Summary:

Dynamic and detail-oriented **Data Engineer** with over 3 years of experience in designing, optimizing, and managing large-scale data pipelines. Expertise in Python, SQL and AWS with a strong focus on Supply Chain analytics and delivering high-performance, scalable data solutions. Skilled in implementing best coding practices and solving complex data engineering challenges with innovative approaches. Proven ability to collaborate effectively with cross-functional teams and communicate technical concepts to business stakeholders, driving actionable insights and business impact.

Technical Skills:

- **Programming Languages:** Python, SQL, Java, C, C++
- **Data Engineering Tools:** Databricks, Apache Spark, Hadoop, Airflow, Kafka, AWS Glue
- **Cloud Platforms:** AWS (S3, Redshift, EMR), AWS Sagemaker, Microsoft Azure (Data Factory, Databricks)
- **Big Data Technologies:** Apache Spark, Hive, Hadoop
- **Data Warehousing:** Amazon Redshift, Snowflake, BigQuery
- **CI/CD Tools:** Jenkins, Git Lab, Docker, Kubernetes, Terraform
- **Visualization:** Power BI, Tableau

PROFESSIONAL EXPERIENCE:

Carman Solutions, Software Developer

Sep 2024 - Present

Responsibilities:

- Designed and deployed real-time data pipelines using **Kafka** and **PySpark**, enabling near-instantaneous analytics for supply chain data.
- Optimized ETL workflows using PySpark and **Databricks**, improving data processing efficiency by 30%.
- Built monitoring dashboards using **Grafana** to track pipeline health, data latency, and throughput, reducing downtime by 20%.
- Designed and implemented SQL queries leveraging **Window Functions** such as ROW_NUMBER(), RANK(), DENSE_RANK(), LEAD(), and LAG() to analyze time-series data, customer behavior, and sales performance.
- Implemented data quality checks and validation processes to ensure accuracy and reliability of data pipelines.
- Collaborated with cross-functional teams to integrate data from multiple sources into a centralized data warehouse.

Tech Pundits Inc, Software Developer

Feb 2024 - AUG 2024

- Preprocessed and transformed large datasets in Databricks using **PySpark** to improve data usability.
- Developed scalable **ETL** pipelines using PySpark and Databricks, handling datasets of over 1TB with a 40% improvement in processing speed.
- Implemented advanced data transformations, including handling missing values, deduplication, and feature engineering, to support machine learning models.
- Utilized **Pandas** for text preprocessing tasks such as tokenization, stopword removal, and stemming to prepare unstructured data for sentiment analysis.
- Automated data ingestion and transformation processes using **Apache** Airflow, reducing manual effort by 50%.

Wise Link Global, Software Developer

July 2023 - Feb 2024

Responsibilities:

- Built and maintained ETL pipelines using **PySpark** and Databricks to automate data ingestion and processing for large datasets.
- Deployed distributed data processing systems on **AWS** (EMR, S3, Redshift) to enable scalable and efficient data transformations.
- Implemented data validation and quality checks at every stage of the **ETL** pipeline to ensure data accuracy and consistency.
- Integrated data from relational databases, APIs, and flat files into a unified data warehouse, improving data accessibility.
- Implemented CI/CD pipelines using **Jenkins** and **Docker** for automated deployment of data pipeline updates.

- Visualized model performance and key insights using **Tableau**, enhancing decision-making processes.
- Optimized SQL queries and transformations, reducing query execution time by 25%.

Kube IT, Software Engineer[CPT Internship]

Jan 2023 – May 2023

Responsibilities:

- Created an AWS Glue ETL job to transform raw data from **S3** into a cleaner format and tracked metadata and ETL job statuses using DynamoDB.
- Loaded cleaned data into **Amazon Redshift** to support analytics and reporting.
- Wrote **SQL** scripts to extract, transform, and load raw data from operational databases into the data warehouse.
- Conducted query tuning and performance benchmarking to ensure optimal resource utilization and scalability.
- Implemented table partitioning on large datasets and used GROUP BY and ROLLUP for multidimensional aggregations, significantly improving query efficiency by 30%.

CyberWave Technologies, Data Engineer

Jan 2020 – Jan 2022

Responsibilities:

- Automated scripts and developed a web application using **Python**, improving operational efficiency and data processing workflows.
- Developed a user-friendly web application using **Flask** and **Django** to streamline data workflows, enabling stakeholders to interact with and visualize data in real-time.
- Orchestrated deployment processes on **AWS** using ECS and Kubernetes, reducing deployment time by 30%.
- Managed Docker containers and streamlined deployment processes on cloud platforms like **AWS**.
- Conducted data analysis and visualization using Pandas, NumPy, and Matplotlib to deliver actionable insights for business intelligence.
- Improved pipeline transparency by creating detailed **DAGs** (Directed Acyclic Graphs) and logging mechanisms for error tracking.
- Designed and implemented data partitioning and indexing strategies to optimize query performance on large datasets.
- Developed advanced **SQL** queries using JOINS, GROUP BY, and CASE statements to aggregate, transform, and validate data across multiple sources.
- Designed financial dashboards in **Power BI** to consolidate and track monthly, quarterly, and annual reports, leveraging forecasting capabilities to predict future trends.

Education:

- **Master's in Computer Science - Kennesaw State University** **Jan 2022 - May 2023**
Graduate Coursework: Advanced Algorithms, Theory of Computation, Database systems, Computer Networks, Artificial Intelligence, Cloud Computing.
- **Bachelors in Electronics and Communication - SASTRA University** **Jun 2016 - Jun 2020**
Undergraduate Coursework: Data Structures with C, Design, and Analysis of Algorithms, Operating Systems, Web Technologies, Python Programming, Java Programming.
