

Patlolla Samitha Reddy
Salesforce Developer
Email: samithapatlolla9@gmail.com
Phone: +1 8605065947
LinkedIn: www.linkedin.com/in/p-samitha-reddy

Professional Summary:

- As a Salesforce Developer with 5 years of experience, I have a strong track record of delivering high-quality solutions and enhancements across various industries.
- My expertise encompasses the full spectrum of Salesforce development, including the creation and deployment of robust applications, the implementation of scalable and repeatable solutions, and the integration of diverse Salesforce technologies to optimize system functionality and user experience.
- Administered, installed, and deployed Salesforce third-party apps, including Salesforce Lightning, and integrated with social media and other web-based applications to enhance connectivity and functionality.
- Worked across various Salesforce implementations, covering Sales Cloud and Service Cloud, providing comprehensive solutions tailored to business needs.
Developed SFDC solutions using Apex classes, triggers, Apex test classes for testing, and batch Apex for complex data processing, ensuring efficient and reliable performance.
- Created various custom objects, tabs, master-detail and lookup relationships, formula fields, and validation rules to support diverse business processes and requirements.
- Developed custom lightning components for the Lightning user interface, enhancing the user experience with dynamic and responsive designs.
- Built lightning components using the Lightning Component Framework and Aura framework, delivering modern and efficient UI components.
- Worked on CI/CD pipelines and implemented Checkmarx security fixes, ensuring continuous integration and delivery while maintaining high security standards.
- Participated in code reviews and provided feedback to ensure adherence to best practices and maintain high code quality.
- Created dashboards, reports, custom controllers, Visualforce pages, and tabs, enabling detailed data analysis and actionable insights in Salesforce.
- Worked with integration features such as REST and SOAP APIs, facilitating seamless data exchange and integration with external systems.

Technical Skills:

Lightning Experience Development	Salesforce CRM, Lightning Web Components (LWC), Apex Classes, Apex Triggers, Apex Controllers, Apex Batch Jobs, SOQL & SOSL Queries, APEX REST, Apex Testing, Lightning Aura Component, Apex Language, Visual Force (Pages, Components and Controllers), Apex Data Loader, Dashboards, Reports, Custom Objects, Salesforce.com: Sales Cloud, Service Cloud, Objects, Flows, Force.com Platform (Sandbox, and Production), Migration.
Salesforce Configurable Tools	Data Security, User Management, Flow Builder, Approval Processes, App Builder, Objects and relationships, Validation Rules, Page Layouts, Record types, Profiles, Roles, Sharing Rules, Chatter, Email Templates, Workflows, Process builder.
Programming Languages	Apex, JavaScript, SQL, Python, C, C++
Web Technologies	HTML, CSS, XML, JSON, SOAP, REST
Salesforce Tools	Force.com platform, Force.com Data Loader (Sandbox and production)
Database	SOQL, SQL, PL/SQL, Oracle
Development Tools	Eclipse IDE, Visual Studio Code (VS Code), Git, BitBucket
Operating Systems	Windows, iOS, Android, LINUX, UNIX.

Education:

- University of North Texas**
- Masters in computer science – (GPA – 4.0)
- Mahatma Gandhi Institute of Technology**
Bachelors in information technology

Certifications:

- Salesforce Certified Platform Developer I
- Salesforce Certified AI Associate

Professional Experience:

Client: Deloitte, United States
Salesforce Developer

May 2023 - Present

Responsibilities:

- Proficient in crafting HTML-based email campaigns using Salesforce Marketing Cloud Content Builder, creating visually appealing and engaging email templates with reusable components.
- Experienced in CSS development for email design, ensuring consistent rendering and compatibility across multiple email clients and platforms, improving email design responsiveness by 15%.
- Skilled in managing end-to-end email campaign execution, from processing and uploading lists to executing email sends, ensuring timely and accurate delivery of marketing communications.
- Created and deployed Lightning Web Components (LWC) to enhance customer support interfaces, reducing agent processing time by 30% and improving case resolution efficiency.
- Collaborated in an Agile/Scrum environment, coordinating with cross-functional teams to deliver weekly sprints, resulting in a significant increase in on-time project delivery.
- Worked with business stakeholders to enhance and maintain Salesforce digital experience sites (communities/portals), improving user engagement and satisfaction.
- Configured and customized Salesforce objects, fields, validation rules, and workflows to streamline business processes and improve data accuracy.
- Integrated Salesforce with external systems and applications using APIs and web services, ensuring seamless data flow and interoperability.

Environment: Salesforce.com platform, Apex, SOQL, Workflows & Approvals, Reports, Custom Objects, Custom Tabs, Data Migration, HTML, Java Script, SOAP API and REST API, Sandbox, GitHub, Visual studio (VS code), Jira.

Client: Citi Bank
Company: Tata Consultancy Services, India
Salesforce Developer

August 2021 to November 2022

Responsibilities:

- Enhanced and deployed key credit card functionalities, including requesting, enabling, blocking, and reporting lost/stolen cards, within sales and service cloud.
- Recognized for outstanding performance by delivering 80% of Checkmarx security fixes, demonstrating proficiency and dedication as a Salesforce Developer.
- Worked on CI/CD pipelines and implemented Checkmarx security fixes, ensuring continuous integration and delivery while maintaining high security standards.
- Executed entity migration tasks using Workbench, Data Loader and Data Loader IO, ensuring data integrity and continuity during development and maintenance phase with 95% success rate.
- Enhanced the authorized user feature by expanding the input options from just basic information to include additional details like phone number, improving user management and security.
- Developed, created, deployed, and modified custom Salesforce web applications and flows.
- Utilized Apex, Visualforce, and Lightning components to enhance functionality within Sales and Service Cloud, providing tailored solutions to meet specific business needs.
- Enhanced the functionality of a web application for a Finance client, resulting in a notable 20% increase in user engagement.
- Experience in using Data Loader for insert, update and bulk import or export of data from Salesforce.com Objects.
- Actively participated in sprint planning, daily stand-ups, and sprint demos as part of the agile development process.

Environment: Lightning Web Components, Aura, Apex Language, SOQL, SOSL, Apex Triggers, Sandbox, Checkmarx, Salesforce Sales and Service Cloud, BitBucket, GitHub, Visual studio (VS code), Custom Objects, Jira.

Company: Teradata Corporation, India
Salesforce Administrator

April 2020 – July 2021

Responsibilities:

- Implemented automated workflows and approval processes using Salesforce Flows and Process Builder, reducing manual intervention and streamlining customer support operations.
- Designed and developed reports and dashboards for customer support teams, enabling real-time tracking of case resolution times, customer satisfaction, and agent performance metrics.
- Utilized agile methodology to streamline the development process, resulting in a significant reduction of customer support response time by 30%.
- Configured and customized Salesforce environments, including object creation, field-level security, validation rules,

page layouts, and record types, to align with business needs.

- Achieved a 25% increase in workflow efficiency by leveraging advanced Salesforce features and custom development solutions, optimizing processes, and conducting regular performance reviews.
- Performed essential administrative tasks such as managing user accounts, roles, and permissions to ensure appropriate access controls and security, facilitating seamless data migration and integration to maintain data integrity and consistency.
- **Environment:** Lightning Web Components, Aura, Apex Language, SOQL, SOSL, Apex Triggers, workflows, Sandbox, Salesforce Sales Cloud, GitHub, Visual studio (VS code), Custom Objects, Jira.
