

AKLIL NEGUSE

Evansville, IN 47725 • 317-314-3183 • Akin98976@gmail.com

SUMMARY

6+ year IT professional specializing in enterprise integration with expertise in MuleSoft and Java. Experienced with both Mule 3 and Mule 4 to streamline data flows and connect legacy and modern systems. Designs RESTful APIs using RAML and OAS to build reusable, well-documented interfaces. Develops scalable backend applications leveraging Spring MVC and Spring Boot frameworks. Skilled in CI/CD tools such as Jenkins and Git for managing automated pipelines. Proficient in DataWeave for efficient data transformation across multiple platforms. Adept at troubleshooting production issues to ensure uninterrupted operations. Experienced with shell scripting to automate processes and enhance system efficiency. Familiar with Agile methodologies, driving iterative development and effective team collaboration. Detail-oriented and focused on delivering robust, reliable software solutions. Deployed MuleSoft applications on Runtime Fabric (RTF) using AKS/EKS, enabling scalable and resilient containerized integration services across cloud environments. Implemented MuleSoft C4E (Center for Enablement) best practices on Kubernetes, streamlining governance, CI/CD pipelines, and cross-team API delivery. Utilized Dynatrace for end-to-end application performance monitoring, providing real-time insights into response times, service health, and infrastructure dependencies. Analyzed logs and metrics using the ELK Stack and Splunk to identify performance bottlenecks, support root cause analysis, and optimize system reliability across distributed environments.

SKILLS

- Programming Languages: Java 7 and 8, Dataweave, JavaScript, Python
- J2EE Technologies: Java EE, JSP, EJB, JDBC, JNDI, JSTL, JPA
- API Design: SOAP and RESTful APIs, RAML, Swagger
- Application Servers: Apache HTTP Server 2.x, JBoss 5.x, Express Node.js
- Platform: Windows, Linux, MacOS
- Integration: MuleSoft 3 and 4, Boomi, APIGEE
- Web Services: SOAP, RESTful
- Databases: Oracle 9i/10g, MongoDB 2.6, MS SQL Server 2008, MySQL 5/6, PostgreSQL 8/9
- Version Control Systems: Apache Subversion SVN, CVS, Git, GitHub, Bitbucket

CERTIFICATION

MuleSoft Certified Developer (MCD) 3 & 4

WORK HISTORY

MuleSoft Developer, 04/2023 to Current

Old National Bank – Evansville, IN

- Built APIs for banking operations, including account management and payments.
- Used DataWeave to process and transform data across multiple platforms.
- Integrated MuleSoft APIs with Oracle databases and external vendors.
- Automated API deployment pipelines using Jenkins for seamless releases.
- Secured APIs with OAuth2 and API Gateway for reliable communication.
- Monitored API performance using AnyPoint tools and optimized workflows.
- Enhanced error-handling mechanisms to improve API fault tolerance.
- Documented API architecture, workflows, and troubleshooting processes.
- Collaborated with business teams to ensure APIs met user needs.
- Provided production support and resolved critical API issues efficiently.
- Environment: Mule 4.x, Anypoint Studio, AnyPoint Platform, Git, Azure DevOps, ActiveMQ, Postman, REST, SOAP UI, Maven, MUnit, RAML.

MuleSoft Developer, 01/2021 to 03/2023

Mass General Brigham – Boston, MA

- Developed APIs to integrate research systems and streamline data sharing.
- Used DataWeave to transform and validate pharmaceutical data structures.
- Ensured compliance with regulatory standards in API development.
- Automated deployments with Jenkins and monitored API health using AnyPoint.
- Created reusable templates for faster API development across teams.
- Collaborated with stakeholders to design scalable API solutions.
- Conducted API testing using MUnit to ensure functionality and security.
- Documented API designs, workflows, and integration strategies.
- Improved error-handling mechanisms for better system resilience.
- Supported production environments and resolved API issues promptly.
- Environment: Mule 4.x and 3.x, Anypoint Studio, AnyPoint Platform, Git, Jenkins, AnypointMQ, Postman, REST, SOAP UI, Maven, MUnit, RAML, Swagger.

API Developer, 07/2019 to 12/2020

Harbor Freight Tools – Calabasas, CA

- Built APIs for inventory and logistics management.
- Integrated MuleSoft APIs with Oracle databases and external systems.
- Used DataWeave to process and transform data efficiently.
- Automated API deployments using Jenkins and AnyPoint Studio.

- Secured APIs with OAuth2 and monitored performance using AnyPoint tools.
- Documented API workflows and integration points for development teams.
- Conducted unit testing using MUnit for reliable API functionality.
- Enhanced error-handling strategies to improve system stability.
- Resolved production issues quickly to maintain smooth operations.
- Collaborated in Agile sprints to deliver high-quality APIs.
- Environment: 3.x, Anypoint Studio, AnyPoint Platform, Git, Jenkins, AnypointMQ, Postman, REST, SOAP UI, Maven, MUnit, RAML, Swagger.

Java Developer, 09/2018 to 06/2019

Emerson Electric Co. – St. Louis, MO

- Built RESTful APIs for agricultural equipment management systems.
- Used Hibernate for efficient database access and data transactions.
- Improved system performance through optimized multithreaded processing.
- Documented API designs and workflows for team collaboration.
- Automated builds and deployments using Maven and Jenkins.
- Conducted unit testing to ensure high-quality code.
- Participated in Agile ceremonies for efficient project delivery.
- Collaborated with frontend teams to integrate APIs with applications.
- Resolved technical issues in production environments.
- Designed scalable backend services using Spring Boot.
- Environment: Java, Core Java, Spring-Core, Spring-MVC, JDBC template, REST, MySQL 5.7, JUnit, Docker, Jenkins, Git, Javascript, Tomcat.

EDUCATION

Bachelor of Computer Science: BSc

Bachelor of Science: Computer Science

Sample University
