

Name: Mahnoor Syeda

Email id: syedamah708@gmail.com

Professional Summary:

- ✦ Around 8 years of Experience as Business Analyst in Healthcare include understanding of Business Requirement Gathering, Business Analysis, Evaluating Data Sources, Data Mapping, Translating Requirements into Specifications, Application Design.
- ✦ Experience in analyzing, developing, assessing, and presenting project designs.
- ✦ Involved in evaluating existing application products which could address client requirements and develops recommendations where appropriate.
- ✦ Knowledge on Medicare, Medicaid, MMIS, HIPAA EDI transactions 278, 820, 834, 835, 837, HL7, HMO, PPO, ANSI X12 Procedural and Diagnosis codes.
- ✦ Used Microsoft SharePoint as a Web-based Content Management System as well as a Document/ Project Management tool.
- ✦ Working in Agile Development and test model since last 3 Years. Applied Agile Test Practices SCRUM, Scripted Test Cases for Test Driven Development TDD.
- ✦ To obtain an AGILE Coach, AGILE Trainer, Scrum Master, Technical Program Manager or Portfolio manager opportunity, where demonstrated skills in AGILE.
- ✦ Adequate knowledge in Health Administration - Claims processing (auto adjudication), COB, EOB/ Drafts, Claims pricing and testing, HIPAA, enrollment, EDI, HER, HIX, Medicare, Medicaid, CDHP (consumer driven health plans).
- ✦ Accomplished Software professional with 6 years, and in RPA 2+yrs of ... Interacting with the business analyst personal, requirement gathering and analysis.
- ✦ Ability to develop business rules, context data flow diagram, entity relationship diagram, workflow diagramming, prototyping and document current state, gaps and future state processes.
- ✦ Actively used Joint Application Development (JAD) and Rapid Application Development (RAD) sessions with Business users, SME's and Stake holders alike in gathering requirements and analyzing them to identify the real business need and facilitating the development of a customized solution which delivers maximum cost and usability benefit to the client and company.
- ✦ Extensive knowledge and working experience of Team Collaboration and Defect Management tools including Confluence, Jira, Rally, VersionOne, Quality Center, Test Link, Trac, Rational Doors, and ClearQuest.
- ✦ Extensive knowledge and working experience in converting business requirements into UML diagrams using Rational Rose and MS Visio and also managing and tracking those requirements.
- ✦ Experience in developing surveys and interview questionnaires for interviewees and selecting the target population segment.
- ✦ Experience in database modeling and development of Entity Relationship Diagrams (ERD)
- ✦ Experienced in determining membership eligibility, billing experience within life and disability in health plans with through understanding of CPD coding, CMS -1500 claim forms and reimbursement forms.
- ✦ Experience in writing Medicaid and Medicare requirements as per the Centers for Medicare and Medicaid services (CMS) guidelines.
- ✦ Experience in process modeling using Use Cases, Sequence Diagrams, Collaboration diagrams, Activity Diagrams, Class Diagrams.
- ✦ Worked with Data Science teams to extrapolate usable insights and develop new methods and ways to utilize and apply information.

- ✦ Extensive experience in producing documents like Business Requirements Documents (BRD), Functional Requirement Specifications (FRS), Software Requirement Specifications (SRS), Creating Request for Proposals (RFP), creating Requirements Traceability Matrix (RTM).
- ✦ Good practical experience in retrieving data using SQL queries like Joins, Select, Unions, Group By, Subqueries and Aggregate functions using tools like MS SQL Server Management Studio and Oracle SQL Developer tool.
Experience in Organizing meetings to discuss outstanding issues with QA and developers and Built complex data visualizations using BI tools such as Tableau, PowerBI.
- ✦ Expertise in broad range of technologies, including business process tools such as Microsoft Project, MS Excel, MS Access, MS Visio, technical assessment tools, Micro Strategy Data Warehouse Data Modeling and Design.
- ✦ Experienced in data warehouses and data marts for business intelligence reporting and data mining along with developing and documenting process flows for business processes.
- ✦ Extensive experience in gathering Functional & System Requirements, Storyboards, conducting Gap and Impact Analysis, Businesses Processes Modeling.
- ✦ Adept in performing SWOT Analysis, Gap Analysis, Cost-benefit analysis, Feasibility analysis, Root cause analysis, Data Modeling, Risk and Impact analysis.
- ✦ Strong expertise in Unified Modeling Language (UML) and Object-oriented Analysis (OOA)
- ✦ Expertise in SQL Server Analysis Services (SSAS), SQL Server Reporting Services (SSRS) and SQL Server Integration Services.

