Summary

Experienced Software Engineer with proven record of developing robust, scalable, and high-performance applications. Proficient in multiple programming languages and frameworks. Adept at collaborating with cross-functional teams to deliver innovative solutions. Seeking to leverage my expertise in full-stack development to drive technological advancement.

Skills

- Software development in JAVA, PHP, Python, NodeJS.
- Solid experience working with CI/CD.
- Experience with Event Driven System Architecture.
- Agile Methodology.
- AWS.

Courses

- JAVA SE Programmer.
- PHP application developer.

Languages

- English.
- Spanish.

Work experience

Senior Software Development Engineer

Nov-04-2019 - Apr-10-2025 / 📍 London, UK

HICX Solutions - Supplier Information Management

- **Responsibilities:**
 - Software developer for Java, VueJS projects.
- **Projects:**
 - Hicx-Esm: SaaS platform that enables seamless Digital Supplier Information Management.
- **Technologies used:**
 - Languages: Java ☕, Groovy, Python 🐍.
 - Frameworks: Spring Framework, Spring MVC, Spring Boot, Spring Batch, Django.
 - Database: PostgreSQL 10.x - 17.x.
 - ORM frameworks: Hibernate.
 - Version control: Git.
 - Web Services: SOAP/RESTful.
 - Application integrations: Enterprise Service Bus (ESB), Java Message Service (JMS), File/Data transfers. J2EE Technologies (Servlets, JTA, JMS, web containers).
 - Cloud provider technologies (AWS, Azure).
 - Implemented custom SAP applications.

Senior Software Engineer

Oct-15-2019 - Feb-25-2021 / 📍 Lima, Peru

Caja Huancayo - Financial Institution

- **Responsibilities:**
 - Development of proprietary tools and data generation applications in Java.
 - **Projects:**
 - Mobile App: web application for security and permissions purposes.
 - **Technologies used:**
 - Languages: Java ☕, Python 🐍.
 - Frameworks: Apache Struts 2, Spring MVC, Django.
 - Web Server: JBoss EAP 6.x.
 - Software Development Life Cycle (SDLC) Agile/SCRUM.
 - Database: Oracle RDBMS 12.x, PostgreSQL.
 - ORM frameworks: Hibernate, JPA (Java Persistence API).
 - Version control: Git.
 - JavaScript: TypeScript v3.x, AngularJS.
 - Web Services: SOAP/RESTful.
 - Unit Testing.
 - Automated test practices (Unit, Integration & Acceptance).
-

Senior Software Engineer

Feb-20-2019 - Oct-15-2019 / 📍 Lima, Peru

Canvia - digital transformation solutions and services

- **Responsibilities:**
 - Define the architectural approach and the design of complex applications that include web / API services and messaging solutions.
- **Projects:**
 - Sedapal ASI - Water supply company: web application for security and permissions purposes.
- **Technologies used:**
 - Language: Java ☕.
 - Frameworks: Apache Struts 2, Spring MVC.
 - Web Server: JBoss EAP 6.x.
 - Developing and implementing server-side applications using Node.js.
 - Database: Oracle RDBMS 12.x.
 - ORM frameworks: Hibernate, JPA (Java Persistence API).
 - Version control: Git.
 - Practical experience in Dev OPS and CI\CD.

Senior Software Engineer

Apr-01-2019 - Aug-25-2021 / 📍 Lima, Peru

Intralot - Games of lotteries and sports betting

- **Responsibilities:**

- Define the architectural approach and the design of complex applications that include web / API services and messaging solutions.
- Ensure that the designs align with the requirements of the Enterprise Application Security Program.
- Work with business leaders and technicians, sponsors and analysts in understanding problems, finding requirements, analyzing complex business requirements, data analysis and modeling.
- Design and write functional & technical specifications.

