PROFESSIONAL EXPERIENCE

Software Development Engineer

Mar 2022 – Apr 2023

CrimsonAI, India

- *AI-Driven Microservices Development:* Design and deployed microservices, Grammar Checker and Journal Finder, utilizing Python, Java and LLMs. Achieved a 13% accuracy improvement using computer vision methods and successfully integrated with PostgreSQL.
- *Real-Time Data Pipelines:* Implemented Kafka, Celery, and RabbitMQ to ensure real time data processing.
- *Cloud Security and Compliance:* Onboarded all cloud platforms(Azure, Google, AWS), databases and management tools(Jira, slack) using OAuth2.0 security to conduct PII vulnerabilities to data protection standards.

Associate Software Engineer

Apr 2021 – Mar 2022

MeasureOne Solutions, Remote, USA

- *Service Development:* Designed and developed services for Image, PDF, and HTML formats using Node.js and Python.
- *Enhanced Parsing:* Utilized TensorFlow and OpenCV to enhance accuracy by 20% and reduced operational costs.

Software Engineer

Jun 2017 – Apr 2021

WeEnggs Solutions, India

- *Full-Stack Development:* Developed the service's frontend using React.js, ensuring a seamless user experience. Built the backend using Deno.js, initially integrating with MongoDB for data management, and later migrated to PostgreSQL to enhance data scalability by 30% and reliability by 25%.
- *Cloud Security:* Secured cloud platforms for encryption, access controls, and vulnerability mitigation.
- *CI/CD Pipelines:* Using docker for CI/CD jobs, ensuring consistent and reliable execution of build, test, and deployment tasks.

SKILLS

Programming Languages: Java, Python(Flask), Javascript, Node.js, Deno.js, MATLAB, React.js.

Databases: SQL, NoSQL, PostgreSQL, MongoDB, Redis.

Data Processing: Kafka, Celery, RabbitMQ.

Cloud Platforms: Azure, AWS(EC2, S3, Lambda, IAM).

Security Tools: Microsoft Presidio, OAuth, RESTful APIs, GraphQL, Swagger/OpenAPI, Nmap, Metasploit.

CI/CD Tools: GitLab CI, Docker.

Libraries/Frameworks: TensorFlow, OpenCV, Cheerio, Tabula, Puppeteer, Aspose.

Automation: Cron jobs, Shell scripting.

EDUCATION

Master of Science in Cybersecurity

Yeshiva University, USA

- *Relevant Courses:* Advanced Algorithms, Architecture of Secure OS, Network, Data and Communication Security, Cloud security.

Masters of Engineering in Information Technology

Gujarat Technological University, India

- *Relevant Courses:* Cloud Computing, IoT, Soft Computing, Big Data Analytics, Advanced Data Structure, Mathematical Foundation of Computer science, Operation Research, Artificial Intelligence.

PROJECTS & ACHIEVEMENTS

Graduate Aptitude Test in Engineering (IIT Madras)

Mar 2022

- All India Rank - [9673](#).

SmartRoadTrip

- Developed an algo using real-time traffic data, ML, Google Maps API, and MongoDB for efficient route optimization.

Image Steganography Security Algorithm

- Developed a spatial steganography algorithm as crypto hashing and lossless compression.

Research Paper

May 2020

- Published paper in the Springer nature Journal (ICDSIA-2020) [ISSN: 2367-4512](#).

Ransomware Incidence Playbook

- Developed a ransomware incident response playbook using MITRE ATT&CK framework and SIEM tools.