Technical Skills:

Business Analysis	Requirement Analysis, Business Rules, Data Flow Diagrams, Flowcharts, Business Process Modeling & Improvement, Risk Analysis, Function decomposition, Gap Analysis, Prototyping, Cause and Effect Analysis, BRD, BRS
Software Packages/ Processes Model Tools	MS Office Suite 9X/2000/XP/2007/2010 (PowerPoint, Word, Excel, Access, Outlook), MS Project, MS Visio.
Rational Tools	RUP, UML MS Office Suite, MS Visio, MS Project, Optimal Trace,
Data Bases	MS Access 95/97/00/02, MS SQL server 2003/2007.
BI Tools	JIRA, SSIS, Informatica, SSAS, PowerBI, Tableau.
Operating Systems	MS Windows (9X/NT/2000/XP/Vista/Windows7/8/10), Linux, Unix
Methodologies	Waterfall, RAD, JAD, RUP, Agile, OOA, OOD, UML, Prototyping, Use Case

Professional Experience:

**Client: Performance Technology Partners, Rancho Cordova, CA
May'21**

- Till Date

Role: Sr. Healthcare Business Analyst

Responsibilities:

- ✦ Implemented new services and programs via MMIS for the Medicaid program by directly interfacing with the customer and the system engineers on a regular basis.
- ✦ Wrote user acceptance testing (UAT) scripts and led testing/ quality assurance for both HL7 ADT interface and the application.
- ✦ Developed a work plan that ensured RFP would meet federal prior approval requirements including use of modular project development, compliance with HIPAA and other federal guidelines
- ✦ Created documentation such as BRDs and FSDs (Business and Functional design specs) with elaborate Use Cases and process flows
Performed GAP analysis by performing the system analysis between the scheduling systems and documented the gap items.
- ✦ Analyzed and documented Medicaid EDI transactions issues related to implementation of HIPAA 5010 and ensure these issues are documented and addressed in the approach to the HIPAA 5010 version.
- ✦ Facilitated all Aspects of scrum framework, including product backlog, release backlog, sprint planning session, daily scrum meeting, sprint reviews and sprint retrospectives.
- ✦ Responsible for gap analysis in changing old MMIS and Involved in testing new MMIS. Also, accountable for Medicaid Claims Resolution/Reimbursement for peach state health plan using MMIS.
- ✦ Involved in impact analysis of HIPAA 5010 835 and 837P transaction sets on different systems as well as for ICD 9 to ICD 10.
- ✦ Worked within the project team to identify and interpret state Medicaid and Medicare policies as applicable to customer-defined algorithm research as well as assist with the internal development of new healthcare analytics.
- ✦ Expertise include Agile - Scrum and waterfall methodology, testing tools and automation, and managing the product lifecycle, sprint planning, sprint review.
- ✦ Expertise include Agile - Scrum and waterfall methodology, testing tools and automation, and managing the product lifecycle, sprint planning, sprint review.
- ✦ Unsigned different ad-hoc analyses, the Reports assist in defining strategy for each customer category. Informatics was used for the ETL process and Business Objects.
- ✦ Worked with FACETS Team for HIPAA Claims Validation and Verification Process.
- ✦ Utilized knowledge of SQL Programming to author over 20 Queries in the Management Dashboard.
- ✦ Created risk and quality reporting using a combination of Power BI and SQL.
- ✦ Participated in testing of Orion Rhapsody Route to receive and process HL7 ORU^R01 Version 2.5.1 messages to Web-server.
- ✦ Widespread knowledge of EHR/EMRs Electronic Medical Records, HL7, and its Patient Protection and Affordable Care Act PPACA.
- ✦ Experience in Creating Clinical, Regulatory, laboratory, EHR, etc. data segregation and data migration diagrams using MS Visio.
- ✦ Experience on developing a state-specific Medicaid management information system model & working experience on Medicaid, Confidential and MMIS projects.
- ✦ Created numerous reports using Tableau and proficient is using filters and parameters.
- ✦ Take the overall responsibility for the Jira configuration and be the go-to person for any Jira issues, enhancements or best practice question.

