Quality Assurance Engineer 2

09/2016 – 03/2017

Expeditors. Seattle, WA

Customs and Compliance team.

Tested internal tools to verify accurate data flow transfer across systems for business critical compliance and operational management for large worldwide logistics firm. Created test plans and test strategies and monitored test results to validate functionality, performance, reliability, stability, security and compatibility with legacy and internal systems. Tested web applications on desktop platforms. Tested legacy applications in a UNIX environment and Java web applications. Designed and executed manual and automated tests, including performance, regression, functional, API, acceptance and many other tests. Tested web sites and RESTful web service APIs with Selenium, JMeter, JavaScript debuggers, JSON, XML. Tested server-side of data-driven web applications with SQL. Solid experience in bug reproduction, bug verification and issue reporting and tracking. Agile work experience, participated in daily stand-ups and sprint planning.

Senior Software Test Engineer

07/2006 – 09/2016

InventWorld. Seattle, WA

Led product testing and customer acceptance efforts. Prioritized customer feedback issues, drove resolutions, in-field customizations, user education, SaaS usability and support programs.

Managed demo and pilot programs, coordinated customer engagement and product improvement efforts. Tested video broadcasting and web applications on desktop and mobile platforms.

Designed and executed manual and automated tests, including white-box, custom-build, instrumented build, debugging, profiling, performance, uptime, regression, functional, unit, API, stress, release management, updates, customer acceptance and many other tests. Experience through complete product cycle of multiple projects. Tested dll functions with Visual Studio C++. Tested web sites and RESTful web service APIs with Selenium IDE, Selenium WebDriver, JUnit, Java, Eclipse, JMeter, SoapUI, JavaScript debuggers, JSON, HTML, CSS. Tested server-side of data-driven web applications with MySQL, PHP, Apache. Tested on Android and iOS, including Appium automations. Tested on Android emulator and iOS simulator, used Android Studio and Xcode.

Software Test Engineer 3

04/2004 – 07/2006

Microsoft (via Volt). Redmond, WA

Office Communicator team.

Microsoft Windows Messenger 5.1 QFE and Microsoft Live Communications Client (LCC) 2005. Designed and executed manual tests and C# automations, for functional, BVT, unit, stress, load, regression, white-box, private build, and performance tests. Performed QFE and regression testing against beta and live product. Performed installation and setup on Win 2000/XP/Vista/.Net Server/Tablet PC/etc. Configuration testing of Live Communications Client. Consulting beta customers. Bug/Specs reviewing, writing test plans. Managed and tested large test plan of 2000+ test cases. Log verification. Testing WM5.1 and LCC clients for English, German, French, Japanese, Simplified and Traditional Chinese, Korean and Russian locales. Performed the whole test cycle from project start to release to customers. Tracked, analyzed, reproduced and profiled bugs related to .Net backend.

Software Test Engineer 2 12/2002 – 12/2003 Microsoft (via Volt). Redmond, WA
Windows International team.

Bilingual Software Test Engineer (French) for System Management Server 2003 localization testing. Developing and executing test cases, debugging system problems in multi-lingual versions of server applications. Performed the whole test cycle from project start to release to customers. Verified installation and setup procedures on IIS and SQL servers, performed configuration testing of SMS application on Win 2000/2003 Server and client sides on Win98/NT/2000/XP/2003. Performed QFE and regression testing against beta and live product. Consulting beta customers. Bug/Specs reviewing, writing test plans. Managed and tested large test plan of 1000+ test cases. Log verification. Testing SMS clients for English, German, French, Simplified and Traditional Chinese, Korean and Russian locales.

Software Test Engineer 08/2001 – 08/2002 Microsoft (via Volt). Redmond, WA
MSN team.

Primary tester for three MSN Toolbox internal Microsoft web applications, built to create and schedule promotional ads cross all MSN web sites and marketing tools such as Sidebars, Resource Center. Validated GUI layout, design and functionality of promotional and marketing tools such as Sidebars, Resource Center. Verified installation and setup procedures on IIS and SQL servers, performed configuration testing for several web sites on multiple OSs and browsers. Tested web code (HTML and JavaScript) on supported browser matrix on client systems (Windows and Mac). Tested web servers capacity and performance under stress conditions using Web Application Stress tool and Loadgen. Performed functional/BVT/unit/stress testing. Tracked, analyzed, reproduced and profiled bugs related to Backend (Oracle 8.0.5/8.1.7 and MS SQL Server 2000/7). Post-implementation support of promotional and marketing tools (Sidebars, Resource Center). Performed QFE and regression testing against beta and live sites. Consulting beta customers. Bug/Specs reviewing, writing test plans and test cases (Tactics2). XML and ASP Code verification. Analyzed log files.

Support Engineer 01/2001 – 04/2001 Vision Compass. Seattle, WA
Supporting Enterprise Collaboration, Resource Planning and Performance Management products.

Testing multi-server products, replicating bugs, writing detailed reports. Consulting customers. Providing workarounds. Installation of Win NT4 Servers, SQL Servers, Exchange Servers, IIS, Microsoft Transaction Server (MTS), and three parts of Vision Compass product - Server, Admin, Web. Maintaining multi-server, cluster and single-server configurations.

BS in Computer Science. Central Washington University. 2000

Continuing education: **MIT OpenCourseWare.** Technical and business.
