SUMMARY

Motivated Site Reliability Engineer (SRE) with 3+ years of experience in Monitoring, deploying, and managing scalable AWS, Azure, and on-premises platforms. Skilled in enhancing system reliability, automating deployments, and implementing observability solutions to ensure high availability and performance. Proficient in monitoring and logging tools such as Splunk, Datadog, AppDynamics, Grafana, AWS CloudWatch, and the ELK Stack. Hands-on experience with container orchestration (Docker, Kubernetes), CI/CD pipelines, and configuration management tools like Chef and Ansible. Strong expertise in Bash scripting, Python scripting, Java programming, and infrastructure as code (Terraform, CloudFormation). Experienced in cloud migrations, security best practices, and performance optimization to minimize downtime and improve reliability. Authorized to work in the U.S. without sponsorship.

TECHNICAL SKILLS

- | | | |
|------------------|----------------------------|---------------------------------|
| • AWS Services | • Jenkins | • On-call Incidents |
| • Azure Services | • Terraform | • Incident management |
| • Splunk | • CloudFormation | • Root Cause Analysis (RCA) |
| • Datadog | • Azure DevOps | • SLI, SLO, & SLA |
| • AppDynamics | • Git & Bitbucket | • Tool Integration with Jenkins |
| • Aternity | • AutoRABIT | • Bash Scripting |
| • Docker | • Confluence | • Python Scripting |
| • Kubernetes | • Jira & Azure Story Board | • Cloud Migrations |

EXPERIENCE

TCS – CLIENT: METLIFE Site Reliability Engineer

SCRANTON , PA
02/24/2024 to Present

- Analyzed 20+ on-call incidents monthly, identifying recurring patterns and implementing proactive solutions, reducing system downtime by 15%. Conducted regular security audits and vulnerability assessments, strengthening cloud infrastructure resilience.
- Diagnosed and resolved 15+ system issues monthly, reducing mean time to recovery (MTTR) by 10% and enhancing service reliability.
- Configured and optimized Azure Monitor, Splunk, and Grafana to track 99.9% system uptime, improving issue detection efficiency by 30%.
- Led weekly observability reviews, analyzing performance trends, and collaborating with developers to implement optimizations that improved response times by 15%.
- Defined, measured, and monitored SLIs to track system health, maintained SLOs to ensure reliability, and enforced SLAs by proactively addressing gaps and ensuring uptime commitments.
- Developed and maintained CI/CD pipelines using Azure DevOps, ensuring smooth and efficient deployment processes.
- Optimized high-availability and fault-tolerant systems by implementing best practices for load balancing, caching, and failover mechanisms.
- Analyzed system performance, identified bottlenecks, and implemented resilience strategies, reducing application downtime by 20%.
- Utilized Azure Boards for tracking work items, sprint planning, and coordination between development and operations teams.
- Collaborated with Salesforce teams to enhance CRM reliability, improving API response times by 25% through optimized integration workflows.

- Developed and tested disaster recovery (DR) strategies, including failover testing and data backup validation.

TCS – CLIENT: CITI BANK

Site Reliability Engineer

IRVING, TX

10/24/2022 to 02/02/2024

- Monitored system performance and infrastructure health using Splunk, AppDynamics, Grafana, Aternity and AWS CloudWatch.
- Set up Splunk dashboards and alerts for real-time issue detection and proactive resolutions.
- Performed observability reviews, analyzing system performance metrics and discussing findings with development teams to optimize application reliability and efficiency.
- Configured and managed Ansible for automation and Splunk for log aggregation and analysis.
- Utilized Bitbucket and Git for version control and efficient collaboration.
- Defined and maintained SLOs, SLIs, and SLAs to balance reliability and feature development.
- Investigated and resolved production incidents, conducted postmortems, and documented root cause analysis (RCA).
- Implemented capacity planning & performance to optimize resource utilization and reduce downtime.
- Designed and executed DR drills, ensuring 100% compliance with failover and backup validation tests, improving business continuity planning.
- Performed Chaos Engineering & Fault Injection tests to proactively identify system weaknesses.
- Created thematic analysis reports based on on-call incidents, improving future resolution time by implementing proactive measures.
- Participated in on-call support for critical issue resolution and infrastructure troubleshooting.
- Leveraged Starfleet Ansible for automating script deployment across environments.
- Utilized Bitbucket and Git for version control and efficient collaboration.
- Developed self-healing scripts for WASND to automate issue resolution.
- Managed Kubernetes clusters using YAML and JSON for enhanced scalability and resilience.
- Designed and maintained CI/CD pipelines in Jenkins, ensuring efficient software deployment.
- Automated infrastructure provisioning and repetitive tasks using Terraform and Docker.

TECHQUENCH

DevOps Engineer

HOUSTON, TX

10/05/2021 to 08/24/2022

- Architected, deployed, and managed scalable cloud solutions using AWS services (VPC, EC2, S3, CloudWatch, RDS, IAM, Lambda), enhancing operations and security.
- Managed GitLab repositories, including branching, tagging, and permissions, ensuring efficient version control and collaboration. Enhanced deployment processes with Jenkins plugins for AWS, Terraform, Docker, Kubernetes, SSH, Maven, and Git, strengthening automation capabilities.
- Automated routine maintenance tasks using bash shell and Python scripting, integrating CRON jobs for log rotation, database backups, and application updates.
- Contributed to Terraform tasks using HashiCorp Vault and Consul, ensuring consistent and scalable infrastructure provisioning, and utilized Groovy for scripting within Jenkins.
- Experience with HTTP/Proxy servers like Apache and Nginx, as well as Linux package management (rpm, yum, dnf).

EDUCATION AND TRAINING

BACHELOR OF SCIENCE: COMPUTER AND INFO SCIENCE

08/2019 - 08/2022

Lamar University, Beaumont, TX

ASSOCIATE'S DEGREE: COMPUTER AND INFO SCIENCE

01/2017 - 05/2019

Lamar State College, Port Arthur, TX

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Foundational
- Microsoft Certified: Azure Developer Associate (AZ-204)

- Microsoft Certified: Azure DevOps Engineer Expert (AZ-400)
