www.linkedin.com/in/karthik-sai-kolli-882b66316

Senior Full Stack Developer

Software Development Engineer with hands-on experience across banking and insurance domains, specializing in the design, development, and optimization of large-scale enterprise systems. Skilled in multiple programming languages, modern frameworks, and relational/NoSQL databases. Proven ability to build secure, resilient, and high-performance applications in Agile environments while consistently driving innovation, efficiency, and technical excellence within fintech and insurance ecosystems.

TECHNICAL SKILLS

- **Languages:** J2EE, Java 8/11/17/21, JavaScript, Kotlin, Python, Go (Golang)
- **Databases:** Oracle, PostgreSQL, MySQL, MongoDB, DynamoDB, Cassandra, Redis, NoSQL Datastores.
- **Web Technologies / Frontend:** Angular, React.js, Redux, Node.js, HTML5, CSS3, Bootstrap, Spring MVC.
- **Cloud Build and Deploy:** **AWS (EC2, ECS, S3, RDS, ECR, Lambda, CloudFront), Microsoft Azure, Google Cloud Platform (GCP), Docker, OpenShift, Jira**
- **Frameworks & Tech Stack:** Spring Boot, Microservices, Hibernate, JPA, Kafka, Elasticsearch, Solr, JPOS, RESTful APIs, SOAP, JSON, XML, JUnit, Mockito, SonarLint
- **Tools and DevOps:**
Git/GitHub, CI/CD (Jenkins, Azure DevOps), Ansible, Chef, AutoSys, Apache Tomcat, Agile Methodologies

PROFESSIONAL EXPERIENCE

INFOSOFT SOLUTIONS (WEST WINDSOR, NY)

Jan 2025 - Present

Senior Full Stack Java Developer

- Utilized advanced **Core Java** features—including multithreading, exception handling, and object serialization—to develop stable, high-performance backend components within the **Spring** ecosystem
- Enhanced platform security by embedding **Spring Security**, implementing strong authentication/authorization flows and token-based access control for financial applications.
- Designed and maintained **transaction processing modules** responsible for authorization, settlement, clearing, and reconciliation, ensuring strict ACID guarantees using **PostgreSQL** and **MySQL**
- Optimized PostgreSQL performance through systematic query optimization, indexing improvements, and analysis of execution plans, significantly speeding up real-time payment operations.
- Designed **event-driven microservices** with **Apache Kafka**, enabling continuous data streaming, event sourcing, and asynchronous communication across banking, fraud detection, and analytics systems.
- Managed the deployment of containerized workloads on **Microsoft Azure**, leveraging AKS, Azure Container Instances, Service Bus, and Azure Functions to build resilient, cloud-native architectures

- Improved delivery pipelines by creating automated **CI/CD workflows** using Jenkins and Azure DevOps, supported by testing frameworks like JUnit and Mockito along with TDD principles.
- Built **OpenSearch-driven analytics solutions** for fraud detection, transaction tracking, and reconciliation monitoring, tuning index structures and cluster settings to efficiently handle high-volume financial data.
- Motivated Java developer with hands-on experience in building web applications using Java, SpringBoot, SQL, and Angular 17.

Innovative Technologies (Vijayawada, India)

Senior Full Stack Java Developer

Aug 2021 – Dec 2024

- Built secure, scalable **RESTful APIs** for handling policy transactions, premium payments, and claim processing, implementing **OAuth 2.0** and **Spring Security** to protect sensitive customer and agent information.
- Created dynamic **ReactJS** dashboards for insurance operations, using **Redux** and **Redux-Saga** to manage complex state flows and deliver real-time insights into policies, claims, and payment activities.
- Utilized **Hibernate ORM** with **PostgreSQL** for consistent and reliable data handling, ensuring transactional accuracy, ACID compliance, and smooth management of policy and claims data across distributed services.
- Supported and enhanced microservices governing payments and claims, improving authorization, clearing, and reconciliation processes while ensuring alignment with regulatory rules and insurance industry data standards.
- Integrated third-party insurance services and internal APIs using REST and message-queue-based communication (Kafka/RabbitMQ), enabling seamless data exchange between policy, billing, and claims systems while improving overall system reliability.

Innovative Technologies (Vijayawada, India)

Java Developer

June 2020 – July 2021

- Built and supported distributed applications using **Java** and **Spring Boot**, focusing on scalable microservice architectures and smooth deployments across cloud-based environments.
- Managed data operations with **Hibernate**, improving performance through optimized queries, caching strategies, and effective lazy-loading configurations.
- Strengthened system stability and monitoring by integrating **Splunk** and **New Relic**, enabling early detection of performance issues and faster incident resolution.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment, contributing to sprint planning, backlog refinement, daily stand-ups, and retrospectives using **Jira** to ensure transparent and iterative delivery.

EDUCATION

Master of Science in information system management

Jan 2024 – Aug 2025

Union Commonwealth University

Key Courses: Data Visualization, Advanced Database Organization, Data Analytics, Computer Networks.
