EXECUTIVE SUMMARY

Full-Stack Developer and Software Architect with 20+ years of experience designing scalable, high-performance web applications. Adept at bridging business strategy with technical execution to drive efficiency, cost savings and revenue growth. Proven ability to lead cross-functional teams, architect secure cloud-based solutions and enhance system scalability.

PROFESSIONAL EXPERIENCE

Web Application Developer

2005-Current RTI International - Durham, NC

- Architected and deployed full-stack solution, ensuring seamless integration between front-end frameworks and back-end services, **reducing data entry and labor time by 75%**
- Act as a strategic bridge between business and technology teams, leading cross-functional collaboration to define strategy, execute key projects, and drive digital transformation
- Identify and implement cost-saving solutions, **reducing operational expenses up to 30%** through optimized technical architectures and efficient business workflows
- Transform raw **customer data into actionable insights**, designing user-friendly dashboards and interactive data visualization tools to **improve decision-making**
- Enhance team efficiency by **streamlining processes and eliminating workflow bottlenecks**, improving project execution and communication across departments
- Develop and deploy enterprise-grade applications using .NET MVC, Blazor, SQL, NoSQL, Web API, JavaScript, TypeScript, Angular, React, Next.js, and CSS, **ensuring optimal performance**
- Lead development for high-traffic public and private sites, **delivering secure, scalable architectures to serve hundreds of thousands of users**

PROFESSIONAL EXPERIENCE

Web Application Developer

2004-2005 Motricity - Durham, NC

- Served as the primary liaison between executive leadership, product management, and technology teams, ensuring alignment and seamless execution of application initiatives
- Led development and implementation of core functionality for a multi-million dollar eCommerce platform, integrating a multi-currency payment system for global sales
- Orchestrated cross-functional collaboration, driving on-time, budget-conscious delivery of high-profile projects while maintaining top-tier technical standards
- Engineered continuous enhancements, optimizing site performance, user experience and conversion rates for a high-traffic eCommerce platform
- Provided mission-critical production support, resolving system issues to ensure uninterrupted platform stability and operational efficiency

Account Executive

1997-2004 The Diaglog Corporation - Durham, NC

- Progressive leadership across roles, driving financial growth and operational efficiency
- Designed and led full application development lifecycles, delivering revenue-generating web products that enhanced business operations
- Developed award-winning web interface, improving usability, engagement, and accessibility
- Engineered a corporate intranet, centralizing content management, reducing maintenance overhead, and improving data distribution efficiency
- Implemented effective change management strategies using Rational Unified Process (RUP)
- Gathered and translated complex business requirements into scalable technology solutions
- Led customer training initiatives, empowering end users to maximize tech investment

Independent Communications Consultant

1996-1997 WealthCom - Cary, NC

- Top new logo and revenue producer in year one

TigerDirect Corporate Sales

1994-1997 TigerDirect Corporate Sales - Morrisville, NC

- Developed and managed strategic relationships with Fortune 1000 companies, securing high-value accounts and expanding business opportunities
- Consistently exceeded corporate sales targets, earning recognition as a top-performing sales consultant through high-impact client engagements and revenue growth
