Salesforce & Certinia Solutions Architect | CRM/PSA/ERP Implementation Leader | Business & Technical Strategy Consultant

PROFESSIONAL SUMMARY

Enterprise-focused Solutions Consultant and Salesforce/ERP Architect with a strong track record designing scalable, distributed business systems, leading complex technical implementations, and optimizing enterprise application ecosystems. Skilled in integration architecture, API-driven design, data modeling, and modernizing legacy processes into secure, maintainable cloud-based frameworks. Recognized for driving cross-functional transformations, mentoring technical teams, and delivering high-impact solutions that improve reliability, performance, and operational efficiency across global organizations.

SKILLS & COMPETENCIES

- Salesforce Configuration & Administration
- ERP / FinancialForce (Certinia FFA)
- Business Analysis & Requirements Gathering
- Data Migration & ETL
- Process Automation (Flows, Validation, Rules)
- UAT & QA Testing
- Project Management & Agile/Scrum
- Documentation & Training
- Issue Resolution & Defect Analysis
- Reporting & Dashboard Development
- Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Sr. Solution Consultant

Oct 2024 – Present

Certinia

- Architected scalable financial system deployments on Salesforce, aligning multi-org distributed processes into unified, secure cloud-based designs that supported high-volume transactional workloads.
- Led end-to-end solution architecture for ERP engagements, defining integration patterns, API requirements, and data flows to ensure performance, reliability, and long-term extensibility.
- Directed cross-functional project teams while managing delivery risks, ensuring 100% on-time rollout of complex financial modules across global client environments.
- Designed and documented enterprise-grade solution architectures—including data models, automation logic, and system interfaces—ensuring alignment with best practices for modularity and scalability.
- Oversaw multi-stage data migrations, establishing repeatable frameworks that improved accuracy, reduced migration defects by 30%, and supported large structured/unstructured datasets.
- Provided architectural guidance to engineering and product teams, influencing roadmap prioritization and improving implementation consistency across the delivery organization.
- Served as a primary technical advisor for enterprise clients, shaping governance, platform evolution plans, and integration strategies to strengthen long-term system health and security.

Senior Salesforce Consultant

Nov 2021 – Oct 2024

Publicis Sapient

- Defined enterprise CRM architectures for Fortune-level clients, aligning cloud platforms, APIs, data strategies, and distributed workflows with long-term technical roadmaps.
- Led modernization efforts replacing legacy components with scalable cloud-based processes, improving system reliability by 40% and reducing operational inefficiencies.
- Designed modular, API-driven solutions across Sales, Service, and Marketing Clouds to improve interoperability and cross-system communication.
- Built integration frameworks and governed data quality rules that improved cross-platform consistency and reduced integration failures by 25%.
- Delivered architecture-level guidance to engineering teams, ensuring solution designs adhered to security, compliance, and maintainability standards.

- Produced advanced reporting and analytics models enabling real-time executive insights and increasing data-driven decision-making efficiency across business units.
- Supported pre-sales and enterprise solutioning, developing technical architectures and effort models that contributed to securing multiple multimillion-dollar client engagements.

Salesforce Consultant

Feb 2019 – Nov 2021

MK Partners – North Hollywood, CA

- Architected and delivered Salesforce solutions for SMB and enterprise clients—including Lockheed Martin and Emergent BioSolutions—ensuring performance, extensibility, and secure data governance.
- Built modular automation frameworks using Flows and custom components to replace manual operational bottlenecks, reducing processing times by up to 60%.
- Developed integration specifications and collaborated with development teams to implement scalable API-driven connections with external systems.
- Defined multi-year Salesforce technology roadmaps and architectural standards for clients seeking scalable growth and improved platform reliability.
- Designed custom data models, security structures, and process frameworks that enabled unified data visibility and improved system trustworthiness.
- Automated end-to-end business processes—including notifications, escalations, and record lifecycle management—to strengthen system resilience and consistency.
- Implemented role-based access and org-wide sharing rules that enhanced security posture and simplified access governance.
- Ranked as the #1 biller for two consecutive years by consistently delivering high-volume, high-quality implementations across industries.

Implementation Specialist

Aug 2015 – Feb 2019

CAP60 – Woodland Hills, CA

- Provided Tier-1 through Tier-3 technical support, diagnosing system defects and resolving complex issues that improved customer satisfaction and reduced escalation volume by 20%.
- Delivered structured virtual and onsite training programs that accelerated user onboarding and improved system adoption across diverse agencies.
- Conducted recurring performance and system health assessments, surfacing critical insights that drove product and platform improvements.
- Authored detailed technical documentation and step-by-step workflow guides, increasing user self-service efficiency and reducing support requests.
- Produced analytical reports covering usage, performance, and outstanding issues, enabling leadership to identify trends and prioritize enhancements.
- Trained new support team members on system functionality, troubleshooting methods, and communication standards to improve support quality.
- Provided onsite technical support for high-priority agency deployments, resolving complex functional and data issues and stabilizing mission-critical operations.

EDUCATION

Bachelor of Science, Information Technology

Western Governors University

Associate of Arts, Computer Science

Miami Dade College – Miami, FL

LICENSES & CERTIFICATIONS

- Certified Scrum Master
- Salesforce Administrator
- Salesforce App Builder
- Salesforce Sales Cloud Consultant
- Salesforce Marketing Cloud Administrator

TECHNICAL SKILLS

Microsoft Excel • Salesforce Platform • Marketing Cloud • Business Analysis • Data Warehousing • Project Management • Scrum • Jira • UAT • Requirements Gathering
