

GOPAL VUYYURI
Workday HCM Consultant
Summit, Illinois 60501
(815)714-9652
[**Gopalvuyyuri1@gmail.com**](mailto:Gopalvuyyuri1@gmail.com)

PROFESSIONAL SUMMARY

- With over 4 years of experience as a Workday Consultant, I specialize in the implementation, optimization, and integration of HCM, Payroll, Compensation, Benefits, Reporting, and Security modules.
- Additionally, I have expertise in Workday Financials, including Supplier & Customer Accounting, Invoicing, Settlements, Order Management, Business Assets, Financial Planning, Expenses, Procurement, and Inventory management.
- I possess a proven ability to excel in key project phases such as requirements gathering, solution design, data conversions, programming, testing (system, integration, user acceptance, and regression), documentation, and go-live support.
- My experience spans both Workday and People Soft HCM/Financials, allowing me to leverage a diverse skill set across multiple systems.
- Expertise in configuring organizations and business processes within Workday, ensuring seamless HR and financial operations across the organization.
- Proficient in creating staffing models for supervisory organizations, conducting reorganizations, and establishing organization types and hierarchies to align with business structures.
- Extensive experience in designing and configuring custom reports and calculated fields using Workday Studio Report Builder (BIRT), Advanced, Matrix, and Composite reports.
- Strong technical skills in J Developer, BPOL, SOAP UI, and Report-as-a-Service (RaaS); expertise in developing XML web services using JAX-WS and Java API for system integration.
- Competence in key technologies such as HTML5, Java, XML, and web services, with a focus on creating scalable integrations and applications.
- Proven track record in developing and optimizing Workday integrations using EIB (Enterprise Interface Builder), Core Connectors, and Workday Studio, ensuring smooth system interoperability.
- Proficient in implementing functionalities in Workday Prism Analytics, integrating operational data from multiple sources to enhance financial planning, data-driven decision-making, and reporting.
- Deep understanding of Agile methodologies and the Software Development Life Cycle (SDLC), ensuring effective planning, execution, and testing for timely delivery.
- Demonstrated experience in analyzing and resolving support issues, guiding and training support teams on new technologies, and delivering robust, actionable Workday reports to meet evolving business needs.
- Extensive experience working with object management systems, including role-based, user-based, and job-based security groups, ensuring access controls align with business requirements.
- Strong focus on maintaining security compliance (SOX, GDPR) through detailed audits, adherence to best practices, and configuration of security roles and permissions.
- Proven ability to manage complete project lifecycles from planning and technical design to go-live support, and post-deployment optimization, ensuring smooth transitions and project success.
- Expert in managing complex projects with multiple stakeholders, ensuring alignment of technical and business goals to deliver high-quality solutions.
- Committed to delivering customized, scalable solutions that streamline HR and financial processes, enhance operational efficiency, and drive continuous improvement within organizations.

EXPERTISE

- Expertise in Core HR, Compensation, Benefits, and Talent modules.
- Hands-on experience with Workday setup, business process design, and tenant management.
- Proficient in Workday Studio, EIBs, Core Connectors, and developing custom reports.
- Specializes in implementing role-based security, ensuring compliance, and enhancing workflows.
- Extensive experience in end-to-end testing, UAT, user training, and providing post-go-live support.
- Skilled in creating custom reports, dashboards, and calculated fields to drive data-driven insights.
- Proven ability to streamline workflows, automate processes, and boost system efficiency.
- Collaborates effectively with HR, Finance, and IT teams to align Workday solutions with business needs.

EDUCATION

Master's in Data Science

Lewis University

TECHNICAL SKILLS

Category	Skills/Tools
Workday Modules	HCM, Security, Reporting, Compensation, Benefits, Recruiting, Absence, Payroll (support & security), Tenant Setup, Time Tracking, Business Process, Staffing Module
Integration Tools	Workday Studio, EIB, Core Connectors, Cloud Connector, PICO, PEI, Web Services (SOAP, REST), Document Transformation, Message Queues, DIS, Authentication Mechanisms, Tenant Management
Reporting	Workday Report Writer (Advanced, Matrix, Simple), Calculated Fields, Custom Dashboards, BIRT
Testing & QA	Regression Testing, UAT, Automation Scripting, Workday Integration Testing, ALM Tools, Defect Tracking
Compliance	SOX Compliance, Security Audits, Data Privacy, Access Provisioning
Other Tools	Microsoft Office Suite (Excel, Power BI), Jira, ServiceNow, HPQC, Slack
Programming & Scripting	XML, XSLT, ETV/XTT, WD XML, C, C++, HTML, Java, SQL, PL/SQL, JSON,
Methodologies	Waterfall, Agile, Scrum, Workday Implementation Planning & Execution

PROFESSIONAL EXPERIENCE

Client: Bank of America, Los Angeles, CA.

