

HIMAVATHI SAMA
Workday HCM Consultant
Irving, TX 75039
(469) 848-6669
[**Hima.sama23@gmail.com**](mailto:Hima.sama23@gmail.com)

PROFESSIONAL SUMMARY

- Over 4 years of experience as a Workday Consultant specializing in the implementation and optimization of HCM integrations, payroll, compensation, benefits, reporting, and security.
- Skilled in Workday Financials including Supplier & Customer Accounting, Invoicing, Settlements, Order Management, Business Assets, Financial Planning, Expenses, Procurement, and Inventory.
- Proven ability in requirements gathering, system design, data conversion, programming, testing (unit, integration, UAT, regression), documentation, and go-live/post-go-live support.
- Dual expertise in Workday and PeopleSoft HCM/Financials, with the ability to bridge legacy systems and modern cloud platforms.
- Strong understanding of Workday organization configuration, staffing models, reorganizations, and the setup of organization types and hierarchies.
- Proficient in designing custom reports and calculated fields using Workday Studio (BIRT), Advanced, Matrix, and Composite Reports.
- Experience with JDeveloper, BPEL, SOAP UI, Report-as-a-Service (RaaS), and developing XML web services using JAX-WS and Java APIs.
- Skilled in core technologies including HTML5, Java, XML, and various web services protocols.
- Proven success developing and optimizing integrations using EIBs, Core Connectors, Workday Studio, and SOAP/REST APIs.
- Proficient in Workday Prism Analytics, integrating operational data from multiple sources to drive financial insights and workforce planning.
- Deep knowledge of Agile/Scrum methodologies and the Software Development Life Cycle (SDLC), ensuring efficient and iterative delivery.
- Demonstrated excellence in support issue resolution, mentoring support teams, and delivering high-value reports for business decision-makers.
- Extensive experience with Workday Security, including object management (role-based, user-based, job-based security groups), and compliance (SOX, GDPR).
- Known for conducting detailed security audits and applying configuration best practices to ensure robust access controls and governance.
- Successfully managed end-to-end project lifecycles, from requirement gathering and technical design to implementation, testing, go-live, and optimization.
- My experience spans both Workday and People Soft HCM/Financials, allowing me to leverage a diverse skill set across multiple systems.
- Expertise in configuring organizations and business processes within Workday, ensuring seamless HR and financial operations across the organization.
- Committed to delivering customized, scalable solutions that streamline HR and Finance processes, enhance operational performance, and support continuous improvement initiatives.
- Extensive experience working with object management systems, including role-based, user-based, and job-based security groups, ensuring access controls align with business requirements.
- Strong focus on maintaining security compliance (SOX, GDPR) through detailed audits, adherence to best practices, and configuration of security roles and permissions.
- Proven ability to manage complete project lifecycles from planning and technical design to go-live support, and post-deployment optimization, ensuring smooth transitions and project success.
- Expert in managing complex projects with multiple stakeholders, ensuring alignment of technical and business goals to deliver high-quality solutions.
- Committed to delivering customized, scalable solutions that streamline HR and financial processes, enhance operational efficiency, and drive continuous improvement within organizations

EXPERTISE

- Expertise in Core HR, Compensation, Benefits, and Talent modules.
- Hands-on experience with Workday setup, business process design, and tenant management.
- Proficient in Workday Studio, EIBs, Core Connectors, and developing custom reports.
- Specializes in implementing role-based security, ensuring compliance, and enhancing workflows.
- Extensive experience in end-to-end testing, UAT, user training, and providing post-go-live support.
- Skilled in creating custom reports, dashboards, and calculated fields to drive data-driven insights.
- Proven ability to streamline workflows, automate processes, and boost system efficiency.
- Collaborates effectively with HR, Finance, and IT teams to align Workday solutions with business needs.

EDUCATION

Master's in Information and Computer Sciences

Southern Arkansas University

TECHNICAL SKILLS

Category	Skills/Tools
Workday Modules	HCM, Security, Reporting, Compensation, Benefits, Recruiting, Absence, Payroll (support & security), Tenant Setup, Business Process, Staffing Module
Integration Tools	Workday Studio, EIB, Core Connectors, Cloud Connector, PICO, PEI, Web Services (SOAP, REST), Document Transformation, Message Queues, DIS, Authentication Mechanisms
Reporting	Workday Report Writer (Advanced, Matrix, Simple), Calculated Fields, Custom Dashboards, BIRT
Testing & QA	Regression Testing, UAT, Automation Scripting, Workday Integration Testing, ALM Tools, Defect Tracking
Compliance	SOX Compliance, Security Audits, Data Privacy, Access Provisioning
Other Tools	Microsoft Office Suite (Excel, Power BI), Jira, ServiceNow, HPQC
Programming & Scripting	XML, XSLT, ETV/XTT, WD XML, C, C++, HTML, Java, SQL, PL/SQL, JSON
Methodologies	Waterfall, Agile, Scrum, Workday Implementation Planning & Execution

