

SUMMARY

Full Stack Engineer with 5 years of experience building scalable cloud-native systems using Spring Boot, Django, React, and Angular. Implemented API optimization, database performance tuning, and real-time data pipelines with Kafka, Spark, and Redis. Experienced in deploying containerized solutions on AWS and Azure with Docker and Kubernetes, reducing environment setup time by 70% and accelerating delivery.

PROFESSIONAL EXPERIENCE

Software Developer | UT Austin | Remote, USA

September 2024 – Present

- Engineered scalable web applications by integrating **Django, React.js and PostgreSQL**, reducing API latency by 25% across 3 high-traffic endpoints through collaborative optimization.
- Deployed containerized applications using **Docker, GitHub Actions**, and AWS EC2, automating environment provisioning and reducing setup time by 50%, ensuring consistent delivery across 5 project environments.
- Led system design for scalable backend services, **optimizing Celery-RabbitMQ task queues and SQL queries** to improve throughput by 35% while reducing infrastructure costs by 15% through efficient resource utilization.
- Revamped backend layers with **Spring Boot and Spring Data JPA**, constructing optimized RESTful APIs that supported 10,000+ concurrent user requests, cutting query execution time by 20%.

Software Developer | UTA | Texas, USA

February 2024 – August 2024

- Implemented a real-time data pipeline with **Apache Kafka and Spark** to process 10GB+ of tax records, supporting geospatial analysis in ArcGIS Pro and Python that identified anomalies and valuation discrepancies across 5 revenue districts.

Software Engineer Intern | TomTom | Texas, USA

May 2023 – August 2023

- Developed secure RESTful APIs with **Spring Boot, JWT, and Spring Security** strengthening authentication and improving service reliability by 25%.
- Built automated data pipelines with **Azure Functions, Blob Storage, and Data Factory**, reducing ML model deployment lead time by 30% and accelerating evaluation and validation cycles.
- Improved **ML model** accuracy by 20% and throughput by 30% through preprocessing and hyperparameter tuning; collaborated with the cloud team to prepare models for deployment on Azure Functions.
- Led a **3-member backend team**, standardizing design practices and accelerating delivery of 3 production modules in 12 weeks through structured Git/JIRA code reviews.

Software Engineer | Accenture | India

August 2019 – December 2021

- Spearheaded modular microservices with **Java, Spring Boot, and Spring Data**, reducing UI-to-backend response times by 30% across 12 live endpoints through Angular integration.
- Crafted **Angular modules** with RxJS observables and state management, improving frontend responsiveness and reducing load times by 30%.
- Designed and orchestrated serverless event-driven workflows using **AWS Lambda, Step Functions, and Amazon SQS/SNS**, boosting scalability and lowering infrastructure costs by 35%.
- Orchestrated real-time event pipelines with **Apache Kafka**, increasing system throughput by 30% during peak transactions.
- Accelerated release cycles by 30% by developing **automated integration test suites** with **SAHI**, eliminating repetitive manual QA work.
- Partnered with 5 cross-functional teams via JIRA/Confluence, clearing backlog items in Agile reviews and delivering 7 production modules on schedule.

Software Engineer Intern | Adani | India

February 2019 – July 2019

- Developed full-stack applications using the **MERN stack**, building responsive **CRUD-based modules** that streamlined clinical workflows by 40%.
- Integrated Kubernetes with **Prometheus and Grafana** for monitoring and alerting, cutting incident response time by 30%.

TECHNICAL SKILLS

- Languages & Scripting:** Java, Python, JavaScript, SQL
- Frontend Technologies:** React.js, Angular, Bootstrap
- Backend & API Development:** Spring Boot, Node.js, Express.js, Django, RESTful APIs, Redis, JWT, OAuth 2.0
- Database Technologies:** PostgreSQL, MySQL, MongoDB
- Cloud & DevOps:** AWS (EC2, Lambda, S3, API Gateway), Azure, Docker, Kubernetes, Terraform, Jenkins
- Data & ML Libraries:** Apache Kafka, Apache Spark, Scikit-learn, Pandas, LLMs
- Tools/Other:** Git, Cursor, Confluence, ServiceNow, Vite, Postman

EDUCATION

University of Texas at Arlington

Texas, USA

Master of Science in Computer Science

January 2022 – December 2023

PROJECTS

- E-Commerce Microservices Platform** (*Spring Boot, RabbitMQ, Spring Cloud*)
Architected a fault-tolerant microservices system with service discovery, circuit-breaking, distributed tracing, and API gateway, reducing downtime by 20% and cutting query latency by 25%.
- Movie Recommendation System** (*PySpark, Databricks, Delta Lake, Databricks SQL*)
Engineered a recommendation workflow on the MovieLens dataset using a Bronze-Silver-Gold Delta Lake pipeline, enhanced with LLM-based summarization (OpenAI API) to generate personalized movie insights.
