EXPERIENCE

Test Engineer at Noké | March 2023 - March 2025

- Created, maintained, and ran manual test cases based on a regular software release schedule in an Agile environment for both mobile and browser applications.
- Created and maintained a Regression suite based on specific user journeys that was run manually at the end of every project cycle.
- Used SQL Workbench, Postman, AWS Cloudwatch & CloudTrail and DBeaver for data tracking and log tracing.
- Utilized Jira and Zephyr scale within Jira for test case creation, defect tracking and project management.

SDET (Software Developer in Test) at Bakkt | November 2021 - December 2022

- Created and maintained various test suites for manual testing that were then moved into automation test suites.
- Performed manual Regression and End-to End testing across Bakkt's mobile and web platforms.
- Participated in daily Scrum standups and worked in two week sprints within the QA department with developers, project managers, and a Scrum master
- Utilized Jira for defect tracking and project management.

.Net Developer at LGE | December 2018 - December 2019

- Utilized JavaScript, C#, and SQL to create a native mobile environment and website for LGE's online banking needs

.Net Developer at Young Consulting | May 2015 - Oct 2018

- Developed and maintained features for a product called ESL Office, a web application used by clients to submit and manage life insurance activities for two different lines of insurance

EDUCATION

Southern Polytechnic State University - Bachelor of Science: Computer Science

- Graduated with 3.5 GPA and Highest Honors
