CAREER OBJECTIVE

Recent computer science graduate with a strong foundation in programming, software development, and problem-solving. Seeking full-time opportunities or internships to leverage my technical skills and passion for innovation to contribute to impactful projects and grow professionally in a dynamic organization.

SKILLS

- Programming: Java, Python, C, C++, ARM Assembly, Lua
- Database: MySQL, MongoDB
- Web Technologies: HTML, CSS, Next.js
- Platforms: Windows, Linux

EXPERIENCE

Reality AI Lab

New York City (Remote), New York

Software Engineer Contributor

March 2025 - Present

- Developed and maintained responsive front-end features using **Next.js**, enhancing performance and user experience across key pages while communicating with the **Firestore** backend
- Collaborated on a **CI/CD** pipeline using **GitHub Actions** to ensure robust, automated testing and seamless deployment of new features to production

PROJECTS

Monster Evolution Arena

- Developed a combat system in **Lua** involving punching, kicking, and knockback for PVP combat to improve player engagement, helping reach over **24,000** players
- Leverage pair programming and code reviews to improve code quality, user enjoyment, and ensure game functionality

Rapid Rebut

- Built a simple and user-friendly GUI using **HTML & CSS**, for a chrome extension that marks up rumors and conspiracy theories on websites
- Achieved **2nd** place in the 2020 Congressional App Challenge for the NJ12 district

PantryPal

- Created a **Java-based HTTP server** backend that handled calls to external APIs like **ChatGPT** and a **MongoDB** database to store, retrieve, and create user-specific recipes including text and images
- Developed a user-friendly **JavaFX** GUI to ensure smooth user interactions and improve application utility
- Leveraged **GitHub CI/CD** pipeline, **Docker**, and **Gradle** to ensure consistent development and deployment environments while automating build processes for a scalable and maintainable project

Nachos

- Implemented **multi-thread support**, **multiprogramming**, and **demand paging** for the Nachos instructional OS

Supervised Hate Speech Detection

- Trained **Logistic Regression** and **AdaBoost** classifiers using **Bag of Words** and **word2vec** features to detect hate speech with accuracies ranging from **0.817 - 0.829**

Animal Disposition Predictor

- Trained **classification ML** models like **decision trees**, **logistic regression**, **perceptron** and **SVM** to predict animal disposition (e.g. normal, scared, friendly) based on characteristics like location, species, breed, sex, size, age, condition, temperament, etc, achieving a best accuracy of **0.7202** using decision trees

EDUCATION

University of California, San Diego, September 2021 - December 2024, *Computer Science B.S., GPA: 3.737*

- Advanced Data Structures, Design & Analysis of Algorithms, Software Engineering, Principles of Computer Operating Systems, Computer Architecture, Compiler Construction, Intro to Machine Learning, Probabilistic Reasoning and Decision-Making, Recommender Systems, Intro to Computer Vision, Computer Graphics, Database System Principles

ACTIVITIES AND LEADERSHIP

Huaxia Chinese School, East Brunswick NJ, September 2016 - June 2017

- Volunteered weekly to aid other staff with various tasks: delivering papers, printing and stapling handouts, cleaning up the office, running a small PTO store
