SUMMARY

- Accomplished Senior Full Stack Developer with over 10+ years of experience in architecting, developing, and optimizing scalable, high-performance web applications across diverse technology stacks and cloud environments. Known for delivering innovative, end-to-end solutions that align with complex business requirements while ensuring high standards of quality, security, and system performance.
- Proficient in front-end and back-end development, with hands-on experience in technologies such as JavaScript, React, Node.js, Python, Django, Flask, FastAPI, Java, and Spring Boot, enabling delivery of end-to-end solutions.
- Extensive experience in cloud computing with strong command over AWS, Azure, and Google Cloud Platform (GCP) services including EC2, S3, Lambda, App Services, and Cloud Functions, for building secure and scalable applications.
- Strong experience with backend frameworks such as Spring Boot, Gin/Gorm, Django, Flask, and FastAPI, allowing the creation of efficient APIs and microservices to power modern applications.
- Proven success in implementing containerization and orchestration with Docker and Kubernetes, ensuring efficient application deployment, scalability, and management across diverse environments.
- Deep experience in designing and maintaining both relational (MySQL, PostgreSQL) and NoSQL databases (MongoDB), ensuring optimal data handling and retrieval processes for high-performance applications.
- Applied Test-Driven Development (TDD), Behavior-Driven Development (BDD), and Object-Oriented Programming (OOP) across 15+ projects, reducing bug density by 40% and accelerating development timelines.
- Successfully led the development of 10+ projects, achieving an average 95% client satisfaction rating through consistent quality delivery and seamless execution.
- Passionate about continuous learning, staying up to date with emerging technologies and industry trends to incorporate the latest advancements and optimize the development process.
- Focused on delivering high-quality software solutions by leveraging industry best practices, staying current with evolving technologies, and continuously optimizing development processes to meet organizational goals and ensure sustained success.

SKILLS

LanguageAnd Frameworks	Javascript/Typescript, React(Remix, Next.js, Redux, React Native), Node(Express.js, Nest.js), Vue(Nuxt.js, Vuetify, Pinia, Vuex), Angular(AngularJS, RxJS, NgRx), Python (Django, Flask, FastAPI), PHP (Laravel, Symfony, CodeIgniter), JavaScript (ES6+), .NET Framework, ASP.NET Core(MVC, Razor, Web API, Blazor).
E-Commerce	Shopify(Theme, App, Stroefront, Liquid, CLI, Apollo, ThemeKit), Wordpress(Theme, Plugin, API/Headless), Wix
CSS Frameworks	Tailwind CSS, Bootstrap, Bulma, Material UI, Vuetify, SASS/SCSS
Cloud Technologies	AWS (EC2, Lambda, Elastic Beanstalk, S3, Route 53, IAM, CloudWatch, CodePipeline, CodeBuild, SNS, DynamoDB, API Gateway, Fargate, CloudFormation), GCP(App Engine, Cloud Run, GKE, Compute Engine, Cloud Functions, Serverless Computing, BigQuery, Cloud SQL, Cloud Build IAM), Azure(App Service, Functions, Container Apps, Application Gateway, DevOps, AKS, Blob Storage)
Data Analysis	Entity-relationship diagrams, Data Modeling, Normalization, Analytics Platforms (Google Analytics, Adobe Analytics)
DevOps CI/CD	CI/CD pipelines, GitHub Actions, Jenkins, Containerization (Docker), Kubernetes, Infrastructure as Code (Terraform)
OperatingSystems	Linux(Red Hat, CENTOS& SUSE, Mint), Ubuntu, DEBAIN, HP - UX, Aix-Unix, Windows
Version Control Tools	GIT, GITHUB, Subversion (SVN), CVS and Bitbucket
Testing & Quality Assurance	Unit Testing (Jest, Karma), E2E Testing (Cypress, Puppeteer), Performance Optimization (Lazy loading, Code splitting, PWA techniques), SEO (Meta tags, Structured Data, Content Optimization)
Security & Compliance	Cross-site scripting (XSS) prevention, SQL injection prevention, Authentication protocols (JWT, OAuth)
Database Management	SQL Databases (MySQL, PostgreSQL), NoSQL Databases (MongoDB, AWS DynamoDB), Caching (Redis, Varnish)
Other Tools	Code Editors (Visual Studio Code, Sublime Text), Build Tools (Webpack, Gulp), Package Managers (npm, Yarn), Bug Tracking Tools (Jira, Trello), CMS & E-commerce (WordPress, Drupal, Shopify, Magento), WebAssembly

PROFESSIONAL EXPERIENCE

HP – AUSTIN, TX

May 2023 – Feb 2025

Senior Full Stack Engineer

- Led a cross-functional team of 15 developers in the successful delivery of a large-scale web application project, increasing overall development efficiency by 30% within a 12-month timeframe.
- Engineered scalable front-end applications using React.js and Redux, optimizing performance and responsiveness across devices while reducing page load time by 25%.
- Reduced deployment time by 40% by implementing automated CI/CD pipelines using Jenkins and GitHub Actions, streamlining the software delivery lifecycle.
- Migrated monolithic architecture to microservices, leveraging Docker and Kubernetes, resulting in a 30% reduction in server costs and enhanced scalability and maintenance.
- Enhanced application performance by 40% through advanced caching strategies and front-end code refactoring, significantly improving user experience and session durations.
- Integrated GraphQL APIs into a data-heavy platform, decreasing API response times by 40% and boosting frontend performance and flexibility.
- Developed and secured RESTful APIs using Node.js, Express, OAuth2, and JWT authentication, ensuring compliance with industry security standards and best practices.
- Deployed cloud-native applications to Azure, utilizing Azure App Service, Blob Storage, and managed databases to enable secure, scalable, and cost-effective hosting.
- Created and maintained MongoDB schemas and aggregation queries, improving data retrieval efficiency and enabling dynamic content delivery in real-time.
- Conducted thorough unit and integration testing using Jest and Enzyme, achieving 95% test coverage and reducing bug reports by 35% in production releases.
- Mentored junior developers on best practices in React, Git, and CI/CD, improving onboarding speed and team productivity by 20%.
- Implemented secure authentication flows using OAuth2 and JWT, increasing system protection and aligning with compliance requirements (e.g., GDPR, HIPAA).
- Tracked progress and resolved issues with Jira, collaborating closely with product and QA teams to maintain development velocity and meet critical delivery deadlines.

