

FARRUKH ABBAS

Full Stack Technical Lead

farrukhabbas6302@gmail.com

www.linkedin.com/in/farrukhabbas1412/

(630) 278-7178

SUMMARY:

- Over 12+ years of software development experience including Requirements Gathering & Analysis, Design, Development, Support, Enhancement, Deployment and Maintenance of business applications.
- Strong background in Java development with hands-on experience using Spring, Hibernate, Microservices, and RESTful web services.
- Experienced in building scalable Microservices based architectures to support AI-driven applications.
- Data Visualization: Developed interactive data visualizations using React, and JavaScript frameworks such as Next.js.
- Strong Experience in developing Microservices using Spring Boot, MQ, Rabbit MQ, Apache Kafka
- Strong Experience in Docker and Kubernetes.
- Experience in AWS and Azure for building and deploying applications.
- Strong Experience using Persistence Frameworks like JPA, Hibernate.
- Experience in developing web applications using Restful Web Services and SOAP based Web services.
- Led the migration from a monolithic system to Microservices using Domain-Driven Design (DDD) principles.
- Led the development and maintenance of RESTful APIs for seamless data exchange.
- Strong Experience in Application-Development/ Front End technologies using Spring Boot, Spring Cloud, Java, JSF, Node.js and React.js.
- Experience in various databases including Oracle 19c, MongoDB, MySQL, and PostgreSQL.
- Experience in developing applications using web/application servers like Tomcat, Oracle WebLogic and JBoss.
- Optimized database queries for improved performance and scalability, performed continuous code optimization and system enhancements.
- Experience using build tools like Maven, Ant.
- Strong on DevOps concept and Methodologies.
- Implemented SDLC methodologies including Agile Scrum and Waterfall.
- Experience in tracking defects, issues, risks using JIRA (ALM) and IBM Rational Team Concert (RTC).
- Experience in using version control systems like Git, SVN, Bitbucket and IBM RTC.
- Experience on IntelliJ, Eclipse IDE, Spring STS, NetBeans, and Oracle Design Studio.
- Experience on doing impact analysis and creating various design documents to achieve different implementations using Microsoft Visio and Visual Paradigm.
- Excellent communication skills and team player spirit coupled with problem analysis and solving abilities.
- Experience in AWS, Lambda, EC2, S3, Fargate, Elastic Beanstalk, CloudWatch, SQS, SNS and OCR.

TECHNICAL SKILLS:

Languages:	Java, Python, C#, PHP, SQL & PL/SQL
JAVA & J2EE:	Core Java concepts – Collections, Data Structures, Streams, lambda, Exception handling, J2EE, Servlets, JSP, JDBC, XML, JMS, Junit, Lombok.
Frameworks:	Spring Boot, Spring Cloud Services, Spring , Hibernate, JMS, Apache Kafka, Application/Web Server, Drools, JSF , WebLogic 12c, JBoss 7.1.0 and Tomcat 8
Web services:	REST, SOAP, WSDL, JAX-WS, JAX-RS
Database:	Oracle 12c/19c, MySQL, MongoDB, PostgreSQL
UI Technologies:	JSF, JavaScript, CSS, HTML, React JS
Version control Tools:	Git, Bitbucket, SVN, IBM RTC
Design Tools:	Visual Paradigm and Microsoft Visio
Build Tools:	Maven, Ant, Docker, Jenkins
Other Tools:	Postman, SOAP UI, SQL developer, Toad, VS Code, JIRA
IDEs:	IntelliJ, Spring STS, Eclipse, NetBeans, Oracle Design Studio and My Eclipse
Operating Systems:	Windows 10, UNIX, and LINUX
SDLC Methodologies:	Agile and Waterfall Software development methodologies
Testing:	Unit Testing, Integration System Testing, UAT testing
Cloud Technologies:	AWS and Azure Services
Message Queue:	IBM MQ, Rabbit MQ, Kafka, SQS and Azure Service Bus

PROFESSIONAL SUMMARY:

Java Technical Lead
QATAR AIRWAYS

Jan 2024 – Present
Chicago, IL

Description: Led a team of 18 developers in transitioning from a monolithic system to a scalable Microservices architecture, incorporating AI-powered solutions for enhanced operational efficiency.

Responsibilities:

- Led the migration from a monolithic system to Microservices using Domain-Driven Design (DDD) principles.
- Developing Microservices using **Spring Boot, Spring Cloud, Apache Kafka, JPA, Angular, Cosmos DB, SOAP and REST.**
- Designed and implemented AI-powered solutions, including automated food and beverage pairing.
- Collaborated with cross-functional teams to integrate, deploy, and deliver software solutions.
- Ensured system scalability and high availability using Kubernetes and Docker.
- Proactively identified risks and mitigated development bottlenecks.
- Managed cloud-based deployments and application monitoring on Azure OpenAI.
- Facilitated Agile ceremonies, including sprint planning and retrospectives.
- Involved in Integration Testing, User Acceptance support, and tracking/resolving Production issues.
- Closely worked with the QA team for deployments and defect resolving in the Service Request System.
- One point contact for state's entities communications.
- Involved with Production Support and deployments.
- Responsible for maintaining the code quality using Sonar.

Technologies Used: Java, Spring Boot, SQL, Angular, Kafka, Microservices, Hibernate, Oracle, AI, AWS, Azure OpenAI, Kubernetes, Docker, JIRA, IntelliJ, REST APIs, Azure Service Bus, SQS.