- † Participated in JAD sessions, meetings, workshops to gather requirements from various stakeholders and SMEs.
- † Experience in developing business stored procedure for Facets. Involved in creating stored procedure for Vision Claims processing in Facets.
- † Worked on the Patient Management System (integrated version of Patient Information System with EMR/EHR) is intended to remotely communicate with a compatible pulse generator from BSC CRM and transfer data to a central database (HIT EHR).
- † Highly efficient Data Scientist/Data Analyst with 6+ years of experience in Data Analysis, Machine Learning, Data mining with large data sets of Structured.
- † Performed data analysis and data profiling using complex SQL on various sources systems including Oracle and Teradata. Excellent experience on Teradata SQL.
- † Defined test cases for provider updates from legacy flat-file system to FACETS database system also involved in Medicare/Medicaid Business implementation of Facets.
- † Experienced in software development life cycle such as Waterfall, Agile-SCRUM methodologies, Business Analysis and Modeling.
- † Developed SQL scripts for verification of data at extraction phase to ensure, transformation phase and loading phase of the data to ensure correctness of the data and also verifying the ETL mapping rules Involved in testing HIPAA EDI X12 transactions & Code Sets Standards like (820-Premium Payment for enrolled health plan members, 834-Enrollment /Dis-enrollment to a health plan, 837- Health Care Claims and 278 Authorizations.)
- † Worked and supported on EDI Translators to analyze EDI files submission for Professional, Inpatient, Outpatient, pharmacy claims and dental claims Errors.
- † Analyzed and processed the table-driven benefit plan structure, recipient plan, and provider contract and reimbursement agreement business rules to process claims to pay, deny or suspend.
- † Worked on Medicaid and CHIP program requirements, including complete end to end life cycle data flow of eligibility, enrollment, claims, encounters, payment and post-payment.
- † Conducted Process Improvement Project for ADHD in efforts to raise our HEDIS rates.

Client: GWorks, Minneapolis, MN

Sep'19 - Apr'21

Role: Sr. Healthcare Business Analyst

Responsibilities:

- † Good Understanding of the EDI (Electronic data interchange), Implementation and Knowledge of HIPAA code sets.
- † Involved in the User Acceptance testing UAT to check the reliability for end users.
- † Designed Test Plans and Test Cases for User Acceptance testing (UAT) with the help of QA teams.
- † Strong HIPAA & EDI processes for member, payers, providers including Coordination of benefits, Co-pays, benefits and etc.
- † Worked with various EDI files such as 837 Claims processing, 834 Benefit Enrollment, 820 Payments.
- † Create Mapping documents, ETL technical specifications and various documents related to data migration.
- † Participating in HEDIS performance reporting and intervention analysis.
- † Implemented & supported Identity Management, LDAP Directories, Provisioning/Identity Workflows.
- † Coordinated with the EDI team in developing and documenting the detailed testing work plans and created the various testing documents for the assigned EDI transactions.
- † Responsible for attaining HIPAA EDI validation from Medicare, Medicaid, and other payers of government carriers.

