

Cladia Nanjo

Database Administrator

Dallas, TX | +1 (469)475-1235 | nanjocladia52@gmail.com | [Linkedin](#)

SUMMARY:

Highly skilled and results-driven MS SQL Server Database Administrator with over 6+ years of progressive experience managing mission-critical enterprise databases in on-premises, hybrid, and cloud environments. Expertise includes MS SQL Server versions 2012–2022, Azure SQL, and PostgreSQL, with a strong background in database design, installation, configuration, migration, security, and optimization of large-scale systems. Adept at configuring and supporting high availability and disaster recovery (HA/DR) solutions, performing advanced performance tuning, monitoring, and troubleshooting to ensure 99.99% uptime. Proficient in automation, DevOps practices, and CI/CD pipelines for database deployments, as well as ETL processes, business intelligence reporting, and secure data management. Experienced collaborating with cross-functional teams in fast-paced enterprise environments, delivering robust, scalable, and compliant solutions aligned with organizational goals.

SKILLS:

- **Databases:** SQL Server (2012–2022), Azure SQL, PostgreSQL
- **Cloud Platforms:** Microsoft Azure (SQL Managed Instance, Azure VMs, ADF, AD Integration)
- **High Availability / DR:** Always On Availability Groups, Log Shipping, Replication, Mirroring, Failover Clustering
- **Security:** TDE, Always Encrypted, Row-Level Security, Data Masking, RBAC, Compliance (SOX, HIPAA)
- **ETL & BI Tools:** SSIS, SSRS, SSAS, Power BI, Azure Data Factory
- **Scripting & Automation:** T-SQL, PowerShell, Automation Jobs, CI/CD (Azure DevOps, GitHub Actions)
- **Monitoring & Tools:** SQL Profiler, Extended Events, Query Store, SolarWinds, Idera, Grafana, Prometheus
- **Other Skills:** Database Design, Query Optimization, Performance Tuning, Backup & Recovery, Data Governance, Capacity Planning, Kubernetes (for DB deployments), Terraform (IaC)

EXPERIENCE:

MS SQL Server Database Administrator Uber

| Feb 2023 – Present

- Installed, configured, and managed enterprise SQL Server environments across multiple versions (2012–2022), supporting high-performance production and development systems.
- Designed and implemented Always On Availability Groups in multi-node cluster environments, ensuring high availability and disaster recovery for critical business applications.
- Planned, executed, and validated SQL Server migrations and upgrades to newer versions and cloud platforms, including seamless transition to Azure SQL Managed Instances.
- Developed and enforced backup and recovery strategies, meeting RPO/RTO requirements and enabling quick disaster recovery with minimal data loss.
- Enhanced database security through advanced encryption technologies such as TDE, Always Encrypted, and Dynamic Data Masking, safeguarding sensitive and regulated data.
- Performed query tuning and database optimization by leveraging Query Store, DMVs, Extended Events, and third-party tools, achieving significant improvements in system performance.
- Automated key DBA tasks (backups, patching, monitoring, deployments) using PowerShell scripts and Azure DevOps pipelines, reducing manual errors and improving efficiency.
- Designed, built, and optimized ETL workflows with SSIS and Azure Data Factory, ensuring seamless data movement, transformation, and integration into reporting systems.
- Created, deployed, and maintained SSRS/Power BI reports to provide actionable insights for business stakeholders across departments.
- Partnered with infrastructure, application, and development teams to support a 24/7 production environment, meeting strict SLAs and uptime requirements.

- Monitored database health and resource utilization with SolarWinds, Idera, and Grafana dashboards, proactively identifying performance bottlenecks.
- Contributed to cloud adoption initiatives, including hybrid deployments and secure integrations with Azure Active Directory and Azure Virtual Network.

SQL Database Administrator

| Aug 2019 – Jan 2023

DXC Technology

- Administered and supported 100+ SQL Server databases across production, test, and development environments, ensuring stability, reliability, and high availability.
- Implemented and managed HA/DR solutions including Always On Availability Groups, replication, mirroring, and log shipping, reducing downtime and ensuring business continuity.
- Planned and executed SQL Server migrations and version upgrades from legacy systems (2008/2012) to modern versions (2016/2019), applying patches and cumulative updates.
- Developed and automated maintenance jobs (index rebuild/reorganize, DBCC checks, statistics updates, backups, and cleanups), resulting in better performance and reliability.
- Built and optimized complex T-SQL scripts, stored procedures, triggers, views, and functions, improving query response times and system scalability.
- Designed and deployed SSIS packages and ETL pipelines to automate data integration, transformation, and reporting tasks across multiple systems.
- Supported Azure SQL Databases, Managed Instances, and SQL VMs, assisting with cloud migration strategies and hybrid deployments.
- Collaborated with application teams to improve database schema design, code reviews, and query optimization efforts, ensuring efficient development practices.
- Implemented data security and compliance controls, including RBAC, encryption keys, Active Directory group policies, and auditing based on organizational and regulatory standards.
- Monitored system performance with SQL Profiler, Extended Events, Query Store, and SolarWinds, generating reports and recommending improvements for capacity planning.
- Achieved optimal utilization of computing resources by partitioning large tables, compressing indexes, and configuring file groups, reducing storage costs and improving performance.
- Documented database policies, procedures, and runbooks, and mentored junior DBAs to strengthen team knowledge and operational efficiency.

EDUCATION:

Bachelor's in Accounting

University Of Bamenda

CERTIFICATIONS:

Microsoft Certified: Azure Database Administrator Associate

ITIL Foundation (in progress)
