

BENJAMIN G. VAN PELT

571 Dawley Drive
Fuquay-Varina, NC 27526
United States Citizen
Cell: 704-773-2327 Email: bvanpel@gmail.com

EDUCATION

The University of North Carolina at Charlotte
BA-Software and Information Systems

Completion Date: May 12, 2012

TECHNICAL EXPERIENCE

Operating Systems: MS Windows 10, 2016, 2019, 2022, VMware ESX(i),
Linux Ubuntu, Debian, CentOS

Server Technologies: Active Directory DS, AD CS, ADFS, DNS, WDS, DHCP, IIS, WSUS, Apache HTTP, Apache Tomcat, FTP, SSH, Telnet, Cisco ISE

Scripting/Programing: PowerShell, PHP, HTML, JavaScript, CSS

Web Content Management: Atlassian Jira/Confluence/Bitbucket

Certifications: Security+, ITIL, AWS Certified Cloud Practitioner

Training Courses: Administering Windows Server Hybrid Core Infrastructure (AZ-800)
Microsoft Azure Administrator Training (AZ-104)

INFORMATION ASSURANCE

Penetration Testing: Tenable Security Center (ACAS), Nessus, Nmap, Metasploit, Backtrack, Burp Suite

Policies: SCAP – Use to ensure compliance with DoD STIGs.

STIG -- Review STIG checklists against system settings to ensure compliance.

WORK EXPERIENCE

RMC – NAVAIR (DNA Department)

Systems Administrator

August 2022 – Present

- Support the AIC section of the DNA Department through Windows Systems Administration
- Operation and Maintenance of Windows Domain Controllers
- Operations and Maintenance for Windows Certificate Authorities.
- Support the migration of Network Policy Server related user accounts to a new domain so the service could be provided by the new domain
- Began a project to implement a sustainable RBAC model for the domain.
- Stood up and decommissioned domain controllers.
- Addressed Domain Controller replication issues.
- Migrated Domain Controllers and Certificat Authorities to new VM infrastructure.

SAIC – National Guard Bureau

September 2020 – July 2022

Principal Systems Administrator

- Operations and Maintenance of Windows Domain Controllers located in all 54 States and Territories.
- Operations and Maintenance for Windows Certificate Authorities.
- Implement Group Policy changes for the Enterprise.
- Authorization and deauthorization of DHCP servers across the domain.
- Creation of DFS Namespaces and Replication groups as needed.
- Addition and deletion of DNS records across the domain.
- Differentiate networking issues from DNS issues.
- Implement configuration changes in Active Directory Sites and Services.
- Update ADFS Relying Party Trusts and Claims Provider Trusts as necessary.
- Perform device additions to Cisco ISE for TACACS+ authentication
- Maintain Device Admin Policy Sets in Cisco ISE to control devices Enterprise, State, and Territory administrators are authorized to manage.
- Manage Print server, maintain drivers, add/remove printers as requested.
- Implemented Microsoft OCSP in the environment for certificate validation.

NAVAIR - U.S. Navy, Patuxent River, MD

January 2015 – September 2020

Systems Administrator (DS-05)

- Maintain Active Directory Group Policy, DHCP, DNS.
- Setup, configure, and secured Domain Controllers for disconnected networks.
- Identified and provided solutions for authentication issues related to Domain Controllers for the enterprise.
- Implemented Distributed File System (DFS) for the Enterprise with servers at remote locations to ensure fast local file access.
- Implemented proper permissions through security groups for the DFS ensuring only those who should have access to resources do.
- Installed and configured Windows print server for the Enterprise.
- Use Windows PowerShell scripting on a daily basis to accomplish job duties.

