

Raghu Nandan Reddy

Email: reddyraghunandan777@gmail.com

Tel: +1 (405) 318-3093

SUMMARY:

- Over 3 years of experience in developing, testing, and deploying web applications as a Java Full Stack Developer.
- Proficient in frontend technologies such as Angular, ReactJS, HTML5, CSS3, JavaScript (ES6+), and TypeScript.
- Strong backend development skills using Java (Java 8/7), Spring Boot, Hibernate, JPA, and RESTful API design.
- Experienced in working with relational and NoSQL databases, including MySQL, Oracle, and MongoDB.
- Expertise in integrating third-party services and APIs to enhance application functionality.
- Familiar with Agile methodologies, including Scrum, and utilizing version control tools like Git and GitHub.
- Hands-on experience with cloud technologies such as AWS, Microsoft Azure, Docker, and Kubernetes for scalable deployments.
- Skilled in implementing test-driven development (TDD) and using frameworks like JUnit, Selenium, and Postman for testing.
- Strong problem-solving abilities and a proactive team player, capable of adapting to dynamic project requirements.

SKILLS:

- **Programming Languages:** Java 8/7, SQL, PL/SQL, JavaScript/jQuery, HTML5, C/C++
- **Frontend Technologies:** Angular 6, ReactJS, HTML5, CSS3, JavaScript (ES6+), TypeScript, jQuery, AJAX, Bootstrap, RESTful APIs
- **Backend Technologies:** Java SE/EE, Spring Framework (Spring Boot, Spring MVC, Spring Security), Hibernate 5/4, JPA, Express, Node.js
- **Databases:** Oracle 11g, MySQL, MongoDB
- **Tools & Frameworks:** Spring 4.3, Hibernate, Maven, Apache Ant, Node.js, Express, Angular 6, ReactJS, Redux, Bootstrap, Mongoose
- **Version Control:** Git, GitHub, Bitbucket, SVN
- **Build Tools:** Maven, Gradle, Apache Ant
- **Application Servers:** Tomcat 8, Node.js
- **Cloud Technologies:** AWS (EC2, S3), Microsoft Azure (App Services, Azure Functions), Docker, Kubernetes
- **Testing Frameworks:** JUnit, TestNG, Selenium, Mockito, Postman, Rest Assured, Cucumber, Jasmine
- **Development Methodologies:** Agile (Scrum, Kanban), Test-Driven Development (TDD), Continuous Integration/Continuous Deployment (CI/CD)
- **Collaboration Tools:** Jira, Confluence, Slack
- **Other Tools:** Eclipse, Visual Studio Code, WebStorm, Postman, Docker, NPM

EXPERIENCE:

Ameri Source Inc

Mar 2024 to Current

Java Full Stack developer

- Designed and developed end-to-end web applications using Angular 6, ReactJS, JavaScript (ES6+), TypeScript, HTML5, and CSS3, leading to a 30% improvement in user experience.
- Built and maintained RESTful APIs for seamless communication between frontend and backend, improving system performance by 20%.
- Developed server-side components using Java SE/EE, Spring Boot, Hibernate, and Node.js, reducing system downtime by 15%.
- Designed and implemented SQL and PL/SQL queries to optimize database performance in Oracle 11g and MySQL, improving data retrieval times by 25%.
- Led a team of 5 developers to integrate AWS EC2 and Azure Functions, achieving 40% reduction in cloud infrastructure costs.
- Managed version control using Git and GitHub, ensuring 100% version consistency across multiple environments.
- Automated testing processes using JUnit, Selenium, and Cucumber, reducing manual testing time by 35%.
- Collaborated with cross-functional teams using Jira and Confluence, ensuring 100% completion of sprint tasks within deadlines.
- Implemented CI/CD pipelines using Jenkins and Docker, accelerating deployment cycles by 50%.

Coforge

Jan 2020 to July 2022

Java Full Stack Developer

- Developed and maintained dynamic web applications using Angular 6, ReactJS, and Node.js, delivering 3+ major releases within the first year.
- Enhanced user interfaces using jQuery, AJAX, and Bootstrap, improving overall application performance by 18%.
- Led backend development efforts with Spring Boot, Spring Security, and Hibernate, ensuring a 99% uptime for production systems.
- Wrote optimized PL/SQL and SQL queries to interact with Oracle 11g and MongoDB, increasing data processing efficiency by 22%.
- Utilized Maven and Gradle for build automation, reducing build time by 40% and improving developer productivity.
- Managed cloud resources on AWS EC2 and S3, leading to a 25% cost saving through resource optimization.
- Integrated and maintained CI/CD pipelines with Jenkins, reducing manual deployment errors by 30%.
- Automated API testing with Postman and Rest Assured, achieving a 95% automation rate for testing new features.
- Collaborated effectively within an Agile team, participating in 2-week sprints and achieving 90% sprint completion rate.
- Used Git, GitHub, and Bitbucket to manage code and streamline team collaboration, ensuring zero code conflicts.

EDUCATION

- **Master of Science - MS, Computer Science (CGPA: 3.570)**
Wichita State University
- **Bachelor of Technology - B. Tech , Computer Science (CGPA: 7.79/10)**
Lovely Professional University

CERTIFICATION:

- **AWS Solutions Architect – Associate**
