PROFESSIONAL SUMMARY

Highly analytical and detail-oriented Business Analyst with strong experience in **SQL, Excel, and Power BI** for data extraction, analysis, and reporting. Proficient in gathering and analyzing large data sets to provide actionable insights that drive business decisions. Adept at collaborating with stakeholders to translate business needs into technical solutions while ensuring data integrity, governance, and reporting processes. Experienced in working with financial and business data to optimize processes and improve operational efficiency.

TECHNICAL SKILLS

- **Programming & Databases:** SQL, Python, R, MySQL, MongoDB
- **Data Analytics & Visualization:** Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP)
- **Project Management & Tools:** Agile, Scrum, SDLC, Jira, Confluence, ITSM, Microsoft Dynamics 365
- **ERP & CRM Systems:** SAP, Salesforce, Lean Six Sigma
- **Business Intelligence & Reporting:** Data Mining, Predictive Analytics, Trend Analysis

PROFESSIONAL EXPERIENCE

Ideate Technologies | Business Analyst – February 2025 - Present

- Collected, cleaned, and transformed large datasets to ensure data accuracy and readiness for analysis.
- Developed and maintained **dashboards in Power BI and Excel**, providing actionable insights for stakeholders.
- Built statistical models to analyze trends and support forecasting of business outcomes.
- Automated recurring data reporting processes, reducing manual efforts by 30% and ensuring timely insights delivery.
- Wrote **SQL queries to extract, manipulate, and manage data** from relational databases for analysis and reporting.
- Collaborated with **cross-functional teams** to define KPIs and deliver data-driven recommendations.
- Ensured data integrity and compliance with internal governance and privacy policies.
- Supported the deployment and adoption of analytics tools by training business users and resolving tool-related issues.

Springer Capital | Data Analyst and Automation - August 2024 - November 2024

- Utilized **SQL** to query and analyze large recruitment platform data sets, providing insights to enhance decision-making.
- Automated data workflows using **Power Automate**, integrating data from **SharePoint** and **Microsoft Forms**.
- Developed interactive dashboards in **Power BI**, visualizing key business metrics to support executive decision-making.
- Ensured data integrity through rigorous testing and validation, aligning with business process optimization strategies.
- Conducted predictive analytics on recruitment platforms like **Indeed** and **Handshake** to identify hiring trends.

Svastha Foods and Nutrition | Business Analyst - February 2021 – April 2023

- Conducted **sales trend analysis** across multiple product lines to identify growth opportunities and seasonal performance shifts.
- Analyzed **customer purchasing behavior and demographic segmentation** using Excel and SQL, supporting targeted marketing strategies.
- Collaborated with **cross-functional teams** including Product Development, Marketing, and Operations to align analytics with business goals.
- Designed **interactive dashboards in Power BI and Excel** to provide real-time insights into sales performance, product demand, and customer preferences.
- Facilitated regular meetings with stakeholders to **present analytical findings** and translate business needs into technical requirements.
- Created and optimized **SQL queries** for customer and sales data analysis, enabling better forecasting and demand planning.
- Improved operational efficiency by **automating reports and analytics workflows** using Excel macros and VBA.
- Supported **pricing and promotional strategy decisions** by evaluating product-level margins and customer response metrics.
- Contributed to supply chain optimization by analyzing sales-to-inventory ratios and recommending stock level adjustments.

PROJECTS

Financial Data Analysis using Excel & Power BI

- Built **automated Excel reports** using pivot tables, macros, and Power Query to streamline financial reporting.
- Developed **Power BI dashboards** integrating data from SQL databases to track financial KPIs and forecasting trends.
- Designed interactive visualizations to assess revenue performance, cost analysis, and budgeting insights.

Inventory Management & Optimization

- Designed an **Excel-based inventory tracking system** with dynamic charts to monitor stock levels in real-time.
- Utilized **SQL queries** to extract inventory data and created predictive models for demand forecasting.
- Built a **Power BI dashboard** to visualize supplier performance, reducing stock shortages by 20%.