HCLTech – AUSTIN, TX

Mar 2019 – April 2023

Full Stack Developer

- Developed and maintained full-stack applications using React.js, Node.js, and MongoDB, implementing scalable microservices and securing APIs with OAuth2 and JWT, resulting in 40% improved system scalability.
- Architected and containerized microservices with Docker and Kubernetes on Azure Cloud, enabling seamless CI/CD pipelines via Jenkins and GitHub Actions, reducing deployment times by 25%.
- Integrated GraphQL APIs into front-end applications for high-performance data retrieval, reducing response times by 40% and enhancing client-side rendering efficiency.
- Engineered real-time features using WebSockets and RabbitMQ for healthcare and e-commerce platforms, improving interactive capabilities and increasing user retention by 30%.
- Designed and deployed secure authentication mechanisms using Node.js, OAuth2, JWT, and custom middleware, ensuring HIPAA compliance and protecting sensitive health data.
- Developed RESTful and GraphQL APIs, integrating third-party services such as Stripe and Shopify, facilitating payment processing, order fulfillment, and product recommendations.
- Enhanced UI/UX using React.js, Redux, Bootstrap, and Material UI, implementing mobile-first design principles that increased engagement and improved Lighthouse accessibility scores.
- Optimized database queries in MongoDB and PostgreSQL, leveraging indexing, aggregation pipelines, and schema design best practices to improve query performance by 30%.
- Led development of a healthcare application utilizing Python, TensorFlow, and Flask to integrate AI prediction models for COVID-19 and cardiovascular health detection, deployed via AWS services.
- Monitored and improved application performance using Azure Monitor, AWS CloudWatch, and custom logs, identifying bottlenecks and achieving a 20% boost in system responsiveness.
- Collaborated across Agile teams, participating in sprint planning, backlog grooming, and code reviews while mentoring junior developers, boosting team velocity by 20% and reducing technical debt.

- Developed scalable web applications using React.js and Ruby on Rails, integrating PostgreSQL databases and Material UI for a high-performance, intuitive user experience.
- Designed and optimized relational schemas in PostgreSQL, resulting in a 20% increase in query efficiency and improved application responsiveness.
- Built and deployed containerized applications using Docker, ensuring consistent environments and accelerating development-to-deployment workflows.
- Established CI/CD pipelines using Jenkins and GitLab CI/CD, automating code testing, builds, and deployments, which reduced release cycles by 30%.
- Monitored and enhanced system performance, proactively addressing bottlenecks and reducing production issues by 25% through logging and alerting improvements.
- Engineered RESTful APIs to streamline front-end and back-end communication, enabling modular design and improving maintainability across projects.
- Integrated AWS and Azure services including EC2, RDS, and Azure App Service, optimizing infrastructure for cost, performance, and scalability.
- Led unit testing efforts, achieving over 95% test coverage and improving code reliability and regression prevention across all services.
- Implemented OAuth2 and JWT-based authentication mechanisms, enhancing application security and ensuring compliance with modern security standards.
- Collaborated cross-functionally with QA and UI/UX teams during all phases of the SDLC, ensuring quality assurance and alignment with business goals.
- Utilized Material-UI to build responsive UI components, improving accessibility and modernizing the design language across devices and browsers.
- Participated in Agile practices, contributing to sprint planning, daily standups, and retrospectives that improved delivery efficiency by 10%.
- Deployed high-availability backend systems supporting critical business operations, with zero-downtime deployment strategies across multiple environments.
- Continuously upskilled in emerging technologies like container orchestration (Kubernetes), cloud security, and API gateways to align with evolving project needs and reduce future implementation risk.

PAGERIE OFFICIAL - LOS ANGELES
Web Developer

Oct 2014– April 2016

- Developed and maintained full-stack web applications using WordPress, Shopify, Squarespace, and Wix, optimizing e-commerce website performance and user experience.
- Resolved coding errors and optimized website performance, reducing technical issues by 30% and achieving a 25% improvement in page load speed.
- Implemented automated testing frameworks to ensure quality control, reducing post-release bugs and improving system reliability.
- Developed and customized WordPress themes, meeting client requirements and enhancing customer satisfaction.
- Optimized web pages for speed and scalability using caching techniques like Memcached and Redis, reducing load times significantly.
- Designed and deployed mobile-friendly landing pages from Figma/XD mockups, ensuring responsive design across all devices.
- Integrated data visualization tools like Chart.js and Highcharts, enabling marketing teams to leverage insights for data-driven decision-making.
- Collaborated with marketing teams on SEO, PPC, and social media strategies, improving organic traffic and increasing conversion rates.
- Conducted market research and analysis to identify trends, enhance digital campaigns, and inform business decisions.
- Designed and optimized sales funnels and landing pages, improving conversions by 20% through A/B testing and analytics.
- Provided technical support and training to marketing teams, ensuring efficient website management and analytics tracking.
- Implemented cross-browser compatibility testing using Selenium, reducing manual testing efforts and ensuring a consistent user experience.

EDUCATION

Bachelor in Computer Science
Bryant University - Smithfield, USA

April 2008 - May 2012
