

RITHWIK RAJ MALLAM

Glassboro, NJ

(856) 803-8654 | rithwikrajmallam@gmail.com | <https://www.linkedin.com/in/rithwik-raj-m-2a4193191/>

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 4 years of experience designing and developing scalable web applications using .NET and React. Demonstrated expertise in building secure Web APIs and SPAs, while optimizing performance and responsiveness across enterprise solutions. Proficient in leveraging Azure services, containerization, and SQL/NoSQL databases to deliver high-quality, modern applications in Agile environments. Excels at integrating advanced security practices and continuously learning new technologies.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, Python, .NET Core 6/7/8, ASP.NET MVC, Blazor, React, Angular, Entity Framework
- **Front-End:** JavaScript, jQuery, Bootstrap, HTML5, CSS3
- **API & Integration:** REST APIs, WebAPI, AutoMapper, SignalR, OData
- **Databases:** SQL Server (MSSQL), MySQL, Azure SQL, PostgreSQL, T-SQL (Stored Procedures, Functions, Performance Tuning)
- **Cloud Platforms:** Microsoft Azure, AWS (Lambda, RDS, S3)
- **Testing:** NUnit, xUnit, Selenium, Playwright, SpecFlow/Reqnroll
- **DevOps & CI/CD:** Azure DevOps, Jenkins, GitHub Actions, Automated Build/Release Pipelines
- **Security & Infrastructure:** Containerization, Security Knowledge

PROFESSIONAL EXPERIENCE

Integra Technological Solutions

Dec 2024 - Present

Software Engineer (C#/.NET)

Remote

- Developed scalable ASP.NET Core 8 WebAPI services to support enterprise-level web applications, ensuring robust backend functionality.
- Integrated React and Blazor components to deliver responsive and dynamic SPA experiences.
- Implemented ESLint in AngularJS and React projects to maintain clean and maintainable code.
- Migrated legacy .NET Applications to modern .NET Core and .NET 6-8 frameworks to enhance performance and security.
- Optimized SQL Server performance by refining stored procedures and indexing, reducing report generation time by 40%.
- Created efficient SQL Server stored procedures, indexes, and queries to boost application performance.
- Established automated testing frameworks using NUnit, Selenium, and Playwright to ensure code reliability.
- Directed Azure migration initiatives by refactoring on-prem .NET and SQL applications for seamless deployment to Azure App Services and Azure SQL, supporting containerized solutions.
- Managed CI/CD pipelines and automated deployments with Azure DevOps and GitHub Actions to improve delivery cycles.
- Resolved performance bottlenecks, bugs, and security vulnerabilities, reinforcing application security and stability.
- Collaborated within Agile/Scrum teams to iteratively enhance web application features and security practices.

Microsoft Corporation

Oct 2022 - Dec 2024

Software Engineer (C#/.NET)

Remote

- Constructed and maintained RESTful WebAPI services with OAuth2/JWT authentication, ensuring secure data exchange.
- Enhanced legacy VB.NET and ASP.NET applications by refactoring business logic to improve performance and maintainability.
- Engineered responsive UIs using React and MVC integrated with SQL Server backends, aligning with SPA development best practices.
- Integrated APIs with Azure SQL and optimized queries to ensure scalable high-performance web applications.
- Developed full-stack applications leveraging .NET Core for backend and Angular/React for front-end interfaces, incorporating modern web development practices.
- Contributed to Azure-based migration projects by transferring SQL workloads and APIs to cloud environments including Azure App Service, Azure SQL, and Cosmos DB.
- Utilized WCF services, JavaScript, jQuery, LINQ, and XML/XSLT to implement diverse web application features.
- Designed, developed, and deployed secure web applications using ASP.NET MVC/Core and C#, emphasizing best practices in authentication and authorization.
- Integrated PostgreSQL databases with modern .NET applications to ensure robust data management and performance.
- Implemented unit tests and automated functional tests with SpecFlow/Reqnroll to validate application integrity.
- Deployed and monitored applications across Azure and AWS cloud environments to support containerized and scalable solutions.

Admiral Insurance

Oct 2021 - Oct 2022

Software Developer (C#/.NET)

Mt. Laurel, NJ

- Developed ASP.NET Core MVC applications with SQL Server backends, aligning with large-scale web application design principles.
- Constructed SOAP and REST services using WCF and ASP.NET Core to support both legacy integration and new API development, with an emphasis on secure data transmission.
- Engineered APIs to support reporting tools and analytics dashboards, ensuring efficient and secure data access.
- Built interactive and responsive UIs with React, JavaScript, TypeScript, and CSS3 to deliver engaging SPA experiences across devices.

- Applied Client-side MVC patterns for Angular modules to develop maintainable and modular front-end components.
- Enhanced overall application performance by optimizing SQL queries and database interactions.
- Automated deployment and maintenance tasks using PowerShell, contributing to reliable release cycles.
- Provided production support by troubleshooting and debugging issues, ensuring secure and stable application operations.

EDUCATION

Rowan University - Glassboro, NJ
Bachelor of Science, Computer Science

Aug 2018 - May 2022

CERTIFICATIONS

- **Microsoft Certified: Azure Developer Associate**
- In Progress: AWS Certified Developer
