

Jashwanth Reddy K

Data Analyst

TX | jashwanthreddyk25@gmail.com | 682-250-0369 | [LinkedIn](#)

SUMMARY

- Data Analyst with 4 years of experience in analyzing and transforming large datasets, building predictive models, and automating data pipelines using Python, R, SQL, and PySpark.
- Expertise in ETL processes, working with tools like Azure Data Factory, Apache NiFi, and AWS Glue, and using Apache Spark for real-time analytics to optimize business performance.
- Proficient in business intelligence tools such as Power BI, Tableau, and Google BigQuery, delivering actionable insights and developing data visualizations for cross-functional teams.
- Strong background in machine learning with a focus on predictive modeling, data mining, and statistical analysis using Scikit-Learn, Keras, and TensorFlow to drive strategic business decisions.

PROFESSIONAL EXPERIENCE

Data Analyst

Blue Cross Blue Shield

TX

Jan 2025 – Current

- Led a healthcare analytics initiative to enhance data-driven decision-making, improving operational efficiency and patient care insights by integrating real-time reporting across multiple healthcare services.
- Designed and optimized ETL pipelines using Python and SQL, reducing data processing time by 5 hours daily while ensuring seamless integration of claims, provider, and patient records for accurate reporting and compliance.
- Developed 15+ interactive Tableau dashboards, providing real-time insights into claims processing, patient demographics, and risk stratification, supporting executives in managing \$1.5B in annual claims and reimbursements.
- Enhanced data querying efficiency in AWS Redshift, reducing retrieval times by 3x and cutting query costs by 40%, enabling faster analytics for predictive healthcare trends and regulatory reporting.

Data Analyst

Uber

TX

Mar 2024 – Jan 2025

- Developed a real-time ride analytics system, leveraging PySpark and R to identify anomalies in ride transactions, driver behaviors, and surge pricing, reducing fraud detection time from hours to minutes.
- Built and optimized Azure Data Factory pipelines, automating ETL workflows for trip data, driver ratings, and payment processing, cutting manual intervention by 4 hours daily and enhancing cross-department data sharing.
- Designed 10+ Power BI reports for operational insights, enabling real-time tracking of ride cancellations, driver earnings, and passenger demand, reducing reporting time from 2 days to 6 hours.
- Integrated Apache Spark for real-time transaction monitoring, processing 15,000+ daily rides to detect potential overcharges, unauthorized refunds, and suspicious fare adjustments, improving compliance and security.
- Collaborated with the compliance team to automate audit logs in ServiceNow, ensuring 100% regulatory adherence for financial transactions and reducing manual reporting efforts by 3 hours per week.
- Created predictive R-based customer segmentation models, analyzing rider preferences, trip frequency, and spending behavior, leading to a 15% improvement in targeted marketing campaigns and ride promotions.

Data Analyst

Airbnb

India

Sep 2020 – Dec 2021

- Developed a guest behavior analysis model using Python and SQL, optimizing dynamic pricing for 5,000+ listings, resulting in a 12% increase in booking revenue.
- Automated data ingestion pipelines with Apache NiFi and AWS Glue, cutting data processing times from 6 hours to 45 minutes.
- Integrated Google BigQuery with Tableau, enabling the marketing team to analyze customer preferences and booking trends, improving report generation speed by 3x.
- Refined Databricks queries to improve real-time data readiness, reducing query execution time and improving system responsiveness for 500+ real-time users.
- Designed SQL-based KPI tracking dashboards, helping Airbnb's operations team reduce customer refund requests through proactive decision-making.
- Collaborated with cross-functional teams using GitHub for version control, ensuring smooth workflows and reducing errors by 30%.

Data Analyst Intern

Adani

India

Mar 2020 – Aug 2020

- Built a predictive analytics dashboard using Power BI and MySQL, helping stakeholders optimize logistics, reducing supply chain delays by 15%.
- Designed Python-based web scrapers, collecting data from competitor shipment reports and enhancing forecasting accuracy for future shipments.

- Used R for statistical modeling, analyzing port activities and improving freight allocation efficiency, which resulted in faster delivery times.
- Automated Excel-based reporting systems, cutting manual data entry errors by 20% across tracking logs.
- Developed Google Analytics reports to visualize customer engagement metrics, boosting website traffic.
- Scheduled Cron Jobs for automated data extraction, reducing manual effort by 25 hours per month and ensuring real-time insights for the supply chain team.

Business Analyst Associate

Trinity Technolabs

India

Nov 2018 – Feb 2020

- Led business process analysis across departments, identifying inefficiencies and implementing 6 optimized workflows, reducing project turnaround time by 15 hours per week.
- Gathered and documented requirements for 10+ business initiatives, collaborating with cross-functional teams to streamline operations and enhance system functionalities.
- Designed 8+ Tableau dashboards for sales and operations teams, automating manual reporting and reducing data retrieval time from 4 hours to 30 minutes per report.
- Facilitated UAT (User Acceptance Testing) for enterprise applications, working with developers and end-users to resolve 20+ critical issues before deployment.
- Assisted in change management and process automation, training 50+ employees on new workflows and system implementations, ensuring seamless adoption across teams.

EDUCATION

Master in Information Technology & Management

Webster University

USA

Jan 2022 - Dec 2023

MBA in Finance & Business Analytics

Amity University

India

Jul 2019 – May 2021

Bachelor of Commerce

Roots International School of Business Management

India

Jul 2015 - June 2018

TECHNICAL SKILLS

- **Programming & Scripting** Python, R, SQL, PySpark, NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, Plotly, ggplot2
- **Databases & Data Warehousing** MySQL, PostgreSQL, Microsoft SQL Server, MongoDB, Cassandra, Snowflake, Redshift, DB2
- **Data Engineering & ETL** Apache Airflow, Apache NiFi, Azure Data Factory, Databricks, SSIS, SSAS, SSRS, Google BigQuery
- **Big Data Technologies** Apache Spark, Hadoop, Azure Data Lake, AWS Redshift, GCP Dataflow, AWS S3, AWS Glue
- **Business Intelligence & Visualization** Power BI, Tableau, ArcGIS, Google Analytics, Microsoft Excel, Looker
- **Machine Learning & AI** Predictive Modeling, Data Mining, Regression, Classification, Clustering, Keras, TensorFlow
- **Data Processing & Automation** Data Cleaning, Data Transformation, Feature Engineering, Web Scraping, Cron Jobs
- **DevOps & Cloud Computing** AWS (RDS, EC2, S3, Redshift), GCP (BigQuery, Dataflow, Pub/Sub, Dataproc), Azure (Data Factory, Functions)
- **Version Control & Collaboration** Git, GitHub, Bitbucket, Jira, Confluence, ServiceNow
- **Statistical & Analytical Methods** Statistical Modeling, Exploratory Data Analysis (EDA), A/B Testing, Hypothesis Testing

CERTIFICATION

- AWS Certified Developer – Associate ([Link](#))
