

MAX ALLIANCE

DEVOPS ENGINEER

ACTIVE SECRET SECURITY CLEARANCE

Email: maxalliance32@gmail.com | Phone: +1 (727) 712-6217 | [LinkedIn](#)

PROFESSIONAL SUMMARY :

As a DevOps Engineer with over 8 years of experience, I specialize in automating and optimizing infrastructure, continuous integration/continuous deployment (CI/CD) pipelines, and cloud-based solutions. I have a strong background in deploying and managing scalable systems across cloud environments (AWS, Azure, GCP) while ensuring high availability and performance. My expertise extends to containerization (Docker, Kubernetes), infrastructure as code (Terraform, Ansible), and monitoring solutions, driving efficiency and reducing downtime. I am committed to improving workflows, enhancing collaboration between development and operations teams, and delivering reliable, cost-effective solutions.

TECHNICAL SKILLS:

Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform (GCP), IBM Cloud, Oracle Cloud, DigitalOcean

Tools: Terraform, CloudFormation, AWS Core services (EC2, S3, Lambda, CloudWatch, CloudTrail, AWS Config, IAM, Shield, GuardDuty, Control Tower, ECS, EKS, Code Pipeline etc.) Veracode, Snyk, Jira, Confluence, Bitbucket, Bamboo, GitLab, GitHub, Jenkins, Symantec, Nessus, Qualys, AlienVault, Splunk, CrowdStrike, Ansible, Drata, Infoblox

Configuration Management: Ansible, Chef, Puppet, SaltStack, Terraform, CloudFormation

Version Control: Git, GitHub, GitLab, Bitbucket, Subversion (SVN)

Containers & Orchestration: Docker, Kubernetes, OpenShift, Docker Swarm, Helm, Rancher

Monitoring & Logging: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Splunk, Datadog, Nagios

Collaboration & Project Management: Trello, Jira, Slack, Confluence, Asana, Microsoft Teams, Basecamp

Scripting & Automation: Python, Bash, Shell scripting, PowerShell, Ruby

Networking & Security: VPN, Nginx, HAProxy, SSL/TLS, Firewall, IAM, Kubernetes Security, SSL Certificates

Database Management: MySQL, PostgreSQL, MongoDB, Cassandra, Redis, MariaDB, SQL Server

Infrastructure as Code (IaC): Terraform, CloudFormation, Pulumi, Crossplane, Ansible

PROFESSIONAL EXPERIENCE:

Intel Sep 2023 – Present
Role: DevOps Engineer

- Collaborating with development and IT teams to design, implement, and manage CI/CD pipelines to streamline software deployment processes.
- Automating infrastructure provisioning using tools like Terraform, Ansible, and Kubernetes for efficient resource management.
- Implementing cloud-native solutions and managing workloads on AWS and Azure to support application scalability and availability.
- Monitoring system performance and resolving infrastructure-related issues using tools like Prometheus, Grafana, and ELK stack.
- Ensuring high availability and fault tolerance by managing automated backups and disaster recovery processes.
- Managing containerized applications with Docker and Kubernetes, overseeing 200+ containerized microservices for seamless deployment and scaling across cloud platforms.
- Improving system security by conducting vulnerability assessments and applying patches, reducing security incidents by 35% year-over-year.
- Supporting continuous integration processes by integrating automated tests and quality checks in the pipeline, leading to a 50% reduction in post-deployment defects.
- Collaborating with development teams to optimize application performance, improving system response times by 20% through load balancing and resource allocation.
- Engaging in incident management processes to troubleshoot and resolve production-level issues, reducing incident resolution time by 40%.