- Setup and maintain IIS servers that run WSUS and Local Help Desk application.
- Perform configuration changes for IIS, Apache HTTP, and Apache Tomcat to meet security requirements including encryption algorithm, cipher, and certificate settings.
- Performed basic configuration for some Cisco Switches for offline system imaging as well as for some disconnected networks.
- Perform patch management of Windows Infrastructure through WSUS and Ivanti Security Controls.
- Assist with design and management of ESX virtual servers and vCenter with Dell EqualLogic SAN backend storage.
- Setup Windows Deployment Server for PXE boot imaging of workstations.
- Analyze scan results in ACAS (Assured Compliance Assessment Solution) and remediate findings as necessary.
- Work with IA team to fully meet NAVAIR, Navy, and DOD INFOSEC requirements.
- Assist in policies and procedures to ensure information systems reliability and accessibility and to prevent and defend against unauthorized access to systems, network and data.
- Participate in computer security inspections and surveys which ensure that all systems meet INFOSEC requirements and ensures that requirements are met for formal accreditation in order to support mission IT requirements.
- Diagnose and resolve user community issues related to IT assets that are elevated through local help desk.
- Analyzed systems to determine new capabilities that can be utilized to improve efficiency
- Evaluated IT asset procurements for printers, servers, and workstations against customer requirements
- Helped design processes that prevent errors and ensure accuracy of an asset management database
- Assisted in maintaining backups used for restoration of operating systems to normal operations after a system failure
- Continued performing Systems Administration responsibilities from J.F. Taylor position now as Civil Servant.

J. F. Taylor Inc., Lexington Park, MD

April 2013 – January 2015

Systems Administrator/Information Assurance

- Assisted in Unclassified network accreditation tasks.
- Work with System Administrators to ensure best practices are implemented on systems and that those systems are STIG (Security Technical Implementation Guide) compliant.
- Wrote script to implicitly deny all USB drives mount permissions to computers and only allow, in a white listing fashion, authorized USB devices to be mounted on Linux systems
- Analyzed Retina scan results and supplied required fixes.
- Documented false positive Retina findings.

SYPRIS ELECTRONICS, Tampa, FL

June 2011 – August 2011

Summer Intern

- Completed research and development on the Cyber Security team including the development of an International Cyber Range.
- Learned Cisco switch configuration and developed an application to help administer Cisco switch configuration in PHP.

CAROLINA CROSS CONNECTION, Charlotte, NC

May 2009 – August 2009

Field Coordinator

- Led a team of eight individuals on five home improvement projects
- Created task plans and acquired resources to complete the jobs
- Interviewed homeowners and assessed the improvements needed
- Utilized attention to detail and administrative skills

MEMBERSHIPS

Southeast Collegiate Cyber Defense Competition (CCDC), Kennesaw State University

Spring 2011, Spring 2012

- Competed with UNC Charlotte Students to defend, manage, and retain services within a network while being attacked by Red Team.
- Helped with formulation of reports for various business injections and security events that took place during the competition
- Winners of the South East Division in Spring 2012

Scholarship For Service Program, UNC Charlotte

Fall 2010 – Spring 2012

- Perform cutting edge research about today's information security issues

49th Security Division, UNC Charlotte

Spring 2009 – Spring 2012

- Learn about the latest computer security vulnerabilities and improve recognition of these risks in systems
- Helped create CTF server for Cyber Security Symposium

International Capture the Flag (ICTF), UNC Charlotte

Fall 2008- Fall 2011

- Helped setup VPN
- Participated in finding and exploiting vulnerabilities.

CONFERENCES

CarolinaCon, Raleigh, NC

Spring 2010 – Spring 2011

- Participated in conference's CTF challenges
- Attended informative talks involving malware analysis, vulnerability identification, and more.

ShmooCon, Washington, DC

Spring 2011

- Participated in conference's CTF challenges

- Attended informative talks involving malware analysis, vulnerability identification, and more.

Charlotte Metro Information Systems Security Association (ISSA)

Fall 2009 – Spring 2011

- Attended informative talks involving malware analysis, vulnerability identification, and more.

OWASP AppSec USA, Minneapolis, MN

Fall 2011

- Attended informative talks on web application security.
- Participated in University Challenge held at the conference and achieved first in defense.

HONORS & AWARDS

Chancellors List: Fall 2008, Fall 2011, Fall 2012

Dean's List: Spring 2009, Fall 2009, Spring 2010, Spring 2011
