(303) 630-9987
Boulder, Colorado

Senior Full-Stack Engineer with 14+ years of experience specializing in Python backend engineering, high-scale distributed systems, API architecture, data processing pipelines, and cloud-native platforms. Expert in Django, FastAPI, Flask, and asynchronous Python ecosystems; proven track record improving system performance by up to 70%, reducing operational costs, and designing microservices used by millions of users. Strong background across the stack with production experience in JavaScript/TypeScript, C#, Ruby on Rails, and Go, combined with advanced cloud expertise (AWS, GCP, Kubernetes). Known for stabilizing complex systems, mentoring teams, and delivering clean, scalable, cost-efficient solutions.

Work Experience

Senior Software Engineer

Jun 2020 - Present

Atlassian | Boulder, Colorado

- Developed FastAPI microservices powering Jira analytics pipelines, reducing report generation times from 10 min → 3.5 min (65% faster).
- Built a Go service for real-time issue indexing, improving search performance 42%.
- Optimized React front-end dashboards used by 6M+ daily users, reducing load times 58%.
- Migrated backend services to Node.js/Nest.js microservices, improving API latency 47%.
- Built internal CI pipelines (GitHub Actions -> Kubernetes), reducing deployment times by 60%.
- Enhanced internal Rails admin tooling, improving deployment workflows by 23%.

Senior Full-Stack Engineer

Mar 2016 - May 2020

SalesLoft | Denver, Colorado

- Designed Python event-driven pipelines processing millions of customer events daily, increasing throughput 2.8x.
- Maintained internal Ruby on Rails analytics systems, reducing operational overhead 31%.

- Built Node.js microservices supporting 40M+ daily API requests, improving response times 52%.
- Delivered React/Next.js dashboards for internal teams, improving workflow efficiency 29%.
- Reduced cloud costs by 28% through container optimization and autoscaling policies.

Software Engineer

Jan 2013 - Feb 2016

Shopify | Ottawa, Canada

- Developed Python ingestion pipelines processing 1.5TB/day with 99.5% reliability.
- Built Python background workers for fraud detection and transaction scoring (1M+ events/hr).
- Implemented merchant tools in Ruby on Rails, improving billing system stability 38%.
- Migrated AngularJS apps to React, improving frontend load performance 43%.
- Automated testing with Pytest/Jest, reducing production bugs 33%.

Junior Software Engineer

Jun 2010 - Dec 2012

Adobe | San Jose, California

- Built Python automation scripts and batch processing tools, increasing processing speed 3x.
- Developed internal dashboards with Angular + Rails APIs, saving 15–18 hours/week of manual reporting.
- Built C# internal tools improving workflow efficiency 22%.
- Optimized SQL queries and backend processes, reducing error rates 25%.

Core Skills

Python Ecosystem: Django, FastAPI, Flask, Celery, RQ, SQLAlchemy, PyTest, Pandas, NumPy

JavaScript & Frontend: Node.js, React, Next.js, Vue, Angular, TypeScript

Backend: C# (.NET), Ruby on Rails, Go, REST, gRPC, GraphQL

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ, Kafka, SQS

Cloud & DevOps: AWS (Lambda, ECS, EC2, S3), GCP (GKE, Pub/Sub), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions

Architecture & Practices: Microservices, event-driven systems, distributed systems, TDD, Agile/Scrum, CI/CD, mentoring

Practices: TDD, Agile/Scrum, mentoring, SDLC, documentation

Education

University of Colorado Boulder

Sep 2005 - May 2010

B.S. Computer Science
