ABOUT ME

Highly motivated and results-oriented Senior Business Analyst with a proven track record of success. I possess extensive experience in leading Agile transformations, managing product lifecycles, and translating complex business needs into effective software solutions. Proficient in stakeholder management, cross-functional team leadership, and data analysis. Experienced working on HIPAA implementation guides relate to Claim Testing and Medical Billing. Experienced in methodologies like Agile, Waterfall Model and Data Modeling. Excellent communication skills in both English and Urdu/Hindi.

WORK EXPERIENCE

Senior Business Analyst [08/2023 – Present]

Travis County Juvenile Department City: TX |

Country: United States

- Led Agile transformation initiatives using Scrum and Kanban frameworks across multiple organizations.
- Owned product lifecycle from ideation to delivery; created roadmaps, defined epics, and wrote user stories.
- Facilitated Agile ceremonies: sprint planning, daily stand-ups, retrospectives, and stakeholder demos.
- Collaborated with cross-functional teams to deliver scalable, user-centric software solutions.
- Spearheaded implementation of enterprise tools like OnBase, Intune, SCCM, and ServiceNow.
- Managed data migration strategies and system integrations for healthcare and government platforms.
- Translated complex business needs into functional specs, wireframes, and data mappings.
- Ensured compliance with HIPAA, CMS, and other regulatory standards.
- Acted as liaison between stakeholders, development, and QA teams to ensure release quality.
- Handled EDI transactions (834, 837, 835) and validated healthcare claims and enrollment processes.

Mayo Clinic

Principal Technical Business System Analyst [08/2021 – 04/2023]

- Leading requirement gathering for the application.
- Introduce agile / scrum to Mayo's existing methodological framework.
- Introduced and trained on current trends and best practices in Agile Scrum/Kanban framework.
- Structuring rituals / meetings / events in the sprint cycle.
- Implement Scrum principles / methodology from ground up to transform the organization into an agile development environment.
- Developing product road map.
- Creating stories, features and epics in ADO.
- Detailed analysis for requirement to determine the overall vision and scope of the project and its necessities.
- Develop the backlog from ground up. Create epics/features enlisting all business needs and grouping user stories accordingly.

Sr. Business Analyst

State of Alabama Medicaid (CARES Project) [03/2018 – 08/2021]

Managed team developing the CARES eligibility & enrollment platform, replacing legacy AMAES system.

Coordinated large-scale data migration and integration with ServiceNow. Submitted compliance documentation for CMS, IV&V, ORR, and IAPDU audits.

Designed feature delivery workflows aligned to MITA standards.

Senior Business Systems Analyst

Cook Children's Health Care System [10/2016 – 03/2018]

City: TX

Led requirements for claims processing using Facets; implemented EDI transaction workflows (834, 837, 835, 270/271).

Managed cross-functional analysis for enrollment, provider network, and reporting systems.

Validated eligibility and adjudication modules for Medicaid and CHIP members.

Project Coordinator

Microsoft Corporation [09/2015 – 10/2016]

City: TX

Managed deployment of MDM/ITSM solutions using Intune, Azure, and SCCM.

Created BRDs, technical specifications, and supported system integration testing.

Coordinated ticket management and change control workflows.

PROJECTS

JuvPro Case Management System

JuvPro is the latest case management system that Travis County is creating. It consumes the legacy Caseworker 5 and enhances functionality. This case management system serves all staff members of the TCJPD including judges, parole officers, doctors etc. I was brought in to lead the existing business analysis team and introduce agile practices to the TCJPD IT team.

OnBase Document Management Implementation

OnBase is a document management system that will serve the TCJPD staff for all their documentation needs. Along with standard DMS functionality, this tool also caters to department specific needs of Role based access control and data loss prevention. I lead the project implementation.

I also advised on ServiceNow implementation.

The IT team at TCJPD is a well-knit small group of highly technical, multitalented individuals who cater to basic support for the department to developing new tools for the department needs.

Bid Tool Web Modernization

Bid tool application is Mayo's primary source for bidding on group bids for tests in laboratories, hospitals, clinics, and healthcare institutions. The desktop application has been in a consistently updated and enhanced up until 2019.

After

COVID-19 Mayo resumed enhancement of the Bid tool application in September 2021. The application is now being transformed into a web-based solution which will embrace other business avenues for Mayo as well. I am the first hire after COVID to recommence this project.

CARES Eligibility & Enrollment Platform

CARES is a multi-portal eligibility and enrollment platform for State of Alabama Medicaid & CHIP (ALLKIDS). It succeeds its predecessor AMAES, which is a mainframe system. The scope of the project is to migrate member data, programs, interfaces and portals from AMAES to CARES as well as maintain an active enrollment system for the population of Alabama.

Facets EDI Claims Automation

Health plan provides health care for CHIP and STAR (Medicaid) members in the Tarrant service area. The counties include Tarrant, Johnson, Denton, Parker, Hood, and Wise. Cook Children's Health Plan offers quality health care plans that you can afford for the whole family. The CHIP and STAR programs allow you to choose from many doctors, clinics, hospitals, and specialty services.

MDM & ITSM Deployment

The project was scoped to facilitate Microsoft's cloud-based software solutions and tools deployment for client organizations, management of their enrolled devices. This was an ITSM/ITIL project. Troubleshooting, maintaining

FAQ

and resolution for ticket libraries was added to the scope later in the project making it an ongoing venture.