- **Projects:**

- Products: <https://play.google.com/store/apps/developer?id=Intralot>
- Intra Sales Leader:
 - Mobile application for the detailed Sales Report by Deputy Manager, Regional, Supervisor, Coordinator and Leader.
- Intra Agents:
 - Mobile application to validate the Instant Stock, the Account Statement, the Advance of the month and the Bonds.
- Intra Sales:
 - Mobile application for visualization of Intralot bonds and commissions.
- Agent Supervision:
 - Mobile application for display of Sales Advance, Advance per game, Balance, POS without sales, Instant Stock, Incentives.

- **Technologies used:**

- Languages: Java  , Dart, Python  .
 - Frameworks: Apache Struts 2, Spring MVC, Android SDK Tools, Django.
 - Web Server: JBoss EAP 6.x.
 - Develop and optimise cross-platform mobile apps using Flutter framework.
 - Database: Oracle RDBMS 11.x, 12.x, SQLite.
 - ORM frameworks: Hibernate, JPA (Java Persistence API).
 - Version control: Subversion (SVN), Git.
 - Web Services: SOAP/RESTful.
 - Unit Testing.
 - Developing and implementing server-side applications using Node.js.
 - Practical experience in Dev OPS and CI\CD.
-

Java Software Developer

Aug-15-2018 - Mar-30-2019 / 📍 Lima, Peru

International Business Machines (IBM) - Oil & natural gas company (PetroPerú)

- **Responsibilities:**

- Web and mobile development of systems used by the PetroPerú client.
- Work with technical leaders and analysts to understand problems, find requirements, analyze complex business requirements, data analysis and modeling.

- **Projects:**

- Operations Management System (SGO):
 - Mining Operations Management System, developed to measure based on the requirements of mining customers.
- Supply and Demand Committee (COSUDE):
 - Web system used to authorize hydrocarbon acquisitions.
- Hydrocarbon Purchasing System - External Market Data (DATAMEXT):
 - Web system used to manage purchases of hydrocarbon acquisitions.
- Bidding System (TENDER):
 - Web system used to manage hydrocarbon procurement tenders.

- **Technologies used:**

- Language: Java ☕.
 - Framework: Apache Struts 2, Spring, Sencha Ext JS.
 - Web Server: JBoss EAP 7.x, Apache Tomcat, IBM WebSphere.
 - IDE: Eclipse Spring Source Tool Suite (STS).
 - Developing and implementing server-side applications using Node.js.
 - Middleware: MQSeries, XML, Web Services.
 - Database:
 - Oracle RDBMS 11.x, 12.x.
 - PostgreSQL 9.x, 10.x.
 - Db2 10.x.
 - ORM frameworks: Hibernate, Oracle TopLink.
 - Version control: IBM Rational ClearCase, Git.
 - Practical experience in Dev OPS and CI\CD.
-

Software Engineer

Oct-23-2017 - May-25-2018 / 📍 Lima, Peru

Avantica Technologies S.A.C.

Encora | Digital Product & Software Engineering Provider

- **Responsibilities:**

- Build and ship clean, performant, scalable, secure, quality software that exceeds customer expectations.
- Work with Product, Quality, DevOps and Ops to ensure that we deliver the best possible customer experience.
- Be available as necessary to troubleshoot urgent issues.

- **Projects:**

- The Appetize platform is a cloud-based POS and includes terminals, handheld devices, and kiosks.
- Enterprise Cloud POS and Digital Ordering Platform.

- **Technologies used:**

- Languages: PHP , Java , Python .
 - PaaS: Docker, Vagrant.
 - Frameworks: CodeIgniter, Symfony, Laravel, Spring Framework, Spring WebFlux, Django.
 - Web Server: Nginx, Apache HTTP Server.
 - IDE: PhpStorm.
 - Middleware: XML, Web Services.
 - Business management software: NetSuite.
 - Database: MySQL 5.x, MongoDB 2.x - 3.x.
 - ORM frameworks: Doctrine ORM.
 - Version control: Git.
-

Software Developer

Sep-14-2016 - Oct-20-2017 / 📍 Lima, Peru

Celer S.A.C - Editorial Group El Comercio S.A.

