Project focused on enhancing UKG Pro, with delivery of HR, payroll, and compensation features across 14 Agile teams (220+ members), contributing to \$17M+ revenue growth and EPAM's S&P 500 expansion. [\[link\]](#) UKG Pro, was recognized among the Top 50 Best Software in 2025.

- Created technical user stories using SQL to support migration/testing and trained BAs on data-driven analysis
- Mentored 14+ BAs globally, improving requirement quality and enabling zero critical failures over 3 years
- Boosted team throughput by 20%+ through audits, shadowing, and targeted BA process improvements
- Delivered BA frameworks (DoR/DoD, estimation, stakeholder maps) to standardize practices across 14 teams
- Secured buy-in to scale the BA team to 14 analysts, closing capability gaps and improving delivery
- Partnered with C-levels to align product changes with testable, traceable, and prioritized requirements
- Defined MVP scope and risks by converting business needs into structured BA deliverables
- Supported backlog refinement, sprint planning, and story-level analysis across 14 Agile teams
- Cut onboarding time by 40% via 20+ training sessions and a centralized wiki hub for 100+ team members
- Built Jira and Aha.io dashboards to track productivity and inform exec decisions on contracts and releases

Lead Business Analyst | Feb 2020 – Sep 2021

Client: [McKesson Corporation](#) | Healthcare Domain

Fortune 10 healthcare leader with \$308.9B in 2024 revenue distributing 1/3 of North America's pharmaceuticals. Project focused on COVID-19 Vaccination Portal (VAPI) to schedule and track patient vaccinations.

API & System Integration

- Led API integration strategy between EnterpriseRx and external vaccination systems (VAPI), enabling real-time scheduling, Rx creation, and data exchange
- Defined technical specs and system workflows to support secure web service connections using REST APIs
- Built end-to-end data flows for vaccination processing, patient registration, Rx status updates, and e-status tracking
- Validated JSON message structures and tested API endpoints using Postman to support development and QA
- Contributed to defining system architecture and data flow between VAPI, ERx, and external vendor portals

Data Mapping & Documentation

- Created integration specs, field mapping documents, and API message formats (JSON) to support data consistency
- Used SQL queries to validate data fields across legacy and target systems for ETL and UAT efforts
- Delivered process diagrams and system flows (Visio, PowerPoint) to document vaccine workflow automation

Process Automation & UAT

- Automated manual tasks like Rx creation, vaccination scheduling, and patient data capture through portal integration
- Led UAT preparation and execution: created test cases, defined success criteria, and coordinated cross-team validations
- Identified system bottlenecks and helped eliminate fax/email-based vaccine order tracking through API automation

Stakeholder Collaboration

- Collaborated with pharmacy tech teams, IT developers, and vendor representatives to refine requirements and API behavior
- Facilitated meetings to align clinical business needs with system capabilities, prioritizing MVP scope

- Supported enterprise-wide rollout and adoption by designing training materials and presenting use case diagrams

Project: [Clinical Program Solution \(CPS\)](#)

McKesson Clinical Programs Solution™ (CPS) is a cloud- based application that enables you to drive clinical interactions between your pharmacists and patients to provide your patients with better clinical outcomes.

- Led CPS product planning, MVP scoping, and delivery of 10+ features including the “Clinical App”
- Analyzed 900+ requirements, turning business needs into user stories, wireframes, and documentation
- Collaborated with teams to refine sprint-ready stories and validated functionality using SQL & Postman
- Delivered weekly executive reports on backlog, risks, and progress to guide leadership decisions
- Mentored 2 BAs and 1 junior, establishing scalable BA processes and performance KPIs

Senior Business Analyst & Change Manager | Feb 2019 – Feb 2020

Client: [Regeneron Pharmaceuticals](#) | Healthcare Domain

S&P 500 biotech leader developing life-changing medicines. Project focused on automating VelociGene processes—building custom software (mobile included) and hardware solutions to accelerate animal model production and reduce drug Time to Market.

Process Automation & Workflow Design

- Translated complex lab workflows into digital solutions by leading story creation, backlog management, and process refinement
- Designed web/mobile UX flows to streamline animal model creation, improving lab tech efficiency and reducing time to market
- Created user role and permission matrices to enforce system-level access controls and security

Testing & Documentation

- Led UAT: authored test cases/scripts, defined acceptance criteria, and coordinated validation with cross-functional teams
- Delivered process flows and system diagrams to support stakeholder understanding and implementation planning

Stakeholder Collaboration

- Conducted stakeholder analysis for 600+ users and developed role-specific training materials for successful adoption
- Collaborated with scientists, UI/UX designers, and system architects to ensure automation aligned with lab protocols

Business Analyst & Assistant Change Manager | EPAM Kazakhstan | Feb 2015 – Feb 2019

Client: [Tengizchevroil LLP](#) | *Oil & Gas Industry*

- Led 2M+ document migration, automating document workflows across 7 business groups & 1,000+ users
- Trained 600+ users & implemented an enterprise-wide document management system (DMS)
- Reduced manual work by 50%, doubling efficiency through automation & workflow optimization
- Only successful DMS implementation across Tengizchevroil’s global branches
- Supported ETL efforts by identifying data gaps, mapping fields, and validating records using SQL for seamless move from old to new system for existing customers.

Founder & Director | A5 Tutoring Center | Kazakhstan | 2014 – 2015

- Founded and scaled a profitable tutoring center serving 200+ students with 20+ educators
- Achieved high student satisfaction (NPS > 50%) through innovative teaching strategies

Business Analyst – Various Industries | Kazakhstan | 2010 – 2015

- Held BA roles in HR, Healthcare, Oil & Gas, GovTech, and Sports Technology sectors
 - Modeled system data tables in Enterprise Architect to support jurisdiction system requirements.
