SUMMARY

DevOps Engineer with expertise in cloud infrastructure, CI/CD automation, and security compliance. Proficient in AWS, Kubernetes, Terraform, Jenkins, and Ansible, with a strong background in Python, Java, and microservices architecture. Skilled in optimizing cloud networking, monitoring, and security, ensuring scalability, HIPAA compliance, and high availability (99.9% uptime). Passionate about automation, performance tuning, and DevSecOps best practices.

SKILLS & CERTIFICATION:

- **Certifications:** AWS Certified Developer Associate
- **Languages:** Python(including Python 3.x, Pandas, NumPy, SciPy), Java, JavaScript, Erlang, Prolog.
- **Frameworks:** Flask, Django, FastAPI, Angular, React.js, Node.js, Express.js, Apache Kafka.
- **Tools & Technologies:** Kubernetes (EKS, AKS, GKE), Docker, Jenkins, Terraform, Ansible, Git/GitHub, GitLab, VS/VSCode.
- **Web Services:** REST, GraphQL, SOAP, Microservices, API Gateway, WebSockets
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, DynamoDB
- **Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, VPC, CloudFormation), Azure (DevOps, AKS, Key Vault), GCP.
- **Monitoring & Logging:** Prometheus, Grafana, New Relic, Datadog, Splunk, ELK Stack, Fluentd, SolarWinds
- **Methodologies:** Agile/Scrum, GitOps, DevSecOps, CI/CD, IaC, SRC.

EXPERIENCE:

Devops Engineer – Somos Inc., Boston, MA

Oct 2024 - Current

- Developed and optimized CI/CD pipelines with Jenkins, GitHub Actions, and Ansible, automating deployments and reducing manual errors by 22%.
- Automated vulnerability scanning and security patching using SonarQube, Aqua Security, and AWS Inspector, mitigating 85% of potential security threats before production release.
- Architected and managed AWS cloud infrastructure using Terraform, Kubernetes (EKS), and Helm, enhancing system scalability and reducing infrastructure provisioning time by 28%.
- Optimized cloud networking (VPC, Load Balancers, Subnets, Route Tables, and Network ACLs) to improve system availability and reduce latency by 18%.

Devops Engineer – Humana Inc., Boston, MA

Apr 2023 - Sep 2024

- Architected and managed AWS cloud infrastructure using Terraform, Kubernetes (EKS), and Helm, enhancing system scalability and reducing infrastructure provisioning time by 28%.
- Implemented HIPAA-compliant security controls, integrating AWS Security Hub, IAM roles, and network segmentation to ensure 100% regulatory compliance in cloud environments.
- Configured log aggregation and real-time monitoring with ELK stack (Elasticsearch, Logstash, Kibana), Prometheus, and Grafana, reducing incident resolution time by 15%.
- Optimized cloud networking (VPC, Load Balancers, Subnets, Route Tables, and Network ACLs) to improve system availability and reduce latency by 18%.

Software Developer – ICICI Lombard Insurance, India

Jan 2021 - Aug 2022

- Developed and optimized RESTful APIs using Java (Spring Boot, Hibernate), improving system efficiency and reducing response time by 21%.
- Engineered a high-performance claims processing system using Spring Boot, Kafka, and PostgreSQL, improving transaction throughput by 25% and reducing processing errors by 20%.
- Strengthened API security by implementing OAuth2, JWT authentication, and Azure Key Vault, ensuring secure access management and data protection.
- Deployed microservices using Docker, Kubernetes (EKS), and Helm, achieving 99.9% application uptime and enabling seamless scaling.
- Enhanced database query performance by optimizing SQL indexing strategies, reducing API response times from 500ms to 120ms and improving system efficiency.

EDUCATION:

University of Massachusetts Boston, MA

Sep 2022 - May 2024

Master of Science in Computer Science

GPA - 3.77

Sreenidhi Institute of Science and Technology, India

Aug 2018 - Jul 2022

Bechelor of Technology in Electronics and Computer Engineering

GPA - 3.10

PROJECTS:

Stock Price Prediction Using Time Series:

- Published in IJRASET (Dec 2021), explored forecasting models like ARIMA, Exponential Smoothing & Neural Networks for stock analysis. [Publication](#) .

Vituperative Content Detection: A Multidomain Architecture using OpenCV:

- Developed and containerized a multi-module abuse detection system using YOLOv5 and OCR, capable of identifying offensive content (e.g., alcohol, firearms, cuss gestures) in images and videos, enhancing safety in medical consultations.
- Integrated automated model training pipelines and implemented performance tracking using precision, recall, and F1-score metrics, enhancing deployment readiness for CI/CD in security-focused applications.
