

CHRISTIAN JOHNSON

Humboldt, TN • Open to Remote

Senior UKG Integrations Consultant | Boomi Integration Developer | UKG Pro SQL & UKG Pro WFM

SUMMARY

Senior UKG integrations consultant with end-to-end ownership of integrations across UKG Pro SQL, UKG Pro Workforce Management (WFM), and Boomi. Architect and operate UKG Pro SQL export footprints—views, parameters, validation patterns, and schedules—that power Boomi processes, vendor interfaces, and reporting. Delivered 40–50+ production Boomi integrations across employee, payroll, time, accrual, and WFM domains and led stabilization of complex WFM automations including sick accrual reset, cash-out workflows, mass leave approval, and service-limit-safe leave resets for 1,000+ employee environments. Career background includes 400–500 SQL/export projects earlier in tenure, bringing high-volume delivery discipline and pattern-based thinking suitable for enterprise-scale work and partner-facing engagements.

CORE SKILLS

Boomi Integration Development (Maps, Groovy) - UKG Pro SQL - UKG Pro WFM APIs - JSON/XML - REST - SFTP - Batch Processing - WFM Case Automation - Accrual Logic - High-volume performance - Debugging - Data Transformation - Integration Testing

PROFESSIONAL EXPERIENCE

Covalence — Senior UKG Integrations Consultant (UKG Pro + UKG Pro WFM) | Sept 2024 – Present

Build and support UKG Pro SQL and UKG Pro WFM integrations using Boomi and UKG APIs. Deliver mapping, configuration, testing, and production rollout while assisting a small internal team.

- Delivered 40–50+ Boomi integrations across employee, payroll, accrual, time, and WFM domains.
- Completed 12 full end-to-end integrations for one enterprise client.
- Built custom WFM automations: Sick Pay Cash-Out & Accrual Reset logic; Mass Time-Off Case Approval automation.
- Troubleshoot API limits, CRT behavior, duplicate case logic, ReferenceID mismatches, and batch failures.
- Designed and expanded SQL export views, parameters, and validation layers to support Boomi workflows.
- Created reusable Boomi mapping/caching patterns stabilizing WFM integrations for 1,000+ employee clients.

Coligos — Integration Specialist | 2021 – 2024

Delivered an estimated 400–500 SQL export and integration projects across payroll, benefits, and timekeeping domains. Owned SQL-driven data preparation and outbound file logic for vendor feeds, created repeatable mapping and validation patterns, and supported high-throughput project queues and production support for multi-system environments.

PROJECT HIGHLIGHTS (Boomi + UKG Pro WFM)

- Sick Accrual Reset Automation: Automated caps and overflow using batch-safe Boomi logic and WFM APIs.
- Mass Leave Case Approval Workflow: Consolidated duplicate cases and ensured correct End Date matching.
- High-Volume Leave Reset Toolkit: Caching/mapping strategies preventing "service limits exceeded" errors.

OTHER EXPERIENCE

IT & Technical Roles (2018–2021): Support, troubleshooting, configuration, workflow logic, and early integration exposure.