PROFESSIONAL EXPERIENCE

Client: Trinity Health

Nov 2022 – Present

Role: Workday Security and HCM Consultant

Responsibilities:

- Spearheaded end-to-end design and configuration of Workday HCM suite including Core HR, Benefits, Absence, and Compensation tailored for enterprise-level implementation.
- Implemented and maintained Workday Time Tracking and Scheduling, optimizing workforce efficiency and ensuring compliance with internal policies.
- Partnered with HR leadership to define complex business process flows (BPs) using condition rules and custom validations to match operational requirements.
- Designed and deployed robust security frameworks using Domain Security Policies (DSP), User-Based Security Groups (UBSG), and Segmented Security.
- Created and optimized custom dashboards using Workday Prism Analytics, enabling cross-functional reporting across HR and Finance.
- Led Workday Extend initiatives to build custom apps enhancing internal workflows, such as leave request tracking and contingent workforce management.

- Integrated external systems with Workday using advanced Core Connectors, Workday Studio, and PECEI (Payroll Effective Change Interface).
- Facilitated data loads and mass updates using EIBs and iLoads, reducing manual efforts in HR data management.
- Oversaw payroll-related activities by configuring Workday Pay Group Settings, Pay Component Groups, and validating on-demand payments.
- Executed user acceptance testing (UAT) cycles and coordinated with QA teams to resolve test defects across security and HCM modules.
- Managed quarterly Workday releases, assessed new feature impacts, and implemented selective feature adoption with full documentation.
- Acted as the primary escalation point for tier-3 support, driving root cause analysis and long-term resolution strategies.
- Coordinated closely with internal audit and compliance teams to support SOX controls and external audit requirements.
- Developed interactive job aids and role-based training for HR, Payroll, and Benefits teams, improving overall user adoption and satisfaction.
- Led change management sessions and feedback workshops to align Workday enhancements with user expectations and compliance mandates.
- Conducted in-depth role audits and remediation planning using Workday's Security Audit Tool, ensuring strict compliance with HIPAA and enterprise IT governance standards.
- Established KPIs and metrics to monitor HCM process performance, leveraging Workday's Dashboards and Discovery Boards to inform strategic HR decisions.

Environment: Workday HCM, Financials, Payroll, Integration Cloud, Studio, Prism Analytics, Reporting, EIB, BIRT, Integrations, SOAP, EIB, Core Connectors, CCB, WSDL, XML, XSLT, Taleo, Workday Calculated Fields, Security, Business Process Framework, Data Conversion, Testing, Tenant Management.

Client: Coforge
Workday HCM Program – Software QA Engineer

Jan 2020 – Nov 2021

Responsibilities:

- Orchestrated QA testing lifecycle for Workday implementations, creating over 300+ test cases spanning Core HCM, Recruiting, and Absence Management.
- Built automated test scripts using Workday's PATT (Payroll Audit and Test Tool) and third-party QA tools like Selenium for regression and smoke testing.
- Collaborated with product owners to define acceptance criteria and functional specifications for Workday Recruiting and Talent modules.
- Configured condition-based compensation eligibility rules and compensation review templates, enabling performance-linked pay structures.
- Led Workday Recruiting optimization efforts including configuration of job requisition templates, candidate pipelines, and offer workflows.
- Validated integrations using Workday Studio and REST/SOAP APIs, ensuring seamless handoffs between third-party benefit providers and internal systems.
- Executed mass data validations post-load via Workday-delivered Data Audit Reports and audit frameworks.
- Participated in Prism analytics proof-of-concept to evaluate its efficacy for operational reporting before formal adoption.
- Assisted with building and refining calculated fields (e.g., Text, Boolean, Lookup-Related) to support eligibility rules and matrix reports.
- Developed documentation for Workday post-production support processes, including SLA tracking and incident resolution workflows.
- Maintained payroll configuration support by validating Payroll Inputs, Retro Pay Events, and pay group setup.
- Reviewed and updated existing Business Process definitions, optimizing step conditions and adding approvals to align with audit guidelines.

- Delivered stakeholder demos on system functionality and process improvements, contributing to increased end-user engagement.
- Supported change request intake and backlog grooming using JIRA, maintaining accurate sprint-level tracking of Workday enhancement tasks.
- Facilitated peer reviews and QA walkthroughs to improve testing quality and identify knowledge gaps within the team.
- Partnered with cross-functional teams to simulate real-world test environments in Workday Sandbox and Preview tenants, validating business processes pre-go-live.
- Designed and executed test cases for mobile configurations, ensuring Workday's responsiveness and feature functionality across Android and iOS platforms.

Environment: Workday, Workday EIB, Workday Studio, Core Connector, eDesk, XML, XSLT, Web Services, PeopleSoft, Data Warehousing, Data Cleansing, MS Project, User Acceptance Testing (UAT), MS Excel.
