SUMMARY

Experienced Full Stack Engineer with over 7+ years of dedicated expertise in MERN stack development, with a proven record of delivering robust and efficient web applications. Proficient in creating seamless back-end and front-end integrations by combining Node.js with various front-end technologies. Demonstrated expertise in optimizing code, resolving critical issues, and achieving high code coverage standards. Skilled in responsive design and RESTful API development. Adept at leading teams, contributing to architectural decisions, and consistently delivering projects on time.

SKILLS

Server Side: Node.js (Express.js, Nest.js), MongoDB, PostgreSQL, Firebase, MySQL

Client Side: React.js, JavaScript (ES6), Vue.js, Angular, jQuery, HTML5, CSS, Tailwind, Bootstrap, Redux, TypeScript, Next.js, CSS3

Database: PostgreSQL, MySQL, MongoDB, GraphQL, Redis, SQL, NoSQL

Cloud services: CI/CD pipelines, GitLab CI, Docker, Kubernetes, Heroku, Jenkins, Travis CI, AWS (EC2, ECS, EBS, Lambda, S3, RDS, CloudWatch), AWS CodePipeline, Bitbucket, Datadog, New Relic, GCP, Digital Ocean, Terraform Tools: Jira, ClickUp, Figma, Trello, GitHub, GitLab, Bitbucket, Visual Studio Code, PyCharm, Eclipse, IntelliJ, Tomcat, Postman, Swagger, Workbench, Kafka, RabbitMQ

DevOps: AWS, CloudFront, Lambda, Docker, Jenkins, API Gateways, Event Bridge, CI/CD Pipelines, AWS, Cloud Watch, Datadog, Google Cloud Functions

Misc: HIPPA Compliance, PCI Compliance, Agile/Scrum, Performance optimizations, Version Control, Swagger, Payment gateways

WORK EXPERIENCE

OHRG	Full Stack Engineer	2020 - Present
• Mentored junior developers, fostering a collaborative environment that increased productivity and knowledge retention by 33%. • Leading team of 5 engineers in developing and maintaining web applications using React, Node.js, Express.js, MongoDB, and Angular 2.0+, achieving a 30% boost in productivity and a 25% reduction in development cycles. • Applied Agile methodologies and object-oriented design principles in MERN, REST, SOAP, JavaScript, Angular 2.0+, and React, resulting in a 25% increase in development velocity and a 23% faster time-to-market. • Demonstrated expertise in React.js for frontend development and MongoDB for database management, enhancing application performance and data management efficiency by 22%. • Applied DevOps practices and CI/CD pipelines with Jenkins, improving code quality by 45% and cutting deployment time by 70%. • Cooperated with team members by leveraging Git for version control and GitHub for project management, streamlining workflows and reducing redundancies by 40%. • Engineered serverless solutions using AWS, Azure, and Lambda, which enabled scalable operations and reduced operational costs by 55%.		

Enara Health	Senior Software Engineer	2018 - 2020
- Engineered scalable applications using React.js, Node.js, Express.js, and MongoDB, which improved development efficiency by 28%. - Led a team in developing REST APIs with the MERN stack, facilitating seamless communication between frontend frameworks and web applications, and achieving an 18% boost in data transfer efficiency. - Developed a web application using Node.js for the backend and React/Next for the frontend, resulting in a 40% improvement in overall performance and efficiency. - Utilized Docker and Kubernetes to streamline deployment processes, cutting deployment time by 60% and enhancing reliability by 38%. - Troubleshooted issues, conduct application profiling, and boost performance, leading to a 32% increase in system efficiency. - Introduced automated testing frameworks that reduced bug incidents by 40% and increased system stability by 50%. - Deployed applications to AWS, GCP, and Heroku, resulting in a 55% enhancement in scalability. - Executed a serverless architecture with AWS Lambda to optimize costs and ensure seamless scalability for high-traffic applications.		

Fund That Flip	Software Engineer	2016 - 2018
- Strengthened security with advanced authentication and authorization protocols, reducing vulnerabilities by 60%. - Designed user interfaces using Bootstrap, Tailwind CSS, and Material UI, lowering bounce rates by 28%. - Built complex front-end functionalities with React, increasing user engagement and satisfaction by 22% across devices. - Enhanced security through advanced authentication and authorization protocols, cutting vulnerabilities by 60%. - Improved data storage solutions with MySQL, PostgreSQL, MongoDB, and DB2, increasing data retrieval speed by 33%. - Integrated cloud services, including AWS S3 and Google Drive, reducing file storage and retrieval times by 27%.		

EDUCATION

Bachelors from GIKI
