Summary

Data Engineer with 6+ years of expertise in scalable pipelines, workflow automation, data modeling and cloud infrastructure. Delivered \$1.2M+ in yearly revenue through compliance frameworks, optimized data processing by 70%, and reduced manual workloads by 100% while enhancing data quality and operational reliability.

Experience

Autodesk

Boulder, CO

Data Engineer

May 2022 - Current

- Designed a high-throughput pipeline ingesting **10M+ events/day** via Kinesis, processing with Spark Streaming, and orchestrating ETL in Airflow, reducing detection time by **70%**.
- Automated serial number processing with PySpark/React, cutting execution time by **24%** and improving accuracy
- Uncovered **\$500K+ revenue yearly** via entitlement-compliance framework, enhancing stakeholder visibility by **40%**
- Mapped hierarchical account structures (Salesforce SOQL), identifying **\$700K+ hidden revenue yearly** and boosting lead generation by **25%**
- Automated regression testing (Presto/Trino) with direct Jira/GitHub integration and Jenkins-based CI/CD deployment in an Agile environment., eliminating **100% of manual validation** and accelerating testing by **60%**.
- Built a Power BI dashboard with Hive and Snowflake integration for real-time insights, automating report distribution via AWS SNS and Python, **eliminating 100% of manual reporting**.
- Architected an event-driven workflow using EventBridge, SQS, and SNS to trigger Airflow pipelines via Lambda, automating EMR/EKS jobs with CloudFormation reducing pipeline trigger latency by **85%**.
- Collaborated across teams to develop a Neo4J graph database in a hackathon, integrating PostgreSQL via JDBC to map account relationships, enhancing visibility by **60%** and eliminating **100%** of manual Salesforce mapping.

University of Colorado Boulder

Boulder, CO

Data Analyst (Part-Time)

Feb 2022 - Dec 2022

- Developed Tableau dashboards for student key performance indicators(KPIs), improving survey response analysis efficiency by **35%**

Vodafone Intelligent Solutions

Pune, India

Data Engineer

Jun 2018 - Aug 2021

- Built a PySpark application to backfill missing data from Splunk to Hive, automating recovery and user alerts via UNIX sendmail for seamless monitoring.
- Estimated the real-time message counts with **100% precision** in Kafka and displayed topic wise time-based statistics in Splunk Dashboard.
- Developed a Python script to diagnose resource usage for long-running jobs via REST API and SQL metadata, increasing cluster availability by **30%**.
- Administered application servers handling incoming traffic and transformed real time data using Logstash and Filebeat with **0% loss of the data**.

Education

University of Colorado Boulder

Dec 2022

Master of Science (M.S) in Data Science

GPA: 3.74/4

Vellore Institute of Technology

May 2018

Bachelor of Technology (B.Tech) in Computer Science

GPA: 8.18/10

Technical Skills

Programming & Version control: Python, R, SQL, NoSQL, SOQL, Bash/Shell scripting, Git/Github

Data Warehousing and Modeling: AWS Redshift, Snowflake, Apache Hive, Hadoop, Trino, PostgreSQL, Presto, Qubole, AWS Athena, AWS RDS, MySQL, Neo4J

Data Transformation and Data Analytics: Apache Spark, Spark Streaming, Tableau, Power BI, AWS QuickSight, Microsoft Excel, Excel VBA, Powerpoint, Neo4J, Salesforce, JSON, OLAP, OLTP, Parquet

DataOps and Monitoring: Astro Airflow, AWS CloudFormation, AWS EMR, AWS EKS, AWS S3, AWS EventBridge, AWS Glue, AWS SNS, Apache Kafka, Apache Flink, YARN, Jenkins, Logstash, Filebeat, Streamsets, Splunk, AWS CloudWatch, AWS SQS, AWS Lambda, Kubernetes, Docker, Datadog
