

EngincanAkgul

Senior SRE/DevOps Engineer

📍 Fair Lawn, NJ 📞 (201)566-3189 ✉️ engincan.akgul2@gmail.com

Professional Summary

I am a highly skilled and results-driven IT professional with extensive experience in Site Reliability Engineering (SRE), DevOps, and IT operations. Over the course of my career, I have contributed significantly to the optimization of service delivery, system reliability, and process automation across various organizations, with a primary focus on the telecommunications and financial technology sectors.

With a strong foundation in managing critical infrastructure and building scalable, high-availability systems, I have gained expertise in working with a range of technologies, including OpenShift, Jenkins, Kafka, Spring Boot, and PL/SQL. I specialize in managing complex billing systems, electronic money payment services, and ensuring seamless service continuity. My technical skills are complemented by a deep understanding of monitoring tools such as AppDynamics and Kibana, which I have used extensively to proactively monitor system health and performance.

Throughout my career, I have been responsible for developing and automating CI/CD pipelines to ensure reliable and efficient software deployments. I have led the optimization of system processes, including load balancing, fault tolerance, and disaster recovery, ensuring maximum uptime and high performance. My experience in microservices architecture, along with database management using NoSQL and Oracle, has allowed me to contribute to the successful delivery of large-scale projects.

As a Senior SRE/DevOps Engineer, I have demonstrated my ability to collaborate with cross-functional teams, drive operational improvements, and implement innovative solutions to enhance service delivery. My ability to integrate systems, automate complex workflows, and troubleshoot critical issues has been key to delivering measurable outcomes and ensuring operational excellence. I am passionate about leveraging my skills in system administration, cloud technologies, and software automation to drive continuous improvements and deliver value to the teams and organizations I work with.

Skills

Programming Languages:

- Java
- PL/SQL
- SQL

DevOps & SRE Tools:

- Jenkins
- GitHub Actions
- OpenShift
- Kafka
- Spring Boot
- AppDynamics
- Kibana / ELK Stack

Automation & CI/CD:

- CI/CD Pipeline Management
- Git
- Jenkins
- Postman (Test Automation)
- SoapUI
- GitHub Actions

Databases:

- Oracle
- NoSQL (Elastic, MongoDB, etc.)
- Oracle Data Integrator

System Administration & Monitoring:

- Unix/Linux
- System Infrastructure Management
- Service Monitoring (AppDynamics, Kibana)
- Load Balancing and Fault Tolerance
- Disaster Recovery Solutions

Billing & Payments Systems:

- Billing Systems
- Electronic Money Payment Services
- Billing Integration & Service Continuity

Cloud & Virtualization:

- Kafka Message Queues
- Microservices Architecture
- Infrastructure Automation
- High Availability & Fault Tolerance

Education

Associate Degree in Electronics and Communication Technology

Marmara University, Istanbul, Turkey

2016 –2019

Experiences

Vodafone - Electronic Money Payment Services

November 2021 - February 2025

Senior SRE/DevOps Engineer

Responsibilities

- Managed billing integrations for contracted products, ensuring seamless service continuity
- Utilized Kibana and ELK Stack for log analysis and troubleshooting system issues
- Administered OpenShift infrastructure to ensure 24/7 availability
- Lead operational improvements to support new projects and initiatives
- Managed CI/CD pipeline automation, ensuring faster and reliable deployments
- Optimized load balancer configurations to ensure high availability and fault tolerance
- Developed microservices using Spring Boot for efficient service deployment
- Monitored applications using AppDynamics to ensure system health and performance
- Managed both public and internal service certificates
- Administered NoSQL (Elastic) databases and ensured their performance
- Maintained and optimized Kafka message queues for high-throughput systems
- Ensuring disaster recovery by deploying and configuring applications in a different geographical infrastructure
- Collaborated with a vendor on developing a new product and managed the project to ensure its successful deployment in alignment with company policies and technology standards

Vodafone

March 2021 - November 2021

Senior Site Reliability Engineer

Responsibilities

- Developed and monitored billing dashboards for accurate and timely billing cycles
- Automated workflows within the ZTO project to streamline operational team activities
- Conducted health checks for microservices deployed on OpenShift
- Managed AppDynamics monitoring for OCP services to ensure uptime and availability

Vodafone

January 2020 - March 2021

Site Reliability Engineer

Responsibilities

- Managed billing server infrastructure, ensuring high availability and service continuity
- Oversaw deployment processes for billing systems and infrastructure automation
- Managed 24/7 system alarms and proactively addressed potential system failures
- Collaborated with cross-functional teams (Unix/Windows/DBA) to execute domain-specific activities
- Supported seamless interactions between external systems and internal environments
- Utilized Jenkins and Git to automate OpenShift deployments
- Implemented test automation for microservices using Postman collections

Vodafone (Via Wipro)

April 2019 - January 2020

Release & Test Environment Management Specialist

Responsibilities

- Prepared environments and developed release management strategies for DWH reengineering projects
- Managed server infrastructure, including maintenance and backup processes
- Troubleshoot software issues and supported defect tracking throughout the lifecycle
- Worked closely with development and test teams from Vodafone, IBM, and Vitelco

Vodafone

March 2018 - March 2019

Long Term Intern / Apprenticeship

Responsibilities

- Assisted with environmental issues, release deployments, and system alignment within the billing and CRM domain
