertainties

Client: Illuminate Education, Los Angeles, CA

May 2020 – September 2021

Position: Front-end Developer with React

Project: Data Visualization Tool

Description: Illuminate Education partners with educators to reach new levels of student performance, empowering teachers with data to serve the whole child. Its solution brings together holistic data and collaborative instructional tools and puts them in the hands of educators. The right data visualizations can be the difference between collecting data and making data-driven decisions that positively impact teaching and learning. Illuminate Education Data Visualization can help you target essential questions, discover key insights, and reveal the right next steps to take at the student, class, school, and district levels.

Responsibilities:

- Participated in designing, developing, and testing the Single Page Application (SPA) using React, Redux, React Router, HTML5, CSS3, TypeScript, Vue.js, AWS, Dockers, Jenkins, and Material UI.
- Built Single Page Application (SPA) dashboards with real-time data updates and dynamic charts using React, React Query, and Highcharts.
- Implemented the schedule viewing table with Material UI, React hooks, and Redux.
- Added data visualization features by utilizing React, Redux, and Highcharts for the functionality of new modules.
- Took responsibility for the style of the web pages with SASS that extends CSS with dynamic behavior such as variable, mixing, and functions to create scalable and maintainable CSS templates.
- Refactored the React components' state into Redux to increase scalability and code readability.
- Utilized functional programming concepts and React hooks to develop UI components that could be reused across the entire application.
- Constructed RESTful API endpoints for the front end to communicate with the back end.
- Fulfilled responsive web development, including building grids by using Material UI components such as dropdown

menus, tables, alerts, forms, etc.

- Used Git for version control and was involved in Agile and Scrum workflow.

Client: iShowcase, Inc, Woodland Hills, CA

January 2017 -April 2020

Position: Front-end Developer with React

Description: With the most powerful website platform within the jewelry industry, iShowcase offers retailers and manufacturers professionally built websites that promise measurable results at comparable prices. With proven product data management, as well as internet marketing strategies specifically designed for the jewelry industry, the iShowcase team promises to maintain and update client websites on a day-to-day basis. iShowcase streamlined jewelry product data management and integration to bring brand data directly to retailer websites. It provides constant access to up-to-date products from the biggest brands in the industry. Its data management services remain at the cutting edge of technology within the jewelry industry.

Responsibilities:

- Took responsibility for communicating with clients to understand the requirements for the website and writing project design documents and project plan documents.
- Designed and developed a JavaScript | React.js framework that serves as a wrapper on top of the jQuery framework and Ajax-based UI framework for UI Configuration widgets.
- Implemented client-side validation using React.js, JavaScript, and jQuery.
- Wrote cross-browser compatible and standards-compliant page layouts using CSS3.
- Substantially implemented UI designs following enterprise standards and requirements using Bootstrap.
- Build unit tests using Mocha. Used Git for version control.

PROJECTS

Lost Planet Website

Dream Story Agency

Github: <https://github.com/meysamcoding/Dream-Story-Agency>

- This project was designed to showcase Dream Story Agency, a photographer's portfolio site.
- Created an application for the client so that they may be able to display their work and provide additional services for anyone who wishes to hire a photographer. This project was bootstrapped with Create React App.
- Used: HTML5, CSS5, JavaScript, React App, MongoDB, [Node.js](https://nodejs.org/)

Fitness App

Github: <https://github.com/meysamcoding/fitness-app>

- This is mainly focused on front-end design.
- Create an app for users can check training schedules and classes in the gym and also find new products.
- Built on HTML5, SASS, CSS3, JAVASCRIPT .

EDUCATION

Full Stack Web Development, Certificate: UCLA Extension, Los Angeles, CA

June 2019 - 2020

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, PostgreSQL, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

Web Development, Certificate: Los Angeles Pierce College, Woodland Hills, CA

Oct 2018 - 2020

A 12-unit program designed to develop skills to create and administer websites using various server-side programming languages.

Bachelor of Science, Computer Engineering: Azad Ramsar University, Ramsar, Iran

Oct 2008 - 2012