- ✦ Performed Data mapping in XML, XQuery and performed data analysis with SQL Queries.
- ✦ Created Process Flow diagrams, use case diagrams UML using MS-Vision.
- ✦ Responsible for Medicaid Claims Resolution/Reimbursement for peach state health plan using MMIS.
- ✦ Resolved claims processing issues via the Confidential -Plan Teleprocessing System (ITS) and the BCBS Association guidelines.
- ✦ Strong understanding of project life cycle and SDLC methodologies including Waterfall and Agile. Experience in facilitating Joint Requirement Planning (JRP).
- ✦ Facilitation of SCRUM Ceremonies-Sprint Planning, Grooming, Retrospective and Daily Stand ups, as per Agile Framework and delivered the results at fast pace.
- ✦ Driving the adoption of Agile Scrum, removing impediments and fostering self-management. Robotic Process Automation (RPA). Expertise in RPA processes, including .
- ✦ Modified and created vendor specific maps for the 850, 820, 834, 855 and 856 transactions (EDI to XML, XML to EDI and delimited to XML). Worked on XSLT, XML schemas and xpath.
- ✦ Developed and prepared EDI documentation for 837 outbound EDS claim processing.
- ✦ Worked on HIPAA Transactions and Code Sets Standards according to the test scenarios such as 270/271, 276/277,837/835 transactions.
- ✦ Created reports and presentation of key components and milestones to Top Management.
- ✦ Helped in development and functioning in workflow analysis and process design.
- ✦ Provided data modeling support to each logical data model according to specifications of EDM.
- ✦ Worked with developers, testers, and business users, stakeholders at various levels at different stages of the SDLC.
Created Requirement Traceability Matrix (RTM), Defect Report and Weekly Status Report.
- ✦ Tested the HIPAA EDI, 834, 270/271, 276/277, 820, 837/835 transactions according to test scenarios and verify the data with Facets on different modules.
- ✦ Served as a project management analyst for the Healthcare clients on multiple initiatives involving maintenance and systems changes for HIPAA and CMS implementation under the Healthcare guidance rules directed by the government authorities while implementation of CMS (Content Management System) Reports.
- ✦ Involved in the full HIPAA compliance lifecycle from GAP analysis, mapping, implementation, and testing for processing of Medicaid Claims.
- ✦ Researched and gathered detailed requirements and translated it into proposed systems system enhancements for system documentation, system requirements, and system testing with verification for HIPAA implementation and Medicaid.
- ✦ Extensive SQL experience in querying, data extraction and data transformations. Extensive Experience in working as Dual Controller on various Business Projects.
- ✦ Developed Cubes using SQL server Analysis Services (SSAS) and Experience in Developing and Extending OLAP Cubes, Dimensions and data source views.
- ✦ Involved in gathering business requirements, design and development for the BPA, EPSDT, EDMS, EDI, Claims, Financials, Recipient, Prior Authorization and Managed Care modules.
- ✦ Translated Business requirements and functional specifications into Scenarios to make developers understand the requirements in more easy way.
- ✦ Captured process flows by preparing activity and sequence diagrams, pre- and post-conditions, performance requirements, impacted areas, high-level business rules, issues, areas in scope and out of scope, assumptions, etc.
- ✦ Authored business system analysis reports based on state regulations, HIPAA compliance and product business rules.

Client: Noridian Healthcare, Cincinnati, OH
Mar'17 –

Aug'19

Role: Business Analyst

Responsibilities:

