

SUMEDH JITENDRA BADNORE

Software Engineer | Full Stack | React • Node.js • TypeScript • AWS • Microservices • SQL/NoSQL • REST APIs

New York (Open to relocation) • (201) 526-5735 • sumedhbadnore2801@gmail.com • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

SUMMARY

Software Engineer with 3+ years of experience developing scalable web and cloud-native systems using React, Node.js, and AWS. Skilled in crafting accessible UIs, microservices, and RESTful APIs that reduce latency by 30% and improve uptime by 25%. Proficient across front-end, back-end, and DevOps layers with expertise in CI/CD automation, testing frameworks, and Agile collaboration. Proven success cutting deployment failures by 40% and boosting user adoption by 35% through optimized, maintainable solutions.

EXPERIENCE

CuraJOY | New York, USA

Software Engineer (Full Stack)

Jan 2025 - Present

- Built and deployed responsive React and Node.js microservices on AWS Amplify, scaling throughput by 35% for 3,000+ users.
- Optimized SQL queries and Redis caching, reducing latency by 30% and improving global API reliability and consistency.
- Designed interactive UI modules with Tailwind and React Query, improving engagement and visual performance by 25%.
- Automated CI/CD workflows using GitHub Actions, reducing deployment issues by 40% and accelerating releases by 25%.
- Performed accessibility audits (WCAG 2.1), reducing compliance gaps by 40% and improving mobile user adoption by 20%.

Accenture | Mumbai, India

Software Engineer Intern

Aug 2022 - Dec 2022

- Developed backend microservices in Java with SQL and Redis, improving uptime by 20% and handling 50K+ daily requests.
- Automated system monitoring with Python and Linux CRON, cutting manual tasks by 40% and improving SLA compliance.
- Built structured logging pipelines, reducing error triage time by 30% across production environments.
- Collaborated on microservice refactoring, optimizing data exchange and reducing API sync errors by 25%.

Vidyalankar Institute of Technology | Mumbai, India

Software Engineering Intern

May 2022 – Jul 2022

- Built real-time dashboards using JavaScript, Firebase, and Chart.js improving data visibility for 1,000+ active users.
- Designed modular UI components with responsive layouts, reducing bug reports by 20% and improving retention by 30%.
- Implemented MVC design and optimized query caching, reducing response time from 3.2s to 1.8s across endpoints.

EDUCATION

Stevens Institute of Technology, Hoboken, New Jersey

May 2025

Master of Science in Computer Science | GPA: 3.7/4.0

Relevant Coursework: Data Structures & Algorithms, Web Programming, Software Development, DBMS, Machine Learning

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C++, C#, R
- **Frontend:** React, Next.js, Angular, Redux, React Query, Material UI, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Express.js, .NET, REST APIs, GraphQL, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Firebase, SQL/NoSQL
- **Cloud & Devops:** AWS (EC2, S3, Lambda, Amplify), Docker, Kubernetes, Jenkins, GitHub Actions
- **Testing & QA:** Jest, JUnit, Mockito, Unit Testing, Integration Testing, Regression Testing, Accessibility (WCAG/508)
- **Tools & Practices:** Agile Scrum, CI/CD, Git, JIRA, Confluence, Secure Coding, Linux CLI

PROJECTS

[Shortsy](#) – URL Shortener Platform | TypeScript, Node.js, Redis, Express.js, REST APIs, CI/CD, Docker, AWS

- Engineered Redis-backed shortener with QR support, cutting redirect latency to 48ms p95 for 2,000+ active links.
- Added collision-free slug generation and TTL logic, improving reliability and reducing error reports by 70%.
- Implemented validation and CI pipelines achieving 99.9% uptime with zero-downtime releases.
- Managed environment configs for dev/preview/prod ensuring scalability and minimizing configuration drift by 50%.

[VisionSense](#) – Full Stack Facial Recognition App | React, Node.js, REST APIs, CI/CD

- Built full-stack app enabling 90% detection accuracy and adoption by 500+ monthly users.
- Integrated Redux and Bootstrap with secure authentication, cutting API response times by 40%.
- Deployed with CI/CD on Vercel, ensuring 99% uptime and reducing regression defects by 25%.
- Achieved 95% unit test coverage using Jest and React Testing Library to raise production reliability.

[CacheBench](#) – Cache Policy Simulator | Next.js, TypeScript, Recharts, Serverless APIs

- Built Next.js + TypeScript app simulating cache algorithms with 98% accuracy and O(1) lookup benchmarking speed.
- Created visualization UI using Recharts with CSV exports reducing analysis time by 60% across benchmarking tasks.
- Integrated serverless APIs with warmup logic ensuring consistent runtime and stability across test iterations.
- Applied SSR-safe imports and error handling scripts reducing runtime issues by 30% in production deployments.
