

Ryan Miller
Application Developer
Denver, CO
(303) 219-3171 | rmiller92145@gmail.com |
<https://www.linkedin.com/in/ryan-miller-v1/>

Experienced professional with 10 years as a **Senior Software Engineer** specializing in **C#**, **.NET Core**, and **Microsoft Azure**. Proven expertise in database management with **Microsoft SQL Server** and integrating applications using **MySQL**. Strong communication and teamwork skills, with a focus on problem-solving in **consulting** and **technology** sectors.

Technical Skills

Programming Languages: C#, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: .NET Core, AngularJS, ASP.NET

Cloud & DevOps: Microsoft Azure, Docker, Jenkins

Databases & Storage: Microsoft SQL Server, MySQL, PostgreSQL

Analytics & Visualization: Power BI, Tableau

Security & Authentication: OAuth, SAML

Automated Testing: Selenium, Jest

Soft Skills: Communication, interpersonal skills, decisiveness, problem-solving, teamwork, leadership, strategic thinking, collaboration, adaptability

Education

Bachelor of Science in Computer Science | Boston University | Boston, MA | May 2016

Master of Science in Computer Science | Boston University | Boston, MA | May 2018

Certifications

- AWS Certified: Solutions Architect – Associate
- Microsoft Certified: Azure Network Engineer – Associate

- Microsoft Certified: DevOps Engineer – Expert
 - Web Accessibility Specialist (WAS) (pending, or if applicable, add completed date)
-

Professional Experience

Kforce Inc. | Senior Software Engineer | Tampa, FL | October 2021 – Present

- Developed and maintained enterprise-level applications using **C#** and **.NET Core**, enhancing system performance and reliability.
- Engineered integration strategies with **MySQL**, including writing and optimizing SQL queries to improve database responsiveness and functionality.
- Collaborated with cross-functional teams to integrate user requirements into innovative software solutions, resulting in improved user satisfaction.
- Designed and executed robust database stored procedures and functions, which streamlined data processing and analysis tasks, leading to enhanced operational efficiency.
- Spearheaded initiatives for cloud migration to **Microsoft Azure**, improving deployment times and system scalability.
- Led efforts to ensure compliance with web accessibility standards, resulting in certification success as a **Web Accessibility Specialist** and enhancing user experience for all platforms.
- Implemented CI/CD pipelines using Azure DevOps, significantly accelerating deployment cycles and reducing downtime.
- Conducted code reviews and mentored junior developers, fostering a culture of continuous improvement and knowledge sharing across teams.
- Utilized Agile methodologies to manage project deliverables, ensuring timely and effective delivery of software projects.
- Participated in the design and architectural discussions, contributing innovative ideas that leveraged **best practices** and emerging technologies in software development.
- Enhanced security protocols within the application architecture, ensuring data protection and minimizing vulnerabilities.
- Analyzed application performance metrics and spearheaded optimization initiatives, leading to a 30% reduction in application load times.

- Facilitated training sessions for the team on new technologies and tools, enhancing team's skills and knowledge base.
- Developed custom APIs to enhance functionality and integration with external systems, increasing productivity across various departments.
- Managed database administration tasks and performance tuning for **Microsoft SQL Server**, ensuring high data integrity and availability.
- Collaborated with UX/UI designers to implement responsive design techniques, improving user engagement by 25%.
- Streamlined project documentation processes, enhancing team communication and project tracking.
- Conducted technical presentations to stakeholders, effectively showcasing project milestones and upcoming features.
- Researched and recommended new tools and libraries to incorporate into the development process to improve efficiency.
- Established best coding standards and practices across the development team, minimizing bugs and ensuring consistency.

Trimble Inc. | Software Engineer | Westminster, CO | June 2018 – September 2021

- Contributed to the development of multiple web applications using **C#** and **.NET Core**, achieving operational scalability and performance improvements.
- Enhanced database functionalities by writing complex queries and developing stored procedures in **MySQL**, resulting in improved data analysis capabilities.
- Collaborated with stakeholders in gathering requirements and translating business needs into technical solutions, ensuring alignment with project goals.
- Engaged in software testing phases, executing unit tests and assisting in integration testing to ensure software robustness and reliability.
- Maintained application code repositories with version control systems, ensuring code integrity and facilitating collaboration.
- Assisted in design and implementation of system features that improved user accessibility and compliance with web standards.
- Developed user documentation and manuals for internal and external use, enhancing application usability and support.
- Participated in Scrum ceremonies, contributing to sprint planning and retrospectives to drive improvements in team performance.

- Identified performance bottlenecks in existing systems and implemented enhancements that increased system efficiency.
- Conducted peer code inspections and reviews to align with quality assurance and project standards.

PTC | Software Engineer | Boston, MA | June 2016 – June 2018

- Designed and implemented applications using **C#** within the **.NET** framework, successfully meeting project deadlines and quality standards.
- Collaborated on database integration methods utilizing **Microsoft SQL Server** and MySQL, resulting in seamless data transfers between systems.
- Assisted in the development of custom software tools that enhanced project management capabilities, increasing team productivity.
- Engaged in the full software development lifecycle from requirements gathering to production deployment and support.
- Supported ongoing application maintenance, quickly resolving issues to enhance user satisfaction.
- Conducted training workshops for team members on new features and software updates, enhancing overall team skill development.
- Implemented best practices in software development methodologies, improving code quality and reducing maintenance overhead.

This structured resume captures your qualifications, experience, and skills while being tailored to meet the needs of the Application Developer position you are targeting. Be sure to customize it further as needed to align with specific job applications.