Deloitte**Mar 2022 – Sep 2023****Role: DevOps Engineer**

- Collaborated with development and operations teams to design, implement, and manage CI/CD pipelines using Jenkins, GitLab, and Azure DevOps, improving deployment efficiency by 40%.
- Automated infrastructure provisioning and environment management using Terraform, reducing manual setup time by 50%.
- Managed cloud environments on AWS and Azure, optimizing resource usage and reducing costs through effective instance sizing and auto-scaling configurations.
- Implemented monitoring and logging solutions using tools like Prometheus, Grafana, and ELK stack, enhancing system performance visibility and quick issue resolution.
- Deployed and maintained containerized applications using Docker and Kubernetes, ensuring scalable and reliable production environments.
- Developed and maintained scripts (Python, Shell, Bash) for automation, decreasing manual intervention by 50% and streamlining operations for over 20 deployment pipelines.
- Participated in troubleshooting and root cause analysis for production issues, reducing downtime by 30% and improving system availability for clients.
- Contributed to infrastructure as code (IaC) practices, improving deployment consistency and reducing configuration drift across 5+ teams, with over 1,000 lines of IaC code maintained in version control.
- Worked closely with security teams to ensure compliance with security standards, reducing vulnerabilities by 20% through automated security scans and tool integration (e.g., Vault for secret management).
- Contributed to agile processes with bi-weekly sprint reviews and daily stand-ups, ensuring timely delivery of software and infrastructure solutions, improving delivery time by 15%.

Citi Bank**Apr 2019 – Feb 2022****Role: Cloud Engineer**

- Designed, implemented, and maintained scalable cloud infrastructure using AWS and Azure to support business applications and services.
- Collaborated with cross-functional teams to migrate legacy applications to cloud environments, optimizing for cost, performance, and security.
- Automated cloud infrastructure provisioning and deployment using Infrastructure-as-Code (IaC) tools like Terraform and CloudFormation.
- Led efforts to optimize cloud resource usage, achieving a reduction in costs through monitoring and efficient resource allocation.
- Implemented and managed cloud security policies, ensuring compliance with internal and external regulatory standards.
- Worked closely with development teams to integrate CI/CD pipelines with cloud environments, reducing deployment times by 50% and enhancing release frequency.
- Troubleshooted and resolved cloud-related issues, maintaining a 99.99% uptime and ensuring high availability for critical applications.
- Developed and enforced best practices for cloud architecture and disaster recovery, reducing recovery time by 20% in the event of system failures.
- Contributed to ongoing research and adoption of new cloud technologies, ensuring the integration of innovative solutions that improved overall cloud performance by 15%.

Wells Fargo**Jan 2017 – Mar 2019****Role: SRE (Site Reliability Engineer)**

- Ensured High Availability and Reliability: Monitored and maintained mission-critical systems, achieving uptime targets exceeding 99.99%.
- Incident Management: Led incident response and post-mortem analysis, reducing system downtime by 30% through proactive troubleshooting and root cause analysis.
- Automation & Efficiency: Developed and deployed automation scripts and tools, streamlining repetitive tasks and improving deployment speed by 40%.
- Cloud Infrastructure Management: Managed infrastructure on AWS and internal platforms, optimizing resource allocation and reducing cloud costs by 15%.

- Continuous Integration/Continuous Deployment (CI/CD): Supported and enhanced CI/CD pipelines, improving release cycle times and deployment reliability.
- Monitoring and Alerting: Set up and fine-tuned monitoring and alerting systems using Prometheus and Grafana, reducing false positives by 40% and improving incident response time by 20%.
- Collaboration: Worked closely with software engineering, security, and network teams to integrate best practices, reducing deployment errors by 15%.
- Capacity Planning: Conducted performance testing and capacity planning, ensuring systems could scale to handle 50% more traffic without service degradation.
- Tool Development: Contributed to the development of 3 internal tools, improving operational efficiency by 30% and reducing incident tracking time.

EDUCATION:

Westcliff University

Master of Science in Cybersecurity Management & Policy

Dec – 2024

College Farmers Branch, TX

AWS Solution Architect Professional / DevOps in Cloud Computing Cloud Technology Experts

Feb – 2024

St Petersburg College, FL

Bachelor of Applied Science in Computer Networks & Cybersecurity

May – 2021

St Petersburg College, FL

Associate of Applied Science in Computer Networks and Cybersecurity

May – 2018

St Petersburg College FL

Associate of Science in Computer Information Systems

May – 2017

CERTIFICATION:

AWS Certified Solution Architect - Associate

AWS solution architect Professional

Certified Kubernetes Application Developer (CKAD)

CompTIA Advanced Security Practitioner (CASP+)

CompTIA Cybersecurity Analyst (CySA+)

CompTIA Security+

Computer Networking

Foundations of Incident Management