March 2022 – Present

Role: Workday HCM Consultant

Responsibilities:

- Led end-to-end implementation of Workday HCM modules including Core HR, Compensation, Benefits, Absence, Time Tracking, Talent, and Recruiting.
- Translated complex enterprise requirements into scalable, efficient Workday configurations aligned with business objectives.
- Collaborated with HR stakeholders and department heads to gather detailed functional and technical requirements.

- Designed and developed advanced Workday dashboards and reports using tools such as Advanced, Matrix, and BIRT.
- Built insightful analytics to support executive decision-making and strategic workforce planning.
- Configured and maintained EIBs, Core Connectors, and Web Services to facilitate seamless third-party integrations.
- Oversaw data migration efforts, ensuring accurate transfer and mapping of legacy system data into Workday.
- Conducted comprehensive testing phases including unit, regression, and user acceptance testing (UAT).
- Created test scripts, managed defect resolution, and validated configurations pre- and post-go-live.
- Implemented and maintained role-based security groups and policies within Workday for controlled data access.
- Managed Workday security audits and ensured alignment with internal governance and compliance standards.
- Executed testing and deployment strategies for Workday bi-annual releases and new feature rollouts.
- Developed end-user documentation, job aids, and training materials to support Workday adoption.
- Delivered training sessions for HR teams and system users to enhance Workday proficiency and system utilization.
- Partnered with internal audit and compliance teams to validate data integrity and adherence to regulatory policies.
- Conducted in-depth role audits and remediation planning using Workday's Security Audit Tool, ensuring strict compliance with HIPAA and enterprise IT governance standards.
- Established KPIs and metrics to monitor HCM process performance, leveraging Workday's Dashboards and Discovery Boards to inform strategic HR decisions.

Environment: Workday HCM, Financials, Payroll, Integration Cloud, Studio, Prism Analytics, Reporting, EIB , BIRT, Integrations , SOAP, EIB, Core Connectors, CCB, WSDL, XML, XSLT, Taleo, Calculated Fields, Security, Business Process Framework, Data Conversion, Testing, Tenant Management.

Client: Cardinal Health (Remote)

May 2020 – July 2021

Role: Workday HCM Program – Software Engineer

Responsibilities:

- Directed process enhancements and optimization initiatives across Workday HCM modules for mid-sized enterprise needs.
- Collaborated with HR operations to gather evolving business requirements and implement configuration updates.
- Streamlined workflows to increase operational efficiency and align with HR policies and procedures.
- Designed and developed custom dashboards and reports using Workday Matrix and Advanced reporting tools.
- Delivered actionable insights to support workforce planning, compliance, and leadership decision-making.
- Administered and refined Workday security frameworks to ensure proper role-based access and data confidentiality.
- Built and maintained custom security roles in alignment with internal access policies and audit requirements.
- Performed routine audits of Workday configurations and data to ensure accuracy and compliance.
- Served as a Workday SME, providing tier-2 support and guidance to HR and IT stakeholders.

- Resolved complex system issues and improved overall user satisfaction and system performance. Partnered with cross-functional teams to simulate real-world test environments in Workday Sandbox and Preview tenants, validating business processes pre-go-live.
- Designed and executed test cases for mobile configurations, ensuring Workday's responsiveness and feature functionality across Android and iOS platforms.
- Contributed to the evaluation and implementation of additional modules like Talent and Recruiting.
- Aligned new module functionality with organizational growth and strategic talent initiatives.
- Supported biannual Workday updates by testing new features, assessing impacts, and facilitating rollout planning.
- Developed training materials and delivered interactive sessions to upskill HRIS analysts and HR teams.
- Partnered with IT and Finance to ensure cohesive integration across systems and streamline cross-functional processes.

Environment: Workday, Workday EIB, Workday Studio, Core Connector, eDesk, XML, XSLT, Web Services, PeopleSoft, Data Warehousing, Data Cleansing, MS Project, User Acceptance Testing (UAT), MS Excel.
