

AARON SANS

San Diego, CA, 92014

(323) 524-5680 | Aaron@aaronsans.com | [GitHub](#)

PROFESSIONAL SUMMARY

Results oriented computer science graduate with a background as a Lidar specialist transitioning into software engineering. My experience in artificial intelligence, automating processes and development positions me well for full time roles in artificial intelligence and software engineering.

SKILLS

- **Programming Languages:** Java, C++, Python, LISP, SQL, C#, PHP, JavaScript, Assembly
- **Software & Tools:** AutoCAD, Git, Photoshop, Tensor.art, Fooocus, UNIX, Windows, Linux, MacOS
- **Technical Skills:** AI Prompting, AI Image Generation, GUI Development, Debugging, Troubleshooting, Virtual Machines, VPN Setup, System Maintenance

EDUCATION

- **California Polytechnic State University, Pomona – Pomona, CA**
Bachelor of Science in Computer Science, Minor in Mathematics | 2018
GPA: **3.4/4.0**
- **CompTIA A+ Certification**

WORK EXPERIENCE

Kelar Pacific

San Diego, CA

LiDAR Scanning & BIM Specialist

2020 – Present

- Enhanced BIM and LiDAR software by beta testing and implementing improvements, boosting processing speed by 50%.
- Developed custom automation tools for LiDAR data workflows, improving efficiency and accuracy.
- Led cross-functional collaboration to integrate AI and automation into existing software solutions.
- Organized and led weekly technical training sessions to optimize team workflows and software proficiency.

IT & Tech Support

2016 – 2020

- Developed custom GUI and automation tools to streamline internal workflows.
- Managed system maintenance, ensuring minimal downtime for critical deployments.
- Created a comprehensive reporting framework for field staff to log hardware and software issues.

PROJECTS

Englekirk Compressor | C++, LISP

- Developed a BIM software solution that optimizes AutoCAD files by removing unnecessary data, reducing file sizes.
- Designed C++ scripts to scan directories and manage AutoCAD files efficiently.
- Built LISP scripts for automated cleanup of redundant files and enhanced system performance.
- Created an installer for end-user deployment and authored detailed user documentation.
- Managed version control with Git for continuous development and optimization.

AI Influencer: Lily.Loken

- Designed and developed a photorealistic AI influencer model with Tensor.art and Fooocus.
- Curated and uploaded AI training datasets using Kaggle to enhance image generation capabilities.
- Applied advanced AI prompting techniques for consistent high-quality image output.
- Fine-tuned image details using Gemini and Photoshop to maintain aesthetic consistency.
- Built an online presence, growing an AI-generated social media following to 4,000+ followers.

ADDITIONAL INTERESTS

- **Content Creation:** Managing YouTube Channel “Dychronic”
- **Technology Enthusiast:** PC building, AI research, software development
- **Gaming & Pop Culture:** Fallout series, Seinfeld