- ✦ Translated the Business needs into system Requirements, communicating with the Business on a broader scale and with an in-depth view.
- ✦ Designed and developed Project document templates based on SDLC methodology.
- ✦ Developed Business Requirement Document as well as High-Level Project Plan.
- ✦ Functioned as the primary liaison between the Business line, operations, and the technical areas throughout the Project Cycle.
- ✦ Performed feasibility analysis for RPA automation for insurance claims process. ... Worked with the Business Analysts.
- ✦ implementing automation for those business processes Develop and provide inputs RPA/automation strategy across multiple business units Organized Workshops.
- ✦ Application lifecycle management using Jira.
- ✦ Facilitated JAD sessions with end users, development and QA teams.
- ✦ Developed the Test plans for quality assurance based on functional requirements.
- ✦ Develop UML diagrams like Use Cases Diagram, Activity Diagram, Sequence Diagram, Class Diagram and Coloration Diagram on scenarios for validating Entity Reference Data and Verification of customer records: legal name, address, business purpose legitimacy and analysis of transaction activity.
- ✦ Involved in UI requirements and creating Wireframes to help developers build the application in Visual Basic and data modeling sessions by developing DFD.
Participated in BRD review meetings to provide knowledge and Expertise on Anti Money Laundering Initiatives and AML deliverables.
- ✦ Identified, researched, investigated, analyzed, defined opportunities for business process improvement, documented business processes and initiated efforts to make improvements.
- ✦ Contributed to the definition of scope, performed extensive requirement analysis and defined functional specifications.
- ✦ Used Microsoft Excel for formatting data as a table, visualization and analyzing data by using certain methods like Conditional Formatting, removing Duplicates, Pivot and Unpivot tables, create Charts, sort and filter Data Set.
- ✦ Gathered analyzed and documented business and technical requirements from both formal and informal sessions and validate the needs of the business stakeholders.
- ✦ Created data mapping document for the application after finalizing the attributes and tables with business users
- ✦ Identified and communicated dependencies and potential risks to the completion of the project including resources, costs and systems.
- ✦ Created SQL tables with referential integrity and developed queries using SQL, SQL*PLUS and PL/SQL.
- ✦ Created requirements documents BRD, SRS, Design Specification and Business Process Flow (As-Is and ToBe).
- ✦ Involved in mentoring specific projects in application of the new SDLC based on the Agile Unified Process, especially from the project management.
- ✦ Managed the requirements and the traceability matrix using rational requisite pro.

- ✦ Identified and resolved potential problems before they occurred, minimizing the impact to schedule and cost, tracked issues, mitigated risks and provided corrective action plans.
- ✦ Went through SLA (Service Level Agreement) and created Stub Data.

Client: Wisconsin DOT, Dallas, TX

Oct'14 – Feb'17

Role: Business Analyst

Responsibilities:

- ✦ Worked on Data Analytics, Data Visualization, and Dashboard Maintenance to Analyze States-wide KPI's and future Business trends.
- ✦ Experience in configuring and maintaining various Compensation Packages with multi Allowances, benefits and bonus packages, and in setting up compensation segment security features.
- ✦ Performed PL/SQL Code Analysis, and wrote complex SQL queries on Oracle, DB2, Teradata, IMS, SQL Server and PostgreSQL databases to perform Data Analysis and validate data integrity.
- ✦ Assisted with user testing of systems (User Acceptance Testing), developing and maintaining quality procedures, and ensuring that appropriate documentation is in place.
- ✦ Monitored and assisted in designing and development of Use Cases, Activity Diagrams, and Sequence Diagrams using UML.
- ✦ Well versed with reporting packages (SSRS), databases (Microsoft SQL Server), programming Language (SQL, R) and Data visualization tools (Tableau and Microsoft Power BI)
- ✦ Supported analytics, data science, and business intelligence personnel by ensuring data quality and usability of KPI's and reports. Used Redshift, S3, Excel, and Tableau
- ✦ Use of Jira for sprints, which are bi weekly with a deployment weekly.
- ✦ Maintained SSRS reports in Report Builder for the duration of the life of the SSAS cube; verified data migrated to Amazon Redshift using Tableau with zero prior Tableau experience; worked with IT to recreate key SSRS reports with Redshift data in preparation for the decommission of the SSAS cube; continue to update and troubleshoot the Redshift-based SSRS reports.
Facilitated JAD sessions with end users, development and QA teams. Performed requirements modeling and develop analysis diagrams, activity diagrams, sequence diagrams, state diagrams, data models, and use-case realizations using RUP tools in Agile.
- ✦ Developed and Analyzed test reports and test plans
- ✦ Work closely with Managers, data science to identify and fix data gaps, improve data practices, and detail best practices for analysis.
- ✦ Perform in-depth analysis of data to create insights, answer business questions and create reports using Microsoft Excel and data visualization tools for business intelligence, like Tableau.
- ✦ Created Microsoft SQL Server Reporting Services (SSRS) reports in Report Builder for Finance and Sales against an underutilized Microsoft SQL Server Analysis Services (SSAS) cube with zero prior Report Builder experience.
- ✦ Facilitated sprint check-up during mid sprint, to review the acceptance criteria for the committed product backlog items.
