PROFILE

As a seasoned software engineer, I specialize in contact center technologies with a strong focus on Amazon Connect. I bring extensive experience in designing, implementing, and optimizing solutions that enhance customer experiences and streamline operations. I've successfully led projects involving complex routing, real-time analytics, and seamless integrations with CRM and other enterprise systems. My goal is to leverage the latest advancements in contact center technology to help organizations deliver outstanding customer service and achieve operational excellence

EDUCATION

IMSciences <i>BS Software Engineering</i>	Peshawar Pakistan
Government Degree College <i>FSC - Pre-Engineering</i>	Wana, Paksitan

PROFESSIONAL EXPERIENCE

Omningage <i>AWS Engineer/Amazon Connect</i>	November 2021 – December 2023
• Designed and implemented complex Amazon Connect flows for diverse clients, including configurations for queues, routing profiles, quick connects, and user management, ensuring efficient and tailored contact center operations. • Enabled seamless interaction within AWS Connect by integrating Amazon Lex, thereby enhancing the agent experience with natural language understanding and automated responses. • Integrated AWS Lambda functions with Amazon Connect for various purposes, such as retrieving and dumping data from databases and optimizing data management and operational workflows. • Developed robust APIs and AWS Lambda functions using Node.js, streamlining backend processes and enhancing the functionality of AWS-based applications. • Managed DNS with Amazon Route 53, ensuring reliable and scalable domain name resolution and efficient traffic management for various applications. • Deployed and managed Amazon RDS instances, efficiently handling databases to ensure data integrity, performance, and seamless application functionality.	

- **Designed and implemented secure storage solutions with Amazon S3**, ensuring secure and reliable data storage and access, adhering to best practices in data security.
- **Created and secured Amazon VPC environments**, implementing isolated network resources within Virtual Private Clouds to ensure enhanced security, control, and compliance with organizational policies.

Expertflow - livechat, video, callcenter SW

Software Engineer RTC

January 2024 – present

- Implemented contact center features, including call routing and IVR, improving customer service efficiency.
- Developed and maintained RTC solutions using FreeSWITCH, enhancing call quality and reliability.
- Built RESTful APIs and microservices with Java Spring Boot.
- Integrated FreeSWITCH with third-party systems, enhancing functionality and user experience.

SKILLS		
• AWS	• Amazon Connect	• AWS Lex Bot
• AWS Lambda	• Amazon VPC	• AWS IAM
• Amazon Kinesis	• AWS CloudWatch	• AWS QuickSight
• Jira	• NodeJs	• Java SpringBoot
• FusionPBX	• Freeswitch	• Rest APIs
• Microservices	• SQL Server	• PostgreSQL
• Amazon DynamoDB		

PROJECTS	
OMNINGAGE Connect <i>Powered By Amazon Web Services</i>	November 2021 – December 2023
OMNINGAGE Dashboard <i>Powered by Amazon Web Services</i>	November 2021 – December 2023
CRM Integration With OMNINGAGE (Amazon Connect)	
WhatsApp integration with OMNINGAGE (Amazon Connect)	
VoiceID Integration with OMNINGAGE(Amazon Connect)	
ExpertFlow Post Contact Survey	
ExpertFlow: Voice Recording Solution	
Appointment Application Outlook Integration with Amazon Connect and Lex
