

JOHN VICTOR

Technical Architect | Project manager | SAP certified Fiori/EWM/ABAP/MM/CRM-ABAP/HCM

+1 908 745 1558 | **Mississauga, Canada** | john.victor.sap19@gmail.com

SUMMARY

- 15+ years of SAP technical experience including 5+ years of direct client interaction, at various levels, on site; 6+ years of leading SAP technical teams of up to 30 members and delivered projects on time.
- End to End Project Scoping and Management which includes
 - Preparing Request for Proposal based on the client's business requirement,
 - Helping clients with prioritizing the requirements based on the business needs,
 - Estimating the effort and proposing project plan based on the budget,
 - Finalizing the RFP document, Drafting the Statement of Work (SOW) and Successfully initiating Project Sign-Off.
- Client Verticals include Pharmaceutical, Health Care, Mining, Insurance, Consumer Goods and Education.
- Handled multiple SAP projects effectively by leading and managing multi-functional and geographically distributed teams.
 - Spearheaded 8 end-to-end implementation projects – 3 enhancement projects, 2 SAP system upgrade projects, 3 S/4 Hana to ECC integration projects and delivered high quality products within the expected timeframe and budget.
 - Led 4 (AMS) application maintenance support projects with extreme client satisfaction.
- Specialized in SAP CRM, Workflow, HR, SD, FI/CO, MM, WM, and S/4 HANA
- Expertise in implementation, upgrade, rollout, integration, and support.
- Proficient in developing RICEFW objects in ABAP, ABAP-HR, ABAP-CRM, CRM Web-UI.
- SAP Fiori certified, experienced in creating Fiori and SAPUI5 applications using OData services.
- SAP EWM (Extended Warehouse Management) certified, familiar with Supply chain business model, warehouse management, configuration and implementation.
- Skilled in fine-tuning ABAP code and improve performance by using SQL Trace, Performance Analysis and Runtime Analysis.
- Expertise in using Solution manager to upload documents, creating change and transport requests.
- Experienced in configuration and troubleshooting while integrating
 - various external hardware devices such as RF devices, printers, non-SAP third party systems and SAP applications.
 - Integrate SAP with Non-SAP systems by using middleware such as TIBCO, Informatica, Gentran and EDI sterling integrator.
- Expertise in full software development life cycle (SDLC) implementation in SAP R/3 and knowledge in Agile, SCRUM & ASAP methodology
- Hands on knowledge in SAP Fiori
 - SAP Eclipse-ADT, Web IDE Tools, UI annotations.
 - Create CDS views, creation and consumption in Fiori app through gateway Odata.
 - Debugging gateway services and analyzing the error logs.
- Knowledge in SAP EWM
 - ERP to EWM integration, EWM org. structure, delivery document flow, inbound process, various document in inbound process, create packaging specification, storage control and VAS in inbound, Picking and putaway process, WR, WT, WO creation, Replenishment, yard management, kitting, and labor management.
- Excellent communication, analytical and documentation skills, innovative and creative, team oriented and multi-tasking. Hardworking adaptive learner.

EDUCATION, CERTIFICATIONS & ACHIEVEMENTS

- Bachelor of Engineering (BE), Computer Science, Anna University, Chennai from 2001 – 2005
- SAP Extended Warehouse Management Nov 2021 SAP
- SAP Fiori User Experience Aug 2020 SAP
- SAFe Practitioner Oct 2020 AGILE
- Best project of the year award Dec 2018 Pharma client company
- Best Team award 2011 Accenture
- Platinum Award | Best Initiator Award | Star performer award | Above and beyond the Duty | GEM Award between 2015 and 2020 CTS

SKILLS

- Quality/Testing : SAP Solman, JIRA, Service Now, HP Quality Center, GEODIS
- Microsoft tools : Word, Excel, Outlook, Power Point, Visio, MS Project, SharePoint
- Middleware : Tibco, EDI, Informatica, Gentron, Sterling Integrator
- Transportation Management : XPS-FedEx, UPS, ATS, SKELTON, Aerosafe, CHEP
- SAP Technical : ABAP/4, UI5, ODATA, UI Annotation, CRM Web-UI, FIORI
- SAP Functional : WM, EWM, S/4 HANA, HR, SD, CRM, FICO, MM

EXPERIENCE

COGNIZANT TECHNOLOGY SOLUTIONS, CANADA

MAR 2022 to NOW

PROJECT MANAGER(Technical Architect)

Project (pharmaceutical client) - Migrating SAP warehouse management system to HU managed system & enabling seamless traceability of product from manufacturer to supplier.