- **Responsibilities:**

- Define the architectural approach and the design of complex applications that include web / API services and messaging solutions.
- Create web services (RESTful APIs) in Symfony, to be consumed by mobile applications.
- Support the QA (quality assurance) area in software testing.
- Support the Infrastructure area in the deployment of products to AWS.
- Document software development.

- **Projects:**
 - Newspaper CMS:
 - Web system for managing all client newspapers (Comercio, Trome, Gestión, Peru21, Depor, Publimetro, Ojo).
 - Botillería 365:
 - <https://botilleria365.com>, e-commerce that specializes in the sale of alcoholic beverages and their accessories.
 - El Comercio Subscribers Club Portal:
 - <https://clubelcomercio.pe>, exclusive portal of subscribers of El Comercio, where they show promotions, offers and generous benefits.
- **Technologies used:**
 - PaaS: Docker, Vagrant.
 - Middleware: XML, Web Services.
 - Cloud computing platforms: Amazon Web Services (AWS).
 - Language: PHP  .
 - Frameworks: Codeigniter, Symfony.
 - Web Server: Nginx, Apache HTTP Server.
 - IDE: PhpStorm.
 - Content management system (CMS): WordPress.
 - Language: Java  .
 - Web Server: JBoss EAP 7.x, Apache Tomcat.
 - Frameworks: Spring Framework, Spring WebFlux.
 - Database: MySQL 5.x, Oracle RDBMS 11.x, 12.x, SQLite.
 - ORM frameworks: Doctrine ORM, Propel.
 - Version control: Git.
 - Developing and implementing server-side applications using Node.js.

Software Developer

Jan-05-2015 - Sep-13-2016 /  Lima, Peru

Dev4Media S.A.C.

- **Responsibilities:**
 - Full Stack developer. Web and mobile developer.
 - Server and hosting environment, responsible for the configuration and maintenance of the server.
 - Data modeling, in different database management systems.
 - Business logic, skill in the use of development frameworks.
 - API layer / Action Layer / MVC, ability to create consistent layers.
 - User interface, integration of graphic designs using HTML5, CSS3 and javascript (jQuery, AngularJS).

- User Experience (UX), my goal at this point is to make sure the user is comfortable with the response of the system. Reducing the steps of the processes, placing informative messages.
 - Understanding what the client and business need.
 - **Projects:**
 - OverTrack: GPS tracking software solution.
 - Taxi Corona: Web & Mobile Taxi App.
 - **Technologies used:**
 - Cloud computing platforms: Amazon Web Services (AWS).
 - Frameworks:
 - Php: Symfony 2.*, 3.*, Laravel 4.*
 - Java: Apache Struts 2, Spring.
 - Database: MySQL 5.x, Oracle RDBMS 11.x - 12.x, SQLite.
 - ORM frameworks:
 - Php: Doctrine ORM, Propel.
 - Java: Hibernate.
 - Version control: Git.
 - Practical experience in Dev OPS and CI\CD.
-

Software Developer

Nov-01-2013 - Jun-30-2014 / 📍 Lima, Peru

Papaya Peru S.A.C.

- **Responsibilities:**
 - Analysis of the requirements of the company.
 - Front-end and backend development of the system.
 - Creation of web services (RESTful Apis) to be consumed by cinepapaya app.
- **Projects:**
 - CinePapaya App:
 - Mobile application for the sale of movie tickets online.
 - Content Management System (CMS) cinePapaya:
 - Web solution to manage movie content.
- **Technologies used:**
 - Language: PHP .
 - Framework: Yii 1.x, 2.x, CodeIgniter.
 - Web Server: Nginx, Apache HTTP Server.
 - IDE: PhpStorm.
 - Middleware: XML, Web Services.
 - Version control: Git.
 - Database: PostgreSQL.

Software Developer

Feb-01-2011 - Dec-01-2011 / 📍 Lima, Peru

USMP Academic Virtualization Unit

- **Responsibilities:**

- Ensure that the designs align with the requirements of the Enterprise Application Security Program.
- Work alongside Analysts, the Technical team and the Client.
- Web development of the frontend and backend of the different systems of the university.
