

SUMMARY:

- 4+ years of experience in analyzing, designing, development, testing and maintenance of web applications with good exposure to full Software Development Life Cycle (SDLC) and Agile.
- Extensively worked on .NET Web Application Development using Microsoft Visual Studio, Visual Studio Team Services (VSTS), .NET Framework 4.5 C#, ASP.NET, XML.
- Experience in Implementing Service Oriented Architecture (SOA) based Applications, client-server applications, N-tier applications.
- Experience in developing responsive Web UI using HTML5, CSS3, Bootstrap, JQuery, Ajax, Java Script, Angular 1.x to Angular 18.
- Expertise in angular framework and its ability to create simple and scalable code for SPA.
- Experience in developing user interface rich web applications, and webservice applications using front end/User interface technologies like object-oriented JavaScript, type script, angular, bootstrap, CSS frameworks.
- Good amount of work done on Template driven, reactive forms in angular and their validations.
- Expertise in using angular directives, controllers, filters, services, templates, events and injectors.
- Strong knowledge and experience on object oriented design and programming (OOPS).
- Experience in creating and consuming SOAP/RESTful services using Web Services, Microservices, Web API.
- Extensive working experience in database development, for creating complex database queries, writing Constraints, Indexes, Views, Stored Procedures, Cursors and Triggers using PL/SQL in SQL Server 12/16, Oracle 10g/11g/12c and DB2.
- Experienced in .NET security features such as Authentication (Windows-based Authentication, Forms-based Authentication) and Authorization (Authorizing Users and Roles).
- Experience with various Software Configuration Management (SCM) Tools like Team Foundation Server (TFS), -GIT.
- Hands on Experience with Microsoft Azure platform for the building, managing and deploying web application.
- Experience of Tested Web/Windows Applications for proper operation by implementing Unit and Integration testing using NUNIT.
- Designed clean code with the help of SOLID principles followed by the design patterns.
- Extensive experience with SDLC like Agile Methodologies (SCRUM), Waterfall Methodologies

SKILLS SET:

.Net Technologies	ASP.Net, Web API, MVC
Languages	C, C#.Net, .net core
Web Technologies	HTML, CSS, Java Script, XML, Type Script, Angular, NodeJs, AJAX, MVC, Web API,
DBMS Packages	SQL Server(2012/16), Oracle(10g/11g/12c.), (PL/SQL)
IDE	MS Visual Studio, Visual Studio code for Angular
ORM TOOLS	Entity Framework, LINQ
Platforms	Windows 10/8/7/Vista/XP
Reporting Tools	SQL Server Reporting Services, Crystal Reports
Cloud Computing	Microsoft Azure (knowledge only)

PROFESSIONAL EXPERIENCE:

Client: Eyemed/Luxottica– Mason, OH
Role: Angular Developer

May 2024 - Present

Responsibilities:

- Working closely to the client for requirement gathering and analysis and provided desired solution to client in time limits.
- Involved in implementation of Object-Oriented Concepts during the development.
- Responsible for front-end UI development using HTML5, CSS, Typescript, bootstrap, angular 12.
- Developing a web application using Angular 12 as front end and using Web API to retrieve and pass data to back-end.
- Developing the application using model driven approach by creating different modules, components and by using the reusable code.
- Creating angular 12 components, implemented interpolation, input variables, bootstrapping, ngFor, ngIf, event binding and decorators.
- Created reusable custom pipes and directives for filter and sorting for the table columns for custom table component which is used for CRUD operations.
- Implemented routing to navigate between the components in the application using the angular router module.
- Created Angular components, Directives, services and reactive forms to collect the input from user.
- Implemented Services by using HttpClientModule in Angular 12 for making the API calls and inject the data into the required components.
- Used dependency injection to communicate between the Components.
- Developed application-level code to interact with the backend and consume the JSON API's by using Rxjs observables.
- Utilized @Input and @Output decorators to transfer the data between parent and child components.
- Used ngModel to achieve two-way binding and using ngIf to display custom validation and error messages created for the forms.
- Implemented Form Group and Form Array to get all the user data to manipulate in the controller and send data as required by the backend.
- Worked with team lead to write documentations and sets standards for other projects and developers.
- Working on project that follows agile scrum methodology which includes iteration application development, weekly sprints and daily standup meetings.

