Senior Full Stack Engineer(Python/React/AWS)

Experienced Full Stack Engineer with over 10 years of professional expertise in **Python** development using frameworks such as **Django**, **Flask**, and **FastAPI**. I am also skilled in frontend technologies like **React**, **HTML**, **CSS**, and **JavaScript**, **TypeScript**, and proficient in working with databases like **SQL**, **MySQL**, **PostgreSQL**, **MongoDB**, and **Redis**. My background includes delivering **SaaS**, **Micro-services** and **Serverless** applications, based on **AWS** and **GCP**. I have designed and implemented several API architectures within **REST**, **GraphQL**, and **gRPC** standards and used **RabbitMQ** and **Kafka** for message queuing, event streaming, and inter-service communication. Additionally, I am adept at deploying infrastructures with **AWS** and **Docker**, implementing CI/CD workflows, and following **Agile/Scrum** methodologies. My passion lies in optimizing for performance, error detection, and customer satisfaction, as evidenced in projects like social media app development. Currently, I am venturing into Data Engineering and integrating third-party services to provide robust solutions, committed to delivering well-tested and maintainable source code for reliable applications.

KEY SKILLS

Languages:	Python, TypeScript/JavaScript, C++, PL/pgSQL
Frameworks/Libraries:	Django, Flask, FastAPI, React
Database:	PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch
Tools/Platforms:	Docker, Google Cloud Platform(GCP), gRPC, Kubernetes, RabbitMQ, Apache Kafka, REST, AWS Lambda, AWS S3, AWS RDS/Aurora, AWS DynamoDB, AWS SQS/SNS, AWS Step Functions, AWS ECS, AWS EventBridge, AWS Cognito, KeyCloak, Auth0, Logstash, Kibana
DevOps:	Prometheus, Grafana, Portainer, AWS EKS (Kubernetes), AWS ECR, AWS ECS, AWS AppRunner, AWS Fargate
Testing:	Unit/Load/Integration/E2E/API tests
Architectures/Paradigms:	Microservices, Serverless, MVC, DDD, TDD, Event-Driven
Operating Systems:	Windows (PowerShell), Linux (Ubuntu, CentOS) (Bash, ZSH)

PROFESSIONAL EXPERIENCE

EPAM Systems

Senior Full Stack Developer

January 2023 - Present

- Designed and implemented a chat service within FastAPI, using WebSockets and Socket.IO, and MongoDB.
- Designed a ChatBot (a simple RAG system) using OpenAI SDK and pgVector for enhanced customers support.
- Developed an MQTT server and client using pure Python, Mosquitto, and Paramiko, enabling robust IoT device communication.
- Developed and deployed a Face Detection service on AWS Lambda, using OpenCV and MTCNN model.
- Implemented a DMARC and SPF scanner tool as an Email DNS security checker service.
- Leading a team with 5 developers for delivering a application related to Money Exchange industry (non-banking financial), cooperating with PO, PM, Designers and Clients.
- Been responsible for integrating Money Exchange application to the PayPal, Stripe and Klarna (England) and DCBank (Canada) as payment gateways.
- Been responsible for Load and Smoke tests of Money Exchange application to launch for 10K monthly active users.
- Deployed monitoring and error detection services like Prometheus, Grafana and Sentry.
- Collaborated with cross-functional teams in a Agile manner, following Scrum approach.
- Implemented ETL jobs in Airflow to migrate data from a Data Lake (MongoDB) to AWS RDS (PostgreSQL as DataWarehouse) and Elasticsearch (as search engine).
- Developed a FastAPI microservice as a middleware for Elasticsearch for categorized data retrieval.

The C-Dub Brand LLC
Senior Full Stack Developer

March 2021 - December 2022

- Migrated a legacy Django codebase to AWS Serverless solutions, collaborating with a team of senior engineers over 16 sprints.
- Created an "Order Processor" microservice in FastAPI, which handled user orders through AWS SQS, performing validations, inventory updates, and customer notifications via Firebase.
- Worked directly within a Scrum framework alongside 30 coworkers and developers from various specialties including ML, DevOps, Data, Mobile, Front-End, Designers and Project Management.
- Deployed MinIO for file object storage, and developed a FastAPI-based microservice to serve both MinIO and S3 as a middleware, accessible via REST and AMQP.
- Gained experience in working with Serverless tools of AWS, such as Lambda, Step Functions, Event Bridge, SQS and SNS, AWS Cognito, and collaborated with DevOps team on customizing/troubleshooting IAM roles for team members.
- Being a part of a team for developing and deploying a Social Network for Realtors, leveraging AWS services, to be launched for 1-10k monthly active users.

AuditPro
Full Stack Developer

August 2019 - February 2021

- Being a part of development team of an application for dentists (Healthcare industry) using React.js, Python, Django and PostgreSQL, with a focus on Front-End development and TDD practices.
- Implemented React.js components of flowcharts, tables and profiles (for Dentists panel), reducing diagnostic report generation time by 40%, thereby streamlining workflows for healthcare professionals.
- Led the creation of a component library for Illumina's BaseSpace, accelerating development cycles by 30% and enhancing UI consistency.

IT Solutions LLC
Full Stack Developer

April 2017 - April 2019

- Developed a Python-based market intelligence platform leveraging natural language processing, which automated the extraction of investment insights from 500+ news sources daily, enhancing strategic investment decisions.
- Led the design and ongoing development of critical client-facing React web applications, significantly improving data interfacing for 1,000+ users and enhancing user experience through intuitive data visualization.
- Successfully integrated a Python and Django-based test-execution engine into our microservice ecosystem, reducing integration errors by 40% using Kafka for message processing.
- Boosted and optimized critical REST APIs for our main data visualization platform, achieving a 50% improvement in response times and supporting daily data transactions for over 10,000 users.

CodeNinja Group
Full Stack Developer Intern

April 2016 - March 2017

- Collaborated with the development team to design, develop, and deploy web applications using modern technologies and frameworks.
- Implemented front-end features and user interfaces using HTML5, CSS3, jQuery, and JavaScript, ensuring responsive design and cross-browser compatibility.
- Developed server-side logic and RESTful APIs using Node.js and Express.js, enabling seamless communication between the client and server.
- Integrated third-party APIs and services to enhance application functionality and user experience.
- Utilized version control systems such as Git for code management and collaboration with team members.
- Assisted in troubleshooting and debugging issues across the full stack, resolving technical challenges in a timely manner.
- Facilitated maintain code quality, organization and automation for 6+ applications.
- Participated in sprint planning, backlog grooming, and retrospective meetings to improve team productivity and project delivery.

EDUCATION

Bachelor's Degree in Computer Science April 2012 - March 2016
Georgia State University - Atlanta GA
