Chattanooga, TN | juzten@gmail.com | www.juzten.com | www.linkedin.com/in/justinwspain

Engineering Lead & Full-Stack Software Engineer

Accomplished technical leader with over 11 years of experience building scalable web applications and leading cross-functional teams. Expertise in Python backend development, system architecture, and optimizing application performance.

Career experience

Art Processors - Client Facing Technical Lead (Remote) | Jan 2023 - Feb 2025

- Led technical delivery of mobile museum tour applications, managing specialized teams of developers
- Architected and maintained Content Management System (CMS) powering both Android and iOS applications
- Led critical accessibility improvements for mobile applications by analyzing audit reports and creating remediation plans
- Partnered with clients and internal teams to align technical execution with creative vision

Bits Crypto - Lead Backend Engineer (Remote) | Aug 2022 - Jan 2023

- Led backend feature planning and API development team, coordinating with founders on product vision
- Managed servers and databases on AWS EC2 and RDS.
- Built and supported API integrations with Plaid, Coinbase, Firebase, Magic.link, Twilio, and ViralSweep.

Paloma - Engineering Lead (Remote) | 2021 - 2022

- Successfully led and launched Square integration enabling merchants to sell through automated FB/IG messaging using Paloma's Storefront.
- Reduced page load times from timeout failures to under 3 seconds through follower database architecture, API optimization, and database optimizations.
- Implemented auto-generated database migrations and led bi-weekly retrospectives.
- Conducted technical interviews and assisted with onboarding new hires.

Ten Spot - Engineering Lead (Remote) | 2019 - 2021

- Implemented modern engineering practices, including git workflow and automation with GitHub, Jira, and Slack.
- Successfully developed client Slack application with automated messaging and analytics
- Gathered and reported engineering KPI metrics for investor updates and leadership meetings.
- Led Agile processes, including sprint retros, planning, and backlog management.
- Served as interim CTO, handling hiring, negotiations, and leadership responsibilities.

Independent Contractor/Freelance (Remote) | 2017 - Present

- Developed various client projects, including:
 - Smartbook: Photoshoot booking web application (Flask/Python/Javascript)
 - Southern Adventist University: Degree project and caching service
 - Arney Guess Goldsmith website
 - Aitia: Covid-19 check-in app for school systems
 - Enterprise sales/marketing/service SaaS platform (Django/Python/AngularJS)
 - SyncFM: Desktop application for CRM data sync (NW.js, VueJS, Vuetify)

Emma - Technical Services Engineer (Remote) | 2015 - 2018

- Created custom API integrations between Emma and client CRMs using Flask/Python.
- Developed desktop applications for Windows and Mac to handle CSV data and API calls.
- Implemented numerous automated contact sync systems for various clients using multiple APIs and technologies.

Dryan, LLC. - Fullstack Engineer | 2014 - 2015

Developed web applications including a custom law firm client intake system, e-commerce solutions, and Wordpress development. I developed infrastructure tools like a GitHub backup system and client issue tracker.

Tennessee Valley Authority - IT/Safety/Industrial Hygiene Intern (Remote) | 2013 - 2015

I managed SharePoint sites for multiple TVA Safety units, significantly improving the Safety Manual's functionality and user experience. I developed a responsive mobile inspection form and created Python scripts for efficient data handling. I led SharePoint training sessions and implemented various safety-related web applications, demonstrating my ability to leverage technology for improved organizational safety and efficiency.

Education & Community

- Western Governors University - Coursework for B.S. Information Technology—Software
- University of Tennessee Chattanooga - Upper coursework in computer science
- Chattanooga State Technical Community College - A.A.S Computer programming
- Ran a Python meetup in Chattanooga, TN for 10 years
- Co-founded Chadev - Chattanooga's largest developer community (approx. 1000 members)

CERTIFICATIONS

CIW Web Design Specialist - CIW Database Design Specialist - CIW Javascript Specialist

Languages: Python, JavaScript/TypeScript, SQL

Frameworks & Libraries: Flask, Django, React, Next.js, Vue.js, AngularJS

Databases & Storage: PostgreSQL, SQLite, Redis, Mysql

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, Heroku, Digital Ocean, Git, GitHub, Jira, CI/CD, New Relic, Datadog

API Integrations: Square, Stripe, Plaid, Coinbase, Firebase, Magic.link, Twilio, Facebook/Instagram, Hubspot

Other Technologies: RabbitMQ, SharePoint, OAuth, NW.js, Tailwind CSS, Click (Python CLI), FullStory, Hotjar