Environment: Visual studio 2022, Visual Studio Code, SQL developer 19.2.0, HTML5, CSS3, Bootstrap, J-Query, JSON, Java Script, Angular 11, 12 ,18 scrum, MS word, JIRA and GIT, Postman.

Client: Wells Fargo, Charlotte
Full-Stack .Net Developer

Dec 2023 – Apr 2024

Responsibilities:

- Design and develop the business logic of the web applications using C#, Web API and used Angular front-end.
- Responsible for creating efficient design and developing User Interaction screens using HTML5, CSS3, JavaScript, AJAX, J-Query, and Angular 6.0
- Worked on Responsive Web Design using Bootstrap, Grid Controls, CSS3, and Media Queries.
- Implemented two-way binding among models, controllers, and views with Angular JS to Provide continuous updates among view and model and responsible for building a custom single-page.
- Designed and created the Restful web services using Web API, responsible for making AJAX Calls for the UI Interactions to the Controller Actions using Angular 6.0 and getting the Data back as JSON and parsing it onto the UI.
- Creation of database objects like tables, views, Stored procedures, packages, triggers, functions using oracle SQL Server .

- Implemented N-Tier Architecture and integrated the UI with Data base for data retrieval and manipulation using ADO.NET data objects and ADO.NET Entity Framework.
- Responsible for scheduling SSIS jobs using SQL Server Agent, and created alerts for successful and unsuccessful completion of Scheduled Jobs.
- Performed unit testing and integration testing for reviewing the requirements and fixing the defects appropriately.
- Implemented continuous integration(CI) and build tools using Jenkins for optimizing automation.
- Maintain best practices for file storage and local and hosted commits in a GIT repository.
- Design and developed clean code with respect to business logic using solid principles followed by design patterns like Creational, Structural, Behavioral and Singleton.
- Worked on Agile, SCRUM development methodology and built the application with Test Driven Development.

Environment: Microsoft Visual Studio 15/17, C#, ASP.NET MVC 4/5, HTML5, CSS3, Bootstrap, J-Query, Ajax, Java Script, Angular 6, Bootstrap, Grid Controls, Media Queries Web API, Ajax, JSON, SQL Server 16/17, GIT, Agile, Scrum.

Cognizant Technology Solutions, Hyderabad, India
.Net Developer

Feb 2021 – Jul 2023

Responsibilities:

- Involved in understanding and transmitting the business requirements for the project and translating these into functional specifications.
- Implemented design patterns and the entire backend of the application in C#, and ASP.Net using various object-oriented **features** like classes, interfaces, inheritance, polymorphism and Multithreading.
- Designed Graphical User Interface (**GUI**) using Master Pages, Themes & Skins, HTML, CSS, JavaScript and Custom Controls.
- Creation of database objects like tables, views, synonyms, materialized views, procedures, packages, triggers, functions using oracle PL/SQL and SQL Server 2012.
- Involved in design and development of middle tier web services which encapsulate the business logic in its methods and wrote data access classes using ADO.NET and NHibernate framework.
- Creating reports using the Crystal Report for the report needed by Middle Office, Back Office users.
- Involved in writing scripting like Java scripting, J-Query for validations on client side.
- To create and test the application with **Unit** Test Cases using NUnit Test Framework.
- Used Subversion (**GIT**) for Version Control, creating and managing projects and accessing the items that are stored and managed for a project.
- In the Project we worked on waterfall model project management.

Environment: Microsoft Visual Studio, C#, ASP.NET, HTML, CSS, Bootstrap, J-Query, Java Script, Grid Controls, Media Queries, SQL Server 12, Oracle 10g, ADO.NET, NHibernate, Crystal Reports, UNIT, NUNIT, GIT, waterfall.

EDUCATIONAL QUALIFICATIONS:

Masters Degree	University of Cincinnati	4.0 GPA
Bachelor's in computers	Vignan University	4.0 GPA