- Business wants to achieve complete drug traceability, to provide to CDC.
- Leading a diverse team of 6, as an efficient techno-functional architect
 - Analyzed functional & non-functional requirements & estimated effort & budget.
 - POC (Proof of Concept) to build the prototype – prepared, presented to business owner.
 - Prepared blueprint, functional specification.
 - Reviewed & approved technical specification.
 - Finalized SIT & UAT test scripts; reviewing preparation of user manual, cut over plan, KT documents, audit documents.
 - Presented changes to change governance board for approval.
- Technical activities – build interface using XML file based, ALE-IDOC, RFC and web-service.
 - Streamlined 2D barcode printed in pallet, case and individual units.
 - Developed decoding tool to enable product tracking from distribution center to customer.
 - Developed various labels to print HU bar code, Bin information, verification labels in various layout (WiFi) printers.
 - Define and design two-step picking process by developing a new RF transaction.
- Technologies used - SAP ABAP/OOABAP, SAP S/4 HANA to ECC integration, LSMW, BDC, Workflow, ALE-IDOC, enhancement framework, smartforms, SAPScript, BADI, BAPI and FM .
- Functional activities - Configure WM: Org structure, master data, enterprise structure, warehouse storage type, storage section, storage bin, define putaway and picking strategy, replenishment, scrapping, internal warehouse movement, physical inventory, cycle count, customer return and internal warehouse movement.
- Integrational activities – Configure & develop various RF screens using module pool programing and setup external devices - RF gun, Zebra, Laster & WiFi printers in SAP WM. Eliminate usage of middleware and convert XML files directly from SAP.

Achievements

- Appreciated by business for streamlining 2D barcode into GS1 standard, which reduced unloading time by 30% and reduced human errors by 100%.

PROJECT MANAGER (Technical Architect)**Project (pharmaceutical client) - SAP CRM to SAP MDG integration**

- Canada customers' data was migrated from SAP CRM system to SAP MDG system. CRM system was used to display the Canada customers' information without the privilege to edit the master record.
 - Led a strong team of 5, as an efficient technical architect.
 - Reviewed and approved technical specifications.
 - Worked on CRM Business Transaction Events.
 - Worked with middleware team to finalize field mapping, conversion and transformation rules.
 - Trained new team members in CRM Web-UI.
 - Reviewed code built by team.
 - Technical activities - Developed interfaces between MDG system and SAP CRM system - ALE IDOC to create/change business partner and contact person.
 - Enabled functionality to update BP relationship in CRM.
 - Enhanced DIA workflow – CRM & ECC system.
 - Added custom fields – EEWB & AET.
 - Enhanced CRM Web-UI screens – for specific roles.
 - Registered/unregistered queues to debug queues from CRM to ECC & Vice versa – SMQS/SMQR.
 - Technologies used - SAP CRM & MDG, Queue Monitoring, BADI, BAPI, UI configuration, transaction launcher and Query services
 - Integrational activities - Integrated SAP MDG to CRM and ECC system – TIBCO as middleware – RFC/ALE-IDoc.
- Achievements**
- Appreciated by business for implementing CRM to MDG integration without impacting the front-end user interface which eliminated business's training cost.

PROJECT MANAGER**Project (pharmaceutical client) - S/4 HANA to SAP WM Rollout**

- New warehouse located in Canada was migrated to existing North American system - led a WM team of 8, as a successful technical architect.
- Built high-level architecture - mapping, configuration, system connectivity gap analysis and new process.
- Presented changes to Change Governance Board and got approvals.
- Integrated with various shipping servers such as connect-ship, FedEx, XPS solution to perform shipping activities.
- Configured enterprise structure in WM, custom movement type to perform sampling & subcontracting process, configured UOM and EAN category to sync up the master data with MDG system.
- Established connectivity between ECC to S/4 HANA system & MDG system by creating RFC and whitelist the middleware servers.
- Built an analytical report to compare the inventory discrepancy between S/4 & WM system.
- Technical activities
 - Created a custom transaction to automate the pick/pack and TO creation functionality.
 - Enabled custom packing functionality based on volume to help business to complete the picking and packing activity automatically without any human intervention.
 - Developed various RF transaction - model pool program.
 - Enabled double verification functionality to do the picking process error free – to reduce unpacking scenarios and save time.
 - Simulated EWM functions in WM - warehouse monitoring, pick & pack timing to enable labor management.

- Streamline the warehouse internal movement process so that the warehouse runs efficiently such as add validation to enter reason code for certain movement type, not allow to move cold chain product to ambient product.
- Implemented several OSS notes to fit the gaps such as number of shipping point configuration restrictions, zip-code mismatch, etc.,
- Enhanced standard BADI to add custom logic in material master, material movement, goods receipt, and goods issue IDocs.
- Expertise in creating/migrating transport request through solution manager.

