

IBSA MERDASA

SQL Server DBA

ibsadereje@outlook.com | (612) 229- 4427 | Minneapolis, MN

PROFESSIONAL SUMMARY

Experienced SQL Server DBA with over 7 years of expertise in Microsoft SQL Server Database installation, configuration, administration, maintenance, performance tuning, production support, backup/restore, High Availability and disaster recovery across various SQL Server versions. Additionally, skilled in Azure SQL Database management, including cloud database deployment, monitoring, and performance tuning. Capable of leveraging Azure features such as Azure SQL Managed Instance and Azure Monitor for database health checks and troubleshooting.

CORE SKILLS

Database Scripting, User Defined Functions, Database Administration, Databases, Database Monitoring, SQL DBA, T-SQL Stored Procedures, SQL Tools, Enterprise Management Tools, Windows Server, Scheduling Tools, RDBMS, Server Monitoring, 24x7 Production Support, Database Consulting, Maintenance Planning, Performance Analysis, Query Tuning, Database Technologies, Information Systems, Data Recovery, Database Triggers, Server Migration, SQL Clustering, Replication, Automation, SQL Server Integration Services (SSIS), Server Administration, Database Integrity, Stored Procedures, Microsoft Azure, Database Development, Data Integration, Database Maintenance, C#, SQL, Change Data Capture, Data Migration, Troubleshooting, Recovery Strategies, Performance Tuning, Database Security, Database Design, Replication, Log Shipping, Microsoft SQL Server, MySQL, Transact-SQL (T-SQL), Backup & Recovery Systems, Redgate, SQL Server Management Studio, SQL Database Administration, Management Studio, PowerShell, ETL, SQL Technologies, Azure SQL, Microsoft Azure SQL, Azure SQL Database, Python, Technical Documentation, Collaboration, Mentorship, Project Management, change management processes, database management systems, internal team management, performance improvement, performance management, business applications, Software Development, data loss prevention, database support, virtualization, access control, encryption, networking, analytics, cloning, vmware, oracle, PCI, DB2, SOX, Database Management System, Data Administration, interpersonal communication skills, ability to work independently, communicate effectively, ability to collaborate, interpersonal skills, service excellence, problem resolution, Meeting Deadlines,

process oriented, teamwork, indexes, Microsoft Certified, industry standards, capacity, planning, regulatory, requirements, accounting principles, software engineering, routine maintenance, business operations, system enhancements, business continuity, resource allocation, maintenance tasks, IT Infrastructure, security policies, quality standards, analytical skills, database schemas, business growth, data protection, recovery plans, manufacturing, google cloud, data-driven, postgresql, helpdesk, NoSQL, AWS, ERP, written and verbal communication, verbal communication skills, critical thinking skills, technical skills, detail-oriented, oracle database administration, professional development, information technology, technical knowledge, Server Automation, LevelDB, DaggerDB, committed, operational excellence, provide guidance, innovation, production systems, sustainability, active directory, maintain database, problem-solving skills, critical thinker, SOW, HIPAA, retail, iso 9001, iso 27001, scripting skills, service delivery, troubleshoot issues, optimization strategies, microsoft active directory, financial services industry, regulatory compliance, branding, Devops, visio, data encryption, system stability, confidentiality, MS SQL Server, coding, resilience, data processing, resource utilization, design and development, provide technical guidance, performance reports, trains associates, make decisions.

WORK EXPERIENCE

SQL Server DBA

CVS, MN

Oct 2023 – Present

- Installation, Configuration, Managing, and Administration of SQL Server 2016/2017/2019 databases.
- Modifying the database structure as necessary from information provided by application developers.
- Planning for backup and recovery of database information.
- Responsible for performance tuning and optimization of databases using tools like SQL Profiler, Query Analyzer, and Database Engine Tuning Advisor.
- Created reports in SQL Server using SSRS as per the requirements provided by front-end users.
- Expertise in performance monitoring and tuning, query optimization, client/server connectivity, and database consistency checks using DBCC utilities.
- Worked on SQL Server 2022 migration from SQL Server 2019.
- Worked on enabling Change Data Capture (CDC) and Change Tracking on the database.

- Ensured the recoverability of the Data Warehouse with minimal information loss, including extensive testing of backup and recovery processes and taking full and incremental backups as needed.
- Collaborated with system administrators to ensure the operating system and database configurations were optimized for performance and security.
- Developed and documented backups, recovery strategies, and disaster recovery mechanisms, and participated in disaster recovery drills for various environments. Successfully implemented log shipping for DR solutions.
- Provided 24x7 production database on-call support.

SQL Server DBA

Bank of America

Oct 2021 - Oct 2023

- Relocation of databases from one server to another server using attach and detach databases.
- Installing SQL Server with minimum access privileges service account to improve security and to attain high ratings in SOC audits.
- Involved in troubleshooting and fine-tuning of databases for performance and concurrency.
- Implemented log-shipping.
- Implemented high availability and disaster recovery solutions, drawing on technical experience in database clustering, log shipping, and failover strategies.
- Implemented and scheduled replication processes for updating our parallel servers.
- Provided 24x7 production support for SQL Server databases.
- Involved in weekly Change Management, in which code developed by developers is run on the production server.
- Worked extensively in Query Analyzer and Profiler for tuning queries using variables for characteristics and query costs.
- Maintained the database consistency with DBCC at regular intervals.
- Set up SQL Server configuration settings to resolve various resource allocation & memory issues for SQL Server databases and to set up ideal memory, min/max server options.
- Performed installations & performance tuning, managed capacity planning & user accounts, and implemented database security for multiple instances of development, certification, QA, and production SQL Server databases.

Junior SQL Server DBA

Target, MN

Aug 2017 - Sep 2021

- Responsible for monitoring and making recommendations for performance improvement in hosted databases like index creation, index removal, index modification, file group modifications, and adding scheduled jobs to re-index and update statistics in databases.
- Assisted log shipping for synchronization of databases.
- Involved in the migration of SQL Server 2012 databases to SQL Server 2016.
- Involved in creating stored procedures, views, tables, constraints.
- Monitored the server for high availability of the servers.
- Installed, authored, and managed reports using SQL Server 2014/2016 Reporting Service.
- Designed and implemented comprehensive backup plans and DR strategies.
- Implemented and Scheduled Replication process for updating our parallel servers.

EDUCATION

- Bachelor's degree in Computer Science from Rift Valley University.
