

## Sakthivelmoorthy Mosur Pichandy

Email: [sakthivelmoorthy@gmail.com](mailto:sakthivelmoorthy@gmail.com)

Phone: 512 917 4182

### Summary

- Experience in Application production Support, Software Configuration Management (SCM), Build and Release Management, Change Management, Application Packaging and Deployment Engineering & Continuous build integration (CI/CD).
- AWS Certified Developer Associate.
- AWS Certified Solutions Architect Associate.
- AWS Certified Solutions Cloud Practitioner.
- Experience in deployments and troubleshooting on salesforce and MuleSoft components.
- Installed and manages nCino packages in Salesforce environments.
- Extensive experience in supporting production infrastructure in Windows and Linux platform.
- Extensive experience in troubleshooting production application using monitoring tools such as Splunk, Datadog, AppDynamics, and Dynatrace.
- Experience in managing cloud infrastructure (AWS and Google Cloud Platform).
- Involved in designing and deploying multiple applications using EC2, Route53, S3, Cloud watch, and RDS.

### Technical Skills

|                              |                                                                                                        |
|------------------------------|--------------------------------------------------------------------------------------------------------|
| <b>Agile/DevOps</b>          | JIRA, Confluence, Jenkins, Bamboo, Octopus deploy, SonarQube, Maven, Python, Shell scripts, PowerShell |
| <b>Cloud Engineering</b>     | AWS, GCP, Azure DevOps                                                                                 |
| <b>Infrastructure tools</b>  | Ansible, Terraform, Docker, Kubernetes.                                                                |
| <b>Version Control Tools</b> | Git Hub, Bitbucket, Gilligan, GitLab, ClearCase.                                                       |
| <b>CI/CD Tools</b>           | Jenkins, Bamboo, XLR Release                                                                           |
| <b>CRM Tools/Packages</b>    | Salesforce, MuleSoft and nCino                                                                         |
| <b>Monitoring tools</b>      | Splunk, CloudWatch, Datadog, Dynatrace                                                                 |

### Educational Qualification

| Degree                                   | Institute                              | Year |
|------------------------------------------|----------------------------------------|------|
| Master of Technology in Computer Science | Devi Ahilya University, Indore, India. | 2005 |
| Master of Science in Computer Science.   | University of Madras, India.           | 2000 |
| Bachelor of Science in Computer Science. | Madurai Kamaraj University, India.     | 1998 |

## **Assignments**

### **Bank Of America**

**Dec 2022 – Dec 2024**

**Role: DevOps Consultant.**

#### **Responsibilities**

- Create and maintain the salesforce build sand boxes for developers.
- Performed salesforce and Mule deployments.
- Troubleshooting Salesforce and mule deployment issues.
- Install and manage nCino packages to Salesforce environments.
- Monitor the deployment status on salesforce environments.
- Setup XLR pipelines with integration with Ansible tower for deployments to all environments.
- Create and maintain build and deployment pipelines in Jenkins.

### **TxDMV**

**Dec 2020 – Nov 2022**

**Role: DevOps Consultant.**

#### **Responsibilities**

- Develop and implement Configuration and Build/Release procedures and processes.
- Develop the build and deployment scripts for all the applications which integrated with DMV of Texas.
- Configuring various environments for different applications.
- Troubleshooting the build and deployment issues.

### **Pearson Inc.,**

**Role: Sr Site Reliability Engineer**

**Jan 2019 to Dec 2020**

#### **Responsibilities**

- Monitored and reported on service level objectives for a given applications service. Worked with business and product owners to establish key performance indicators.
- Participate in conducting technical training events, game day scenarios, and focused engineering spikes.
- Setup Grafana and posted deployment annotations from Jenkins.
- Setup Prometheus to pull metrics from Jenkins and parse into Grafana.
- Created and maintained monitoring technologies and processes that improve the visibility to our applications' performance and business metrics and keep operational workload reasonable.

### **Volusion Inc.,**

**Manager, DevOps**

**Aug 2015 – Dec 2018**

**Sr. Release Engineer**

**Aug 2014 – Aug 2015**

#### **Responsibilities**

- Identified process improvements and implemented automation to reduce system downtime.
- Migrated 30K online stores to Google cloud platform from datacenter.
- SME in troubleshooting infrastructure and application issues on various platforms.
- Setup and manage the cloud infrastructure.

## **Blue Cross-and Blue Shield, TX**

**Build Master - Dec 2011 – July 2014**

### **Responsibilities**

- Develop the build and deployment scripts for all the applications, which integrated with Blue Cross and Blue shield of Texas.
- Design the framework for build and deployment.
- Define and update the process for build and deployment.
- Automating the build and deployment process using maven and Ant scripts.
- Build and deployments into testing and production environments.

## **Tata Consultancy Services Ltd.**

### **Clients:**

**The Home Depot**

**Feb-2010 to Dec-2011**

**The ACNielsen Company**

**Jun-2008 to Jan-2010**

**British Telecomm**

**Feb-2005 to May-2008**

### **Key Responsibilities**

- Develop and implement Configuration and Build/Release procedures and processes.
- Source code Version control administration (Streams, branching, merging, base lining)
- Involved in WCS 5.6 to WCS 7.0 Migration for homedepot.com.
- Automating the build and deployment process using maven and Ant scripts.
- Setup new environments and manage the existing environments.
- Setup monitoring for non-prod and prod environments.