COGNIZANT TECHNOLOGY SOLUTIONS, USA

JUN 2020 to NOV 2020

PROJECT MANAGER

Project (pharmaceutical client) – Upgrade SAP ECC system from EHP5 to EHP8.

- Delivered on time without major defects by leading multiple mid-sized teams.
- Evaluated existing system landscape and finalized scope and finalize database version, kernel & application release version with stakeholders and got approval.
- Implemented organization specific tools to evaluate custom objects. Used (CuP) tool to validate and correct all custom objects. Exposure to Panaya tool.
- Executed SPDD transaction to compare all ABAP dictionary objects of latest system with old system. Analyzed objects and chose the right version. Accepted modifications to retain custom objects in upgraded version.
- Executed SPAU transactions to adjust all SAP repository objects (Program, Functional Modules, Screens, Interfaces, Enhancements and User exists)
- Decentralized SAP WM system was integrated with multiple ECC systems, evaluated standard IDoc structure, validated any structure mismatches and provided solution.
- Identified & rectified external number range issues caused due to system upgrade.
- Troubleshooted issues - runtime errors, performance issues, structure mismatch, IDoc failures, smartform printing issues and custom reports, provided solution as and when required
- List out the cut-over and manual activities - activate BADI implementation, user exit & regenerate ABAP queries to be performed after upgrade.

COGNIZANT TECHNOLOGY SOLUTIONS, USA

DEC 2017 to MAY 2020

PROJECT MANAGER

Multiple Projects (pharmaceutical client) - SAP ECC to SAP S/4 HANA integration; Performance improvement; SAP CRM integration with payment card.

- Managed & led multiple teams through following integrations
 - SAP with various pharmaceutical business applications(Non-SAP) such as Veeva, Hybris, Taxware, Vertex, Vistex, Tracelink, INMAR, IQVIA etc.
 - SAP to shipping carriers (FedEx, Skelton, ATS, Aerosafe) by using SAP web service.
 - SAP WM system with MDG and S/4 HANA.
 - Establishing connectivity from SAP to SAP or Non-SAP systems.
- Operated with multi-functional, multi-disciplinary teams & collaborated with project stakeholders.
- Visited distribution centers & met distribution heads periodically to interview, understand, automate & improvise everyday processes which improved efficiency & reduced operational costs.
- Led & presented client workshops & demonstrations on technical topics.
- Worked with various streams to prepare and conclude the cut-over activities to be performed during project Go-Live.
- Technical activities
 - Developed OneClick Inventory Load, a tool that reduced warehouse downtime during migration by 60% (5 days to 2 days)

- Developed a destruct tool to streamline scrapping process, which increased warehouse effectiveness & cost saving by 100% by reducing unnecessary scrapping - OOPS ALV, BAPI, ALE-IDoc, workflow, SAP Fiori - ODATA and UI annotations.
- Set-up webservice alert process to manage shipment routes during inclement weather which saved about \$1M every winter in revenue.
- Improved SAP performance tuning on vaccine system which improved performance by 92% - award winner project.
- Streamlined delivery processing – restricted DC users from deleting delivery rather than allowing them to zero pick the particular line item.
- Customized standard functionality by adding storage condition in HU output type so that the packing slip prints in the designated printer – to help picker to complete picking process quickly.
- Created data dictionary objects, enhanced standard views by providing access to maintain tolerance limit.
- Proficient in creating/set-up RFC from SAP to SAP & SAP to Non-SAP systems. Knowledge in setting up new UNIX directory, mounting the directory with SAP application server.
- Worked in Control-M tool to setup SAP jobs created scripts to establish file-watcher and transfer the file from SAP application directory to other servers.

COGNIZANT TECHNOLOGY SOLUTIONS, INDIA

JUN 2016 to DEC 2017

PROJECT MANAGER

Project (pharmaceutical client) - Application Maintenance Support (AMS) & development

- Managed a skilled support/change management team of about 20 members and delivered objects on schedule.
- Automated major part of application support by building tools & processes.
- Implemented Mobile DC functionality by enhancing standard ATP check functionality & custom WEBDYNPRO screen.
- Proficient in development of SAP ABAP RICEF Objects in SD, CRM, FICO, WM and HR.
- Took initiative to build tools/re-usable components and audited various pharmaceutical client' SAP processes.
- Developed a web-service to call SMARTFORM, experience in creating web-services and publishing web services using SOA Manager
- Involved in design and development of WD Application, Workflow, BSP changes, interface reports, ALV reports, customizing the existing reports, enhancing the user-exits, creating new smartforms, analyse the existing functionality and provide new Ideas and solutions.
- Developed various tools such as (IDOC Monitoring, Delivery monitor, TR review Automation, Audit review tool) as part of Continuous Service Improvement.

