

Joseph Valdez

Whittier, CA 90602 • (803) 657-8152 • jose.raf.vald@gmail.com • linkedin.com/in/joseph-valdez-231333354

Skills

Java • Spring Boot • TypeScript • JavaScript • Spring Boot • React • AWS (Lambda, EC2, S3, RDS) • Kubernetes • Terraform • Datadog • Docker • Jenkins • GitHub Actions • PostgreSQL • DynamoDB • MySQL • Planetscale • Redis • MongoDB • Apache Kafka • RabbitMQ • AWS Kinesis • JUnit • Playwright • SonarQube • Grafana • Prometheus • TensorFlow • PyTorch • Hugging Face • Pandas • Metaflow

Experience

09/2023 – PRESENT

Senior FullStack Java Developer | Accenture

- Led full-stack development of a large-scale order management system, managing order and stock transactions.
- Migrated a monolithic system to a microservices architecture using domain-driven design (DDD) and hexagonal architecture.
- Developed and enhanced synchronous (HTTP) and asynchronous (RabbitMQ) communication mechanisms across subsystems.
- Secured the platform using Spring Security with OAuth 2 and JWT authentication.
- Optimized AWS infrastructure by leveraging EC2, S3, and Terraform for cost-efficient deployments.
- Implemented CI/CD pipelines using Jenkins, reducing release cycles and improving deployment stability.

06/2020 – 08/2023

Senior FullStack Developer | Mangomint

- Designed and built a rules engine using Java and Elasticsearch to manage complex policies.
- Integrated cloud services, Kubernetes, and CI/CD for automated deployments.
- Developed a highly scalable event-driven architecture using Apache Kafka for asynchronous processing.
- Implemented Spring Boot microservices with REST APIs documented via OpenAPI and Swagger.

01/2018 – 05/2020

Software Engineer II | Meta

- Designed and built a rules engine using Java and Elasticsearch to manage complex policies.
- Integrated cloud services, Kubernetes, and CI/CD for automated deployments.
- Developed a highly scalable event-driven architecture using Apache Kafka for asynchronous processing.
- Implemented Spring Boot microservices with REST APIs documented via OpenAPI and Swagger.

09/2014 – 12/2017

Software Engineer I | Oracle

- Led development of an investment platform for structured products using Angular, Java.
- Migrated the front-end to a modern framework with reusable component libraries.

- Automated release testing using CI/CD pipelines, cutting regression test times by 50%.

Education

MAY 2014

Bachelor's Degree in Computer Science | Purdue university

3.8 GPA • Member of university's Honor Society
