EDUCATION

Northeastern University, Boston, MA May 2025

Master of Science in Engineering Management

KLE Technological University, Hubli, India May 2021

Bachelor of Engineering in the School of Electronics and Communication

Key Coursework: Advanced Product Development, Economic Decision Making, Digital Product Design, Customer Driven Technical Innovation, Probability and Statistics, Engineering Project Management, Computation and Visualization

SKILLS

Product Management Tools: Jira, Confluence, Figma, Notion, Miro, Trello, Microsoft Project

Data and Analytics: SQL, Tableau, Power BI, Excel, A/B Testing, Data Analytics, REST APIs, JSON

Programming & Development: Python, R, JavaScript, C++, HTML, CSS, Java, Kotlin

Frameworks and Methodologies: Agile (Scrum, Kanban, SAFe), Product Roadmapping, KPI Definition, OKRs

Business Strategy & Research: Market Research, Competitive Analysis, User Research, Stakeholder Management

PROFESSIONAL EXPERIENCE

Teaching Assistant – Project Management, Northeastern University Jan 2025 – Present

- Collaborated with faculty in developing course materials, quizzes, and case study assignments, supporting over 50 students in understanding key project management methodologies (Agile, Scrum, Waterfall)
- Conducted weekly office hours to provide one-on-one mentorship, guiding students on project planning, execution, stakeholder communication and risk management strategies for the team projects
- Evaluated 100+ project reports and quizzes, delivering constructive feedback on scope management, resource allocation, and execution strategies to improve student performance

Product Analyst, Deloitte USI Sept 2021- June 2023

- Generated targeted data-driven insights to refine insurance cost estimation algorithms for Origami Risk's clients, enhancing pricing accuracy and operational efficiency across 40+ states in the US
- Analyzed large datasets in Excel using pivot tables, VLOOKUP, and advanced functions, developing algorithms that improved cost estimation accuracy by 20% and streamlined strategic decision-making
- Built and deployed Tableau dashboards, enabling real-time tracking of customer satisfaction and product performance, driving data-backed product improvements and stakeholder decision-making
- Optimized product testing and debugging for 250+ test cases by modifying JavaScript scripts and SQL queries, identifying and resolving critical algorithmic and database issues, leading to a 50% faster deployment cycle

Product Design Intern, Indian Institute of Technology Guwahati Dec 2019- Jan 2020

- Designed and implemented an RFID and QR-based security system, improving gate operation efficiency by 30% and reducing processing delays
- Mapped product workflows using UML, ensuring cost-effective design and seamless manufacturing deployment

PROJECTS

Credita ([Link](#)) Sept 2024 – Dec 2024

- Managed the end-to-end product development of a P2P lending platform, designing borrower-lender matchmaking, user-defined interest rates, and automated repayments
- Led market research and competitive analysis, prioritizing feature development based on user feedback and industry trends
- Executed A/B testing to refine UX, leading to an increase in user engagement and conversion rates

LifeVista ([Link](#)) Jan 2024 – May 2024

- Designed and prototyped a career exploration app, using Figma and Balsamiq for wireframing to ensure an intuitive and seamless user experience
- Launched and analyzed VOC surveys, integrating feedback into feature prioritization and product roadmap
- Performed SWOT and competitor benchmarking, strengthening go-to-market strategy and user retention

ButterflyMX - Product Manager Simulations ([Link](#)) Sept 2024 – Dec 2024

- Led product strategy and roadmap development for ButterflyMX, addressing key challenges in secure and flexible building access
- Defined and tracked key success metrics such as retention, engagement, and North Star metrics
- Executed iterative product improvements based on user insights and performance analytics

LEADERSHIP

Product Analyst, Deloitte USI Sept 2021- June 2023

- Coordinated with 50+ team members, leveraging Jira and Confluence to streamline product requirements and improve component tracking, resulting in reduced project timelines and enhanced cross-functional alignment
- Mentored and onboarded 5+ new hires, designing structured training programs and leading daily standups, accelerating team efficiency and knowledge transfer