COGNIZANT TECHNOLOGY SOLUTIONS, INDIA

MAY 2012 to JUN 2016

SENIOR CONSULTANT

Multiple projects - AMS (Pharmaceutical & Insurance clients) CRM implementation (Education Vertical)

- Led a skilled support team of 10 members
 - Monitored incident queues; assigned enhancements & tickets
 - Delivered objects on schedule
 - Documented technical specification for enhancements & minor projects
 - Documented use cases, code review & UAT check list
- Technologies used – Service Now ticketing system; GEODIS; SAP ABAP, ABAP HR, Webdynpro, BSP, OOPS, Workflow, SAPSCRIPT, SMARTFORMS, User Exits, enhancement framework, IDoc, ALV, BADI, BAPI, RFC, module pool program, BDC, LSMW.
- SAP HR module
 - Created and enhanced the standard Infotype based on user requirement.
 - Developed WEBDYNPRO page for e-Learning.

- Worked in SAP Proxy interface & developed various reports.
 - Used SAP Rev-Trac tool to migrate SAP Transport request into higher environment.
- SAP CRM module
 - Exposure to model view controller architecture; Genil & BOL
 - UI field elements & UI configuration & BSP pages.
 - Expertise in middleware configuration and debugging.

INFOSYS LIMITED, INDIA

SEP 2011 to APR 2012

TECHNOLOGY ANALYST

Project - Application Maintenance Support (Rio Tinto – Mining Client)

- SAP HR functional configuration in PA, OM, TM, Benefits and eLearning., OVSD ticketing tool.
- SAP HR business process - requirement gathering, process analysis and providing solution.
- Interacted with SAP AG to resolve outstanding production issues.
- Created various data migration program using BDC & LSMW to upload master data related to qualification, leave & time management.
- Created a custom implementation in Termination Organizer.
- Configured pay scale grouping, public day calendar for Australian and Canadian users.

ACCENTURE SERVICES PVT LTD, INDIA

JAN 2010 to SEP 2011

SOFTWARE ENGINEER

Multiple Projects – SAP CRM & HR Implementation (Meter Toledo & Pepsico)

- Prepared Technical Design & created various objects in SAP CRM Web-UI and CRM ECC system
- Created implicit and explicit enhancements and customized implementation for standard BADIs.
- Created various Reusable objects. Developed various reports in SAP CRM and assigned reports into Web-UI using transaction launcher.
- Participated in client calls and got requirements from user and start technical design, build and prepared test cases and user manual.
- Created various changes in standard Web UI by redefining standard methods.
- Created new fields in standard component using EEWB (Easy Enhancement Workbench), Implemented search help and drop-down fields for various standard components.
- Developed a new custom component in component workbench from scratch and created a logical link and assigned this component to specific business role.
- Implemented various search help by reusing standard search help as usage window in enhancement workbench runtime repository.
- Worked in ABAP HR module. Developed various Interface programs related to Time, Payroll module, Created Proxy based interfaces. Built various ALV reports using logical database. Created various Conversion program using BDC, LSMW
- Worked in various Data Dictionary objects. Developed custom Infotypes and added additional fields in standard infotype. Worked in Dialog programs, Dynamic Actions

CSC, INDIA

NOV 2006 to DEC 2009

BUSINESS CONSULTANT

Multiple Projects – SAP CRM & HR Implementation (Covansys & CSC)

- Prepared technical specifications based on requirement, fixed bugs in existing system based on production issues reported. Debugged SAP programs to understand and solve different problems.
- Had experience in financial period 4-4-5 conversion in SAP FICO. Worked on various function models to convert posting period from every month to 4-4-5.
- Developed custom output device to generate report output format in spool request.

- Worked in SAPSCRIPT and SMARTFORMS for purchase order and Invoice printout.
- Enhanced user exit to add custom validation and field mapping in CATS (Cross application time sheet) transaction. Created custom BAPI to reverse timesheet.
- Expertise in creating various data dictionary objects and transport management tools.
- Developed various interfaces to transfer data from SAP to Non-SAP by using RFC, ALE-IDoc and flat file
- Created various reports in SAP HR module by using object-oriented ABAP, ALV GRID, ALV List, LDB and Ad-hoc query
- Enhanced standard infotype by adding additional fields and create user-exit to populate the email id automatically
- Developed a complex logic to calculate 401K benefit for US employees.
- Created custom infotype to capture employee's Hot skill and special allowance program.
- Developed HR Headcount report using SAP Objects, based on the report the output values are placed into spreadsheet in a specific row and column.
- Created dynamic actions and knowledge in ESS/MSS portal.