Senior Full Stack Developer
ETISALAT UAE (Systems Ltd)

Sept 2022 – Dec 2023
Dubai, UAE

Description: Led a team of 8 developers in delivering a transaction-view application integrated with Tapix, ensuring smooth transaction tracking and improved customer experience.

Responsibilities:

- Developed back end of the Systems, event handling, using **Spring Boot, Spring Cloud Services, Apache Kafka, JMS, JPA, SOAP, SQL, REST, SQL** and deployed to on-premises and few services to **Azure.**
- Designed and developed backend systems using Spring Boot and MongoDB.
- Led the development and maintenance of RESTful APIs for seamless data exchange.
- Conducted code reviews, debugging, and issue resolution for performance optimization.
- Coordinated with cross-functional teams for smooth software deployment.
- Ensured system scalability and maintained high security standards.
- Integrated with various telecoms and banking services to enhance transaction processing.
- Provided mentorship and guidance to junior developers.
- Worked on Maintenance of Application.
- Developed Web Services.
- Worked in an Agile environment, ensuring timely delivery of features.
- Used **Jenkins** for build management.
- Involved in load testing using SOAP UI and Postman.
- Involved in Production deployments and verification.
- Worked closely with the BA and Product Owner.
- Worked with the Product Owner and Quality Assurance Team for any issues, enhancements and hot fixes.

Technologies Used: Java, Spring Boot, SQL, React, Angular, Kafka, MongoDB, REST APIs, IntelliJ, Docker, JIRA, Agile

Senior Full Stack Developer
YAP UAE (Digitify)

Aug 2021 – Sept 2022
Dubai, UAE

Description: Developed and maintained backend systems for digital banking platforms, ensuring seamless integration with third-party financial services.

Responsibilities:

- Designed and implemented Microservices-based architectures for fintech applications.
- Developed RESTful APIs to enable digital banking transactions.
- Integrated third-party payment gateways and financial services.
- Optimized database queries for improved performance and scalability.
- Collaborated with UX/UI teams to enhance customer experience.
- The persistent layer of the systems is developed using **MySQL, JPA** and **Hibernate**.
- Involved in writing unit test cases using **Junit & Mockito** and running the test suits.
- Involved in creating build/deployment files and aligning with operations team for production deployment and verification.
- Performed continuous code optimization and system enhancements.
- Ensured compliance with banking security standards and regulations.
- Provided mentorship to junior developers and conducted technical training.

Technologies Used: Java, Spring Boot, SQL, React, Angular, Hibernate, Kafka, MongoDB, REST APIs, Docker

Java Developer
PROGLOBAL

Jul 2019 – Mar 2021
Islamabad, Pakistan

Description: Developed and maintained POS applications and dealership management software for retail environments.

Responsibilities:

- Designed and developed software modules for POS and attendance systems.
- Automated key business processes for dealership management.
- Developed SOA services using **Spring, Spring Integration, Hibernate, JMS, Java, SOAP / REST Web services**.
- Optimized database queries for better performance.
- Conducted software testing and bug fixes to enhance stability.
- Worked closely with operations team for deployments and hot fixes.
- Involved in Requirements Gathering and Analysis.
- Involved in Production deployments and verification.
- Involved in bug fixes and enhancements.
- Involved in Integration Testing, User Acceptance support, and tracking/resolving Production issues.
- Integrated third-party APIs for payment and inventory tracking.
- Collaborated with UI/UX teams to improve application usability.
- Deployed and maintained software solutions for enterprise clients.
- Provided technical support and resolved production issues.

Technologies Used: Java, Spring, SQL, Hibernate, Angular, Kubernetes, Docker, Microservices, Hibernate, Kafka, Rabbit MQ, AWS SQS, RESTful APIs

Java Software Engineer
PROTEGE GLOBAL

Nov 2018 – Jun 2019
Islamabad, Pakistan

Description: Developed software solutions for retail management systems, ensuring seamless integration with business operations.

Responsibilities:

- Designed and implemented software modules for inventory and sales tracking.
- Performed debugging and resolved critical software issues.
- Integrated business logic with third-party applications.
- Conducted software maintenance and enhancements.
- Ensured compliance with coding standards and best practices.
- Provided technical support and troubleshooting for end-users.
- Assisted in database schema design and optimization.

Technologies Used: Java, Spring Boot, SQL, MySQL, REST APIs, Docker, AWS, Kafka, RESTful APIs, Kubernetes

Java Software Engineer
INTEL TECHSO

Sept 2016 – Nov 2018
Islamabad, Pakistan

Description: Developed and maintained enterprise software solutions, focusing on performance optimization and business process automation.

Responsibilities:

- Designed and implemented scalable enterprise software solutions.
- Participated in full SDLC, from requirements gathering to deployment.
- Developed SOAP / REST Web Services.
- Used **Maven** for build management.
- Involved in Integration Testing, User Acceptance support, and tracking/resolving Production issues.
- Working closely with the Team Members and product owner.
- Closely worked with QA team for deployments and defect resolving in Service Request System.

Technologies Used: Java, Struts, Spring, Java, Spring Boot, SQL, REST APIs, Docker, AWS, Kafka, Kubernetes

EDUCATION & CERTIFICATION:

- Master of Science in Software Engineering (MSSE) - FAST University, Islamabad
- Bachelor of Science in Computer Science (BSCS) - COMSATS Institute of Information and Technology
- AWS Certified Developer - Associate Certificate
