SUMMARY

QA Automation Engineer with 5+ years of experience in designing and implementing robust automation frameworks for **web, mobile, and API applications** using tools such as **Selenium, Cypress, Playwright, Appium, and Karate DSL**. Skilled in **API, performance, and security testing** with tools like **Postman, Rest Assured, JMeter, and OWASP ZAP**, and experienced in integrating automated testing into **CI/CD pipelines** using **Jenkins, GitHub Actions, GitLab, and Azure DevOps**. Proficient in **cloud-based and containerized testing** with **AWS Device Farm, Browser Stack, Docker, and Kubernetes**, ensuring scalable and efficient test execution. Strong collaborator within **Agile and DevOps teams**, focused on **shift-left testing**, early defect detection, and continuous improvement to enhance product quality and reliability across all phases of software development.

SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript, SQL, .NET
- **Automation Testing Tools:** Selenium WebDriver, Cypress, Playwright, Appium
- **API Testing Tools:** Postman, Rest Assured, Swagger, Karate DSL
- **Test Frameworks:** TestNG, JUnit, pytest, Cucumber
- **Performance Testing:** JMeter, LoadRunner, Gatling
- **Security Testing:** OWASP ZAP, Burp Suite
- **Build & CI/CD Tools:** Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, Maven, Gradle
- **Version Control:** Git, GitHub, Bitbucket
- **Cloud & Containerization:** AWS Device Farm, Browser Stack, Sauce Labs, Docker, Kubernetes
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Test Management & Bug Tracking:** JIRA, TestRail, Zephyr, Xray, Azure DevOps
- **Development Methodologies:** Agile, Scrum, Kanban, Shift-Left Testing, Continuous Testing
- **Other Skills:** SDLC & STLC understanding, Regression Testing, Smoke & Sanity Testing, Cross-browser & Cross-platform Testing

WORK EXPERIENCE

DXC Technology

Aug 2024 – Present

QA Automation Engineer

- Spearheading QA automation for the **Cloud Transformation Platform**, a multi-cloud management solution enabling seamless workload migration and monitoring across **AWS**.
- Developed end-to-end **Cypress** and **Playwright** automation frameworks integrated with **GitHub Actions CI/CD** pipelines to ensure continuous validation of **UI** and **service components**.
- Designed and executed **Karate DSL-based API** test suites for **microservices**, validating **REST** and **GraphQL** endpoints across distributed environments.
- Implemented containerized test execution using **Docker** and **Kubernetes**, optimizing scalability and reducing environment setup time by over **50%**.
- Collaborated within **Agile DevOps** teams to drive **shift-left testing**, embedding automated checks into build pipelines for early defect detection and faster feedback loops.
- Enhanced test coverage and reliability through **cloud-based orchestration** and **cross-browser execution** on **AWS Device Farm** and **BrowserStack**, improving overall test reliability metrics by **30%**.

Dell Technologies

Jan 2019 – Feb 2022

QA Automation Engineer

- Designed **automation frameworks** for the **EMC Online Support Portal Automation** project, streamlining end-to-end testing of enterprise support modules for **product registration, ticket management, and firmware updates**.
- Implemented a **Selenium WebDriver-TestNG** framework integrated with **Jenkins**, improving test coverage by **60%** and accelerating release validation through automated nightly runs.
- Developed **data-driven test scripts** in **Java** and **SQL** to validate large-scale datasets across multiple backend systems, ensuring data consistency and accuracy.
- Automated **REST API** validations using **Postman** and **Rest Assured**, enhancing integration coverage between frontend and service layers.
- Performed **performance testing** with **JMeter** to analyse portal scalability and identify response time bottlenecks under concurrent user loads.
- Conducted **security testing** and vulnerability scans using **OWASP ZAP**, ensuring compliance with Dell's **secure development lifecycle** and data protection standards.
- Collaborated with developers and **DevOps** teams to integrate test execution within **Jenkins** and **GCP CI/CD pipelines**, achieving

40% faster release validation across hybrid cloud environments.

- Utilized **JIRA** and **TestRail** for **test management** and **traceability**, increasing defect triage efficiency by **25%** and maintaining full alignment with **Agile** sprint deliverables.
- Delivered **cross-browser automation** suites ensuring consistent functionality across **Chrome**, **Firefox**, and **Edge**, enhancing the global user experience.

Trigent

Jan 2018 – Dec 2018

QA Automation Engineer

- Spearheaded the automation of **Android** and **iOS** test cases using **Appium** with **Python** to enhance testing efficiency and coverage.
- Designed and implemented a robust **mobile automation framework** incorporating **modular**, **data-driven**, and **reusable components** to support rapid regression cycles.
- Collaborated closely with developers and product owners in an **Agile/Scrum** environment to define acceptance criteria and ensure early defect detection through **Shift-Left Testing**.
- Conducted **performance** and **load testing** using **JMeter**, validating app responsiveness and stability under concurrent transaction loads.
- Integrated automated test suites into **Azure DevOps CI/CD pipelines**, enabling continuous testing across builds and reducing release verification time by **40%**.
- Executed **cross-platform** and **cross-device testing** using **BrowserStack**, ensuring UI consistency and functional accuracy across multiple OS versions.
- Analyzed test results, identified root causes, and collaborated with development teams, driving a **20%** reduction in defect leakage across production releases.
- Championed the adoption of **automation best practices**, **code reviews**, and **version control** through **Git**, improving maintainability and team collaboration.

PROJECTS

Smart Pay FinTech Web Automation

- Built automated test suites using **Cypress** with **TypeScript** to validate payment workflows, authentication logic, and transaction APIs for a FinTech web portal.
- Integrated **Allure reporting** and **Dockerized test environments**, enabling consistent execution across **CI/CD pipelines** and improving overall test efficiency.

MediTrack Healthcare Portal Automation

- Developed end-to-end automation for a healthcare management portal covering **patient records**, **appointment scheduling**, and **insurance verification** workflows.
- Implemented **API testing** using **Karate DSL** and **Postman** to validate **FHIR-based healthcare APIs** and ensure **HIPAA compliance**.
- Integrated **Selenium** and **Playwright** for **regression** and **UI automation** within **continuous delivery pipelines**.

Retail Hub eCommerce Automation Suite

- Automated **checkout**, **cart**, and **recommendation modules** using **Selenium** with **Cucumber BDD**, improving regression efficiency and ensuring a stable user experience across multiple browsers.
- Configured **Jenkins CI/CD** pipelines with **Extent Reports**, enabling **continuous test execution**, **detailed reporting**, and seamless integration with **Agile sprint releases**.

EDUCATION

- **Bachelor of Technology in Computer Science**
Hindustan Institute of Technology and Science | **GPA: 3.86**

August 2015 – April 2019
