PROFESSIONAL SUMMARY

Results-driven data analyst with over 4 years of experience in leveraging advanced analytics to drive operational efficiency and enhance decision-making in the healthcare and finance sectors. Proficient in tools like Azure Databricks, Power BI, and SQL, I've successfully implemented workflows that reduced reporting turnaround time by 30% and improved medication adherence insights by 25%. My collaborative approach has not only streamlined data processes but also empowered stakeholders with real-time insights, making a tangible impact on business outcomes.

SKILLS

Business Intelligence & Analytics: Power BI, Tableau, Looker, Adobe Analytics, Power BI Report Server, Amazon Quicksight, Excel/Numbers/Sheets

Data Engineering & ETL Tools: Azure Databricks, Alteryx, dbt, Talend Open Studio, Apache Airflow, XMPie, Power Automate

Programming & Scripting: Python, SQL, R, Java, PHP, HTML/CSS

Database Management & SQL: SQL Server, SQL Server, MySQL, PostgreSQL, Oracle, Microsoft SQL Server, Snowflake, stibo

Data Processing & Transformation: OLAP, ETL, Business Intelligence, Data Analytics, Data Modeling, Data Science, Data Models, Data Warehousing, Predictive Models

Cloud & Big Data Technologies: AWS (Certified), Microsoft Azure, gcp

Version Control & DevOps: Git, Bitbucket, JIRA, Confluence, Development Operations (DevOps), Version Control

Reporting & Automation: Spark SQL, SSIS, SSRS, Stored Procedures, Business Analytics, Business Objectives

File & Data Handling: JSON, XML, File Types, File Encodings, Delimiters, Line Breaks, Special Unicode Characters

PROFESSIONAL EXPERIENCE

Molina Healthcare

Data Analyst

Remote

July 2023 - Present

- Reduced reporting turnaround time by 30% by implementing Azure Databricks workflows and Alteryx processes to analyze over 250,000 healthcare claims weekly, ensuring compliance with data governance standards.
- Improved medication adherence insights by 25% through deploying probabilistic models and Bayesian networks for predictive analytics on EHRs, ensuring compliance with HIPAA standards and enhancing data quality.
- Reduced report generation time by 40% by designing interactive Power BI dashboards, enabling real-time insights for 20+ stakeholders and utilizing strong verbal communication skills.
- Improved data accessibility and reduced query latency by 20% by collaborating with data engineers to design and implement Snowflake data models, focusing on robust database solutions.
- Supported decision-making for 15+ administrators by generating 10+ detailed SSRS reports that summarized drug utilization and adherence patterns across 3 regions, incorporating A/B testing strategies to refine insights.
- Teamed up with data engineers to design and implement Snowflake data models, improving data accessibility and reducing query latency by 20%
- Achieved a 20% reduction in data request turnaround times by assisting healthcare teams with the development and optimization of complex SQL queries, enhancing quality improvement initiatives across 5+ departments and integrating insights into PowerBI.
- Deployed probabilistic models and Bayesian networks for predictive analytics on EHRs, achieving a 25% improvement in medication adherence insights while ensuring compliance with HIPAA standards.
- Ensured data quality and compliance by utilizing SAP and Stibo for master data management in alignment with governance standards and policies.
- Improved data-driven decision-making by utilizing Python and R to develop predictive models and leverage machine learning for healthcare data analysis.

I Sparrow

Data Analyst

India

November 2019 - August 2022

- Reduced manual reporting time by 20% by delivering projects that improved operational efficiency, collaborating with stakeholders across Finance, Credit Risk, and Treasury, and applying strong work ethic.
- Enhanced decision-making speed by 35% by developing dashboards for internal and external reporting, utilizing Tableau, and Looker increasing data accessibility for 30+ business users.

- Utilized SQL,PySpark and Python for segmentation analysis and A/B testing, identifying customer behavior trends that boosted retention rates by 13% and applying statistical methods to derive actionable insights.
- Improved query performance by 40% and ensured compliance with governance policies by migrating datasets from SQL Server to Snowflake, enhancing data solutions with a focus on statistics.
- Cut reporting times by 40% and ensured consistency across 50+ KPIs by automating ETL workflows using Alteryx and dbt, showcasing a strong work ethic in delivering efficient data solutions.
- Supported a robust database solution by taking advantage of AWS for scalable financial and risk data storage, facilitating the management of over 500 GB of data monthly.
- Engineered machine learning models with Scikit-Learn for targeted marketing campaigns, improving campaign ROI by 15%.
- Built Tableau, Looker, and Adobe Analytics dashboards for sales and marketing metrics, providing real-time insights for 25+ stakeholders and driving a 10% improvement in resource allocation efficiency.
- Improved data accessibility and reduced query latency by 20% by teaming up with data engineers to design and implement Snowflake data models, focusing on data governance and quality.
- Enabled effective forecasting and data-driven decisions by applying SQL and BigQuery for data extraction and analysis, focusing on operational improvements.
- Conducted segmentation analysis using SQL and Python to identify customer behavior trends, utilizing statistics and A/B testing methods that boosted retention rates by 13%.

EDUCATION

University of Maryland - Baltimore County
Master's, Information Systems

August 2022 - August 2024
GPA: 3.7

Vignan University
Bachelor's, electronics and communication

GPA: 3.4

CERTIFICATIONS

AWS Certified Data Engineer - Associate (2024)
Oracle Database SQL Certified - Associate (2022)
